The Typhoon was the RAF's heavyweight fighter-bomber of choice to support the British and Canadian armies during the invasion of northwest Europe. In this book Chris Thomas extols the great importance of the Typhoon wings in the ultimate Allied victory in Europe. He describes their destruction of German radar in the lead-up to D-Day, the use of large-scale rocket projectiles in land battles and pinpoint attacks on German command and control centres, which crippled the Wehrmacht's ability to respond quickly to Allied troop movements. But not everything went smoothly for the Typhoon wings. Their epic battle with highly effective German flak installations prompted Air Chief Marshal Sir Harry Broadhurst to remark 'I suppose that flying one of these aircraft was the most dangerous task the Air Force has ever asked anybody to do'.

In wide-ranging and provocative analyses of dozens of silent films - icons of film history like *The General* and *The Great Train Robbery* as well as many that are rarely discussed - Kirby examines how trains and rail travel embodied concepts of spectatorship and mobility grounded in imperialism and the social, sexual, and racial divisions of modern Western culture.

*Affective Health and Masculinities in South Africa* explores how different masculinities modulate substance use, interpersonal violence, suicidality, and AIDS as well as recovery cross-culturally. With a focus on three male protagonists living in very distinct urban areas of Cape Town, this comparative ethnography shows that men's struggles to become invulnerable increase vulnerability. Through an analysis of masculinities as social assemblages, the study shows how affective health problems are tied to modern individualism rather than African 'tradition' that has become a cliché in Eurocentric gender studies. Affective health is conceptualized as a balancing act between autonomy and connectivity that after colonialism and apartheid has become compromised through the imperative of self-reliance. This book provides a rare perspective on young men's vulnerability in everyday life that may affect the reader and spark discussion about how masculinities in relationships shape physical and psychological health. Moreover, it shows how men change in the face of distress in ways that may look different than global health and gender-transformative approaches envision. Thick descriptions of actual events over the life course make the study accessible to both graduate and undergraduate students in the social sciences. Contributing to current debates on mental health and masculinity, this volume will be of interest to scholars from various disciplines including anthropology, gender studies, African studies, psychology, and global health.

Every great dish has a center of gravity, a flavor or essence that pulls together other ingredients into a coherent and compelling whole. It's not necessarily the main ingredient but it is fundamentally what the dish is "about". Indian curry spices, fiery Thai chilis, lemony citrus, smoky barbecue rubs: these are all flavors we adore and get our taste buds asking for more. When we talk about wine or alcoholic drinks in any serious way, we talk about flavor too. Flavor is, quite simply, what makes us passionate about food and drink. At last, here is a cookbook that focuses on that fundamental concept. Organized around a dozen or more distinctive tastes, from spicy to citrus to salty to smoky to sweet to bitter and beyond, *The Flavor Principle* will feature more than 30 complete menus with complementary beverage pairings. Covering flavors from all over the world, this cookbook will be a journey around the globe. Modern and eclectic in approach, *The Flavour Principle* will appeal to a wide demographic of food and wine lovers. The publication of *A Matter of Taste* in 2005 set the tone for HarperCollins Canada's cookbook program; *The Flavour Principle* is meant not just as an update of that venerable publication, but will set a new bar for food and beverage pairing cookbooks.

### **The Tempest Prognosticator**

Drawing on psychoanalytic and semiotic perspectives, this book examines discourses mediating the global War on Terror, including governmental speeches, legal documents, print and broadcast journalism, and military memoirs. The book argues that these discourses motivate, and are motivated by, a myth of imminent harm that purportedly justifies a series of "preemptive" measures such as war, torture, and targeted killing, as well as an array of intrusive domestic security procedures such as profiling and mass surveillance. Dominant themes include selective compassion in the mainstream media, the language of war and the sacrificial sublime, asymmetrical warfare and the nostalgia for total war, weaponized drones and just war theory, and the role of American exceptionalism in normalizing endless war. Scholars and students alike will take interest in this original contribution to the fields of cultural studies, psychoanalysis, media studies, rhetoric, critical international relations, and international humanitarian law and ethics.
