Education in South Africa 1996/7 IGI Global

A detailes listing of Distance education institutions in South Africa.

Notes and Abstracts in the Social Foundations of American and International Education
Puc Founder (M)

Over the coming decades, every academic discipline will have to respond to the paradigm of more sustainable life practices because students will be living in a world challenged by competition for resources and climate change, and will demand that every academic discipline demonstrate substantial and corresponding relevance. This book takes as its point of departure that integrating a component of sustainability into a discipline-specific course arises from an educator asking a simple question: in the coming decades, as humanity faces unprecedented challenges, what can my discipline or area of research contribute toward a better understanding of these issues? The discipline need not be future-oriented: an archaeologist, for

instance, could incorporate into a course some aspects of sustainable archaeological practices in areas threatened by rapid climate change, as well as examples of sustainable or unsustainable ways of living practiced by members of the long-gone society under investigation. This book also argues that courses about sustainability need to cross disciplinary boundaries, both because of the inter-relatedness of the issues, and because students will require the ability to use interdisciplinary approaches to thrive through the multiple careers most of them will face. The contributions to this book are presented under four sections. "Sustainability as a Core Value in Education" considers the rationale for incorporating sustainability in disciplinary courses.

“Teaching Sustainability in the Academic Disciplines” presents eight examples of courses from disciplines as varied as agriculture, composition, engineering, and teacher education.

“Education as a Sustainable Practice” reviews how the physical environment of the classroom and the delivery of instruction need themselves to reflect the values being taught. The final section addresses the issues of leadership and long-term institutional change needed to embed sustainable practice as a core value on campus.

Parade Mail & Guardian is based on Revealed Knowledge demarcates itself from the other disciplines which are based on Acquired Knowledge. Thus, the educators for Islamic Finance have the added responsibility and Amanah to uphold the sanctity, nobility and the purity of this knowledge which must be incorporated and reflected in the programmes offered, researches conducted as well as the practices propagated based on the Quran and Sunnah. The International Council of Islamic Finance Educators (ICIFE) therefore, takes its

stride in terms of forefronting the Islamic Finance educators in the mission to play a bigger role in charting the future growth of sustainable Maqasid-based Islamic Finance Education.

Towards attaining this objective, coupled with the recognition of Malaysia as the International Islamic Finance Hub, Malaysia Islamic Finance Education Report Atlas 2021 and Beyond seeks to present the current landscape for Islamic Finance Education as offered by both public and private institutions of higher learning from the year 2017-2020. This MIFER Atlas 2021 and Beyond focuses on three (3) main areas namely, the programmes offered, the talent development, as well as graduate employability. It is hoped that by understanding the current landscape and identifying challenges and issues associated with each area, charting future growth for Islamic Finance Education both at the national and international fronts within a dynamic environment will be more impactful to benefit the ummah as a whole.
