Critical Issues in Plant Health Routledge
This book is one of the first to present a

definitive history of the Christian Ashram Movement. It offers insights into the development of the Movement, Europe's Orientalist view of Eastern mysticism and how the concept of the ashram spread beyond the borders of India. Drawing extensively from ashram literature and the author's field research, the book critically analyzes the notions of inculturation in the encounter between Christianity and Hindu spirituality and ritualism. It looks at how the Movement grew out of the colonial encounter and how it evolved through the years, which was contingent on developments within Christian churches outside India. The volume also discusses the reinterpretation of the idea of the ashram by Christian theologians, the introduction of elite Brahmanical

concepts within the Movement and the unique theological perspectives which were nurtured in these ashrams. The book offers an alternative perspective to the generally perceived history of Christianity in India. It will be of interest to scholars and researchers of religious studies, Christianity, sociology, social anthropology and religious history. Theorising Noumenal Power Routledge Vibration Problems in Machines explains how to infer information about the internal operations of rotating machines from external measurements through methods used to resolve practical plant problems. Second edition includes summary of instrumentation, methods for establishing machine rundown data, relationship between the rundown curves and the ideal frequency response

function. The section on balancing has been expanded and examples are given on the strategies for balancing a rotor with a bend, with new section on instabilities. It includes case studies with real plant data, MATLAB® scripts and functions for the modelling and analysis of rotating machines.

How children's development is shaped by Early Childhood Education and Care (ECEC) classrooms and especially by teacher-child interactions in those settings is a major issue in research and politics, which has been researched for several decades. This book investigates this important topic by raising three overarching questions: (1) What are 'good' teacher-child interactions and how they can be measured? (2) Which individual and/or contextual aspects are associated with teacher-child interactions? (3) What is the impact of teacher-child interactions on the development of children's competencies? The book ties in these fundamental questions with educational research by bringing together international studies from

interdisciplinary backgrounds and presenting current research on the characteristics, predictivity, dependency, and methodological issues of teacher-child interactions in ECEC classrooms. The considered studies conducted in Australia, Austria, Finland, Germany, Greece and Portugal each aim to enrich the scientific discourse and provide fruitful implications for policy and practice. This book was originally published as a special issue of the Research Papers in Education journal. *Telling Terror in Judges 19* MacLehose Press

Theorising Noumenal Power is a critical engagement with Rainer Forst's theory of what he calls "noumenal power." Forst is the most significant younger generation critical theorist of the

Frankfurt School, and his critics include several of the most influential contemporary political power theorists. The concept of noumenal power locates the sources of social and political power in the space of reasons or justifications – using a normatively neutral account of "justification." To exercise power, on that account, means to be able to determine, use, close or open up the space of justifications for others. Going back to Kant, the social subject is theorized as a reasoning being who confers legitimacy upon political structures based upon the cognitive faculty of justification. As argued by Max Weber, authority is the foundation of political institutions and authority presupposes a belief in legitimacy. On the one hand such beliefs can be distorted, as in ideology, or they

can be based upon a process of reasoned justification relative to normatively desirable principles. Critiquing the former, while building upon the latter, serves as the foundation for theorising just democratic political institutions. For Forst's critics, a key theme is how to differentiate ideological (bad) justification, typically based upon emotion, from normatively right democratic reasoning. Other important themes are the analysis of structural domination or the use of threats or other means of exercising power. The debate in this volume constitutes an exciting new way of re-thinking the foundations of ideology, political power, democracy and justice. Providing a state-of-the-art discussion concerning the relationship between political power and justification

Theorising Noumenal Power is essential for students and scholars interested in the theoretical foundations of political power, democracy and justice. The chapters were originally published in the Journal of Political Power.

Set between Normandy and Arizona, *In the Gold of Time* is a seductive tale of silences and dark, half-revealed secrets, and a haunting elegy for innocence lost in a lost world. A young father holidays by the sea near Dieppe with his reproachfully perfect wife and their twin daughters. Returning from the local shop, he meets an eccentric old lady, Alice Berthier, who lives with her mute sister, Clemence. Their mysterious house is full of old photographs and strange

objects--sacred ceremonial masks once belonging to the Hopi, a tribe of Native Americans from Arizona. Haunted by memories of a tragic past, Alice takes comfort in her new companion, and he, in turn, is drawn into her mysterious world. As his family recedes into the background, her stirring tales of the Hopi and the Arizona desert become the only salve to his despondent soul

This book examines the use of military force as a coercive tool by the United States, using lessons drawn from the post-Cold War era (1991–2018). The volume reveals that despite its status as sole superpower during the post-Cold War period, US efforts to coerce other states failed as often as they succeeded. In the coming decades, the United States

will face states that are more capable and creative, willing to challenge its interests and able to take advantage of missteps and vulnerabilities. By using lessons derived from in-depth case studies and statistical analysis of an original dataset of more than 100 coercive incidents in the post-Cold War era, this book generates insight into how the US military can be used to achieve policy goals. Specifically, it provides guidance about the ways in which, and the conditions under which, the US armed forces can work in concert with economic and diplomatic elements of US power to create effective coercive strategies. This book will be of interest to students of US national security, US foreign policy, strategic studies and International Relations in general.

This book explores, at a time when several powers have become serious players on the continent, aspects of African agency, past and present, by African writers on foreign policy, representative of geography, language and state size. In the past, African foreign policy has largely been considered within the context of reactions to the international or global “external factor”. This groundbreaking book, however, looks at how foreign policy has been crafted and used in response not just to external, but also, mainly, domestic imperatives or (theoretical) signifiers. As such, it narrates individual and changing foreign policy orientations over time—and as far

back as independence—with mainly African-based scholars who present their own constructs of what is a useful theoretical narrative regarding foreign policy on the continent—how theory is adapted to local circumstance or substituted for continentally based ontologies. The book therefore contends that the African experience carries valuable import for expanding general understandings of foreign policy in general. This book will be of key interest to scholars and students of Foreign Policy Analysis, Foreign Policy Studies, African International Relations/Politics/Studies, Diplomacy and more broadly to International Relations.

The Tragedy of Nazi Germany Routledge

Originally published in 1986, this book subverts an attitude towards the moral dimension of life which the author terms 'ethical cynicism'. It discusses a theory of moral powers – a theory which shows that moral values are immensely potent sources of power. The author argues that there is a conceptual affinity between the Wittgensteinian account of language and the Marxist theory of history such that the two complement and even require one another in various aspects.

Originally published in 1969, this book discusses the many factors which atomised German society from 1870 onwards and thus assisted Nazi evil, and it shows that Hitler and Nazism were mere phenomena of a mass age. The author wrote with the twin qualifications as historian and survivor of the camps. To have lived through it and then dissect it as a scholar is an astonishing achievement and it is this achievement that this book records.

Widely regarded as one of the greatest American writers of the modern era, F. Scott Fitzgerald is considered a member of the “Lost Generation” of the 1920’s.  Telling Terror in Judges 19 explores the
 value of performing a 'reparative
 reading' of the terror-filled story of the
 Levite's pilegish (commonly referred to
 as the Levite's concubine) in Judges 19,
 and how such a reparative reading can
 be brought to bear upon elements of
 modern rape culture. Historically, the
 story has been used as a morality tale to
 warn young women about what
 constitutes appropriate behaviour. More
 recently, (mainly male) commentators

have tended to write the woman out of
 the story, by making claims about its
 purpose and theme which bear no
 relation to her suffering. In response to
 this, feminist critics have attempted to
 write the woman back into the story,
 generally using the hermeneutics of
 suspicion. This book begins by surveying
 some of the traditional commentators,
 and the three great feminist
 commentators of the text (Bal, Exum
 and Trible). It then offers a reparative
 reading by attending to the pilegish's
 surprising prominence, her moral and
 marital agency, and her speaking voice.
 In the final chapter, there is a detailed
 comparison of the story with elements of
 modern rape culture.

New Perspectives on Virtual and Augmented Reality discusses the possibilities of using virtual and augmented reality in the role of innovative pedagogy, where there is an urgent need to find ways to teach and support learning in a transformed learning environment. Technology creates opportunities to learn differently and presents challenges for education. Virtual reality solutions can be exciting, create interest in learning, make learning more accessible and make learning faster. This book analyses the capabilities of virtual, augmented and mixed reality by providing ideas on how to make learning more effective, how existing VR/AR solutions can be used as learning tools and how a learning process can be structured. The virtual

reality (VR) solutions can be used successfully for educational purposes as their use can contribute to the construction of knowledge and the development of metacognitive processes. They also contribute to inclusive education by providing access to knowledge that would not otherwise be available. This book will be of great interest to academics, researchers and post-graduate students in the field of educational technology.

Air safety is right now at a point where the chances of being killed in an aviation accident are far lower than the chances to winning a jackpot in any of the major lotteries. However, keeping or improving

that performance level requires a critical analysis of some events that, despite scarce, point to structural failures in the learning process. The effect of these failures could increase soon if there is not a clear and right development path. This book tries to identify what is wrong, why there are things to fix, and some human factors principles to keep in aircraft design and operations. Features Shows, through different events, how the system learns through technology, practices, and regulations and the pitfalls of that learning process Discusses the use of information technology in safety-critical environments and why procedural knowledge is not enough Presents air safety management as a successful process, but at the same time, failures

coming from technological and organizational features are shown Offers ways to improve from the human factors side by getting the right lessons from recent events

The Expressive Arts Routledge

Originally published in 1986, and bringing together essays written over a 10 year period, this volume offers a coherent and challenging interpretation of the German past. The book argues that the German Empire between 1914 and 1918 may have enjoyed greater stability and cohesion than is often assumed. It suggests that Imperial Germany's political institutions showed considerable flexibility and capacity for growth and puts forward the idea that without WWI, or in the event of a German victory, the Empire might well

have demonstrated its viability as a modern state. In that case, the origins of fascism should be sought mainly in the subsequent experiences of war, revolution and economic crisis and not so much in the Empire's so-called structural backwardness.

"The relationship between Africa and Europe is of high strategic importance. This volume studies the ongoing dynamics between the two continents by adopting a pluralist understanding of international relations which encompasses non-state actors as well as states. Going beyond pure intergovernmentalism, this focus of this book is on activists, business people, religious believers, local politicians as

well as transnational networks and by hybrid coalitions. Such plurality of socio-economic and political interactions underpinning the relationship between Africa and Europe is underexamined and yet of great importance. The text identifies new patterns of cooperation and recurrent obstacles in the African-European multi-stakeholder dynamics, thus opening the way for a more accurate understanding of the future relationship between Africa and Europe. This book brings African and European reflections together, on an equal standing, in order to achieve a true dialogue among civilizations. This book is aimed at all those who are interested in the African-European relationship, including students and researchers, as well as activists, business people, civil

servant and functionaries at local and national level"--
