MARISA FREDERICK

Sex Trafficking Springer Science & Business Media
 “The best book ever written on human trafficking for sexual exploitation”—the basis for the feature film, *Trafficked*, starring Ashley Judd (Kevin Bales, president of Free the Slaves). Every year, hundreds of thousands of women and children are abducted, deceived, seduced, or sold into forced prostitution. These trafficked sex slaves form the backbone of one of the world’s most profitable illicit enterprises and generate huge profits for their exploiters, for unlike narcotics, which must be grown, harvested, refined, and packaged, sex slaves require no such

“processing,” and can be repeatedly “consumed.”

In this book, Kara provides a riveting account of his four-continent journey into this unconscionable industry, sharing the moving stories of its victims and revealing the shocking conditions of their exploitation. He draws on his background in finance, economics, and law to provide the first ever business analysis of contemporary slavery worldwide, focusing on its most profitable and barbaric form: sex trafficking. Kara describes the local factors and global economic forces that gave rise to this and other forms of modern slavery over the past two decades and quantifies, for the first time, the size, growth, and profitability of each industry. Finally, he identifies the sectors of

the sex trafficking industry that would be hardest hit by specifically designed interventions and recommends the specific legal, tactical, and policy measures that would target these vulnerable sectors and help to abolish this form of slavery, once and for all. The author will donate a portion of the proceeds of this book to the anti-slavery organization, Free the Slaves. “Sex trafficking is more of a problem than most people realize. Read this well-written book and find out.”—Kirk Douglas

 At the beginning of the twenty-first century the demand for anthropological approaches, understandings and methodologies outside academic departments is

shifting and changing. Through a series of fascinating case studies of anthropologists' experiences of working with very diverse organizations in the private and public sector this volume examines existing and historical debates about applied anthropology. It explores the relationship between the "pure and the impure" - academic and applied anthropology, the question of anthropological identities in new working environments, new methodologies appropriate to these contexts, the skills needed by anthropologists working in applied contexts where multidisciplinary work is often undertaken, issues of ethics and responsibility, and how anthropology is perceived from the 'outside'. The volume signifies an encouraging future both for the application of anthropology outside academic departments and for the new generation of anthropologists who might be involved in these developments.

Europe Since 1945

Council of Europe
Originally published
posthumously in 1954,

this book presents a study of the unwritten law of the Albanian mountain tribes by the renowned Scottish anthropologist, classical scholar and ethnographer Margaret Hasluck (1885-1948). In recording the legal aspects of tribal life, Hasluck also provides detailed information on the everyday existence of the tribes. Four chapters are given to the vendetta system, describing minutely the obligations of vengeance, the manner of conducting a feud, the degrees of expiation and the ways of ending. Other chapters give information about the daily life of the household; the laws governing the division of property; the administrative hierarchy; oaths, verdicts and penalties; theft and murder. This book will be of value to anyone with an interest in the writings of Hasluck, anthropology and the Albanian mountain tribes.

Kanuni i Leke Dukagjinit

Rowman & Littlefield
The Kanun is a set of traditional Albanian laws. The Kanun was primarily oral and only in the 20th century was it published in writing. There is only one Kanun since the ancient times commonly referred to the "Kanun of Leke" from which six later

variations eventually evolved, categorized according to the area, the personality and their time of origin: Kanun i vjeter (English: Old Kanun), Kanuni i Leke Dukagjinit (English: The Kanun of Leke Dukagjini) The Kanun of Leke Dukagjini was developed by Leke Dukagjini, who codified the existing customary laws. It has been used mostly in northern and central Albania and surrounding areas formerly in Yugoslavia where this is a large ethnic Albanian population; Montenegro, Kosovo and Macedonia. It was first codified in the 15th century but the use of it has been outspread much earlier in time.

Albania is the seventeenth country to have undergone an international review of its national youth policy, a series which was started by the Council of Europe in 1997. The review was performed in 2009 during two one-week visits by a team of international experts working on the basis of the Albanian National Youth Strategy, published in 2007. The report focuses on three issues identified by the Albanian government: the law, delivery mechanisms and youth participation, and three issues identified as important by the review team itself: youth information, leisure-time activities and youth crime and justice. While reviewing the youth policy in Albania with special attention to these issues, the international team came across a number of specific or cross-sectoral subjects (education, health, minorities, etc.) which helped depict a broad picture of the situation of young people in the country.

Recommendations made by the international team cover not only government action, but address steps to be taken by those who take part, at all levels, in the shaping of youth policy in Albania. [Mirdita House of Gjomarku Kanun](#) Bloomsbury Publishing Estimates indicate that as many as 1 in 4 Americans will experience a mental health problem or will misuse alcohol or drugs in their lifetimes. These disorders are among the most highly stigmatized health conditions in the United States, and they remain barriers to full participation in society in areas as basic as education, housing, and employment. Improving the lives of people with mental health and substance abuse disorders has been a priority in the United States for more than 50 years. The Community Mental Health Act of 1963 is considered a major turning point in America's efforts to improve behavioral healthcare. It ushered in an era of optimism and hope and laid the groundwork for the consumer movement and new models of recovery. The consumer movement gave voice to people with mental and

substance use disorders and brought their perspectives and experience into national discussions about mental health. However over the same 50-year period, positive change in American public attitudes and beliefs about mental and substance use disorders has lagged behind these advances. Stigma is a complex social phenomenon based on a relationship between an attribute and a stereotype that assigns undesirable labels, qualities, and behaviors to a person with that attribute. Labeled individuals are then socially devalued, which leads to inequality and discrimination. This report contributes to national efforts to understand and change attitudes, beliefs and behaviors that can lead to stigma and discrimination. Changing stigma in a lasting way will require coordinated efforts, which are based on the best possible evidence, supported at the national level with multiyear funding, and planned and implemented by an effective coalition of representative stakeholders. Ending Discrimination Against People with Mental and Substance Use Disorders: The Evidence for Stigma

Change explores stigma and discrimination faced by individuals with mental or substance use disorders and recommends effective strategies for reducing stigma and encouraging people to seek treatment and other supportive services. It offers a set of conclusions and recommendations about successful stigma change strategies and the research needed to inform and evaluate these efforts in the United States.

Conflict and Multimodal Communication

Routledge
This book makes the case for the independence of Kosova - the former province of 'old-Yugoslavia' and now temporarily a United Nations-led International protectorate - at a time in which international diplomacy is deeply involved in solving the contested issue of its 'Final Status'. The aim of the book is to counteract the anti-Albanian propaganda waged by some parties, but never to propose a counter-propaganda hostile to others or to the goals of a democratic Kosova.

In some senses, Albania is a living museum of the past. Originally a small herding community in the most inaccessible reaches of the Balkans, the presence of Albanians in southeastern Europe has been documented for over a thousand years. Albanian traditional folk culture, which evolved over centuries of relative isolation, is surprisingly rich. Yet despite recent events this culture remains little known to the Western world. Due to the lasting effects of a half century of Stalinist dictatorship, very few individuals even in Albania know much about their own popular traditions. The Dictionary of Albanian Religion,

Mythology, and Folk Culture makes available for the first time a wealth of knowledge about Albanian popular belief and folk customs. Alphabetical entries shed light on blood feuding, figures of Albanian mythology, religious beliefs, communities, and sects, calendar feasts and rituals, and popular superstitions, as well as birth, marriage, and funeral customs, and sexual mores. This unique volume will stand as the standard reference work on the subject for years to come.

Kanuni i Lekë Dukagjinit
Berghahn Books

This book is about how human societies form collective, i.e. shared, memories, with implications for how nations, ancient and modern, are built. Understanding how nations manipulate the collective memory making process is key to explaining the behaviors of various state and non-state actors, such as the Islamic State.

Balkan Identities brings together historians, anthropologists, and literary scholars all working under the shared

conviction that the only way to overcome history is to intimately understand it. The contributors of *Balkan Identities* focus on historical memory, collective national memory, and the political manipulation of national identities. They refine our understanding of memory and identity in general and explore and assess the significance of particular manifestations of Balkan national identities and national memories in the region. The essays in *Balkan Identities* grapple with three major problems: the construction of historical memory, sites of national memory, and the mobilization of national identities. While most essays focus on a single country (e.g. Croatia, Romania, Turkey, Cyprus, Albania, Serbia, Bulgaria, Greece, Macedonia), they are in dialogue with each other and share an opposition to rigid isolationist identities. Illuminating and challenging, *Balkan Identities* demonstrates the ever-changing nature of a troubled and culturally vibrant region.

"THE CODE OF LEKE

DUKAGJINI is a great cultural treasure, comparable to the chapters of The Old Testament." "It provides deep insights into the ancient society of the Albanians, their somber dignity & their magnificent sense of honor."--David Binder, The New York Times. "This legal system was established & passed on to future generations as a common law by Leke Dukagjini, a co-fighter of the legendary Skenderbeg." "The 'Besa' or the 'word of honor' as stated in THE CODE OF LEKE DUKAGJINI which means peace & protection to those whom it is given, has become today an important fighting tool in the political struggle of Kosovo's Albanians against Serb oppression."--Victor Meier, The Frankfurter Allgemeine Zeitung. "The legal Code of the Albanians known by them for a thousand years, is one of the most original in the history of mankind. Among the basic pillars of this code are the equality of men before the code & the non-abuse of justice." "The entire essence of the legal code of the Albanians is an unparalleled rigorous respect for this basic

principle: non-violation of the dignity of a man- his honor, home, & life."-- Ismail Kadare, Albanian writer.

Memory and Nation

Building Scarecrow Press

Two destinies intersect in this novel -- that of Gjorg, a young mountaineer who has just killed a man in order to avenge the death of his older brother, and who expects to be killed himself in keeping with the code of the highlands; and that of a young couple who have come to study the age-old customs, including the blood feud.

The Burden of the Balkans

Oxford University Press

This book explores the use of technology to detect, predict and understand social cues, in order to analyze and prevent conflict.

Traditional human sciences approaches are enriched with the latest developments in Social Signal Processing aimed at an automatic understanding of conflict and negotiation.

Communication—both verbal and non-verbal, within the context of a conflict—is studied with the aim of promoting the

use of intelligent machines that automatically measure and understand the escalation of conflict, and are able to manage it, in order to support the negotiation process. Particular attention is paid to the integration of human sciences findings with computational approaches, from the application of correct methodologies for the collection of valid data to the development of computational approaches inspired by research on verbal and multimodal communication. In the words of the trade unionist Pierre Carniti, "We should reevaluate conflict, since without conflict there is no social justice." With this in mind, this volume does not approach conflict simply as an obstacle to be overcome, but as a concept to be fully analyzed. The philosophical, linguistic and psychological aspects of conflict, once understood, can be used to promote conflict management as a means for change and social justice.

Kanuni I Lekë Dukagjinit Rowman & Littlefield
Northern Albania and Montenegro are the only regions in Europe to have retained a true tribal society up to the mid-twentieth century. This book provides the first scholarly investigation of this tribal society, a pioneer work that offers a detailed survey of all the major Albanian-speaking tribes in Albania, Montenegro and Kosovo. Robert Elsie provides comprehensive material on the 69 different tribes, including data on their locations, religious affiliations, tribal structures and relations, population statistics, tribal folklore, legends and history. Also included are excerpts from the works of prominent nineteenth and early-twentieth century writers, such as Edith Durham and Johann Georg von Hahn, who travelled through the tribal regions, as well as short biographies on prominent figures linked to the tribes. As the first book of its kind, *The Tribes of Albania* will be of interest to scholars and

students of the Balkans, of southeastern European anthropology, ethnography and history. *Ending Discrimination Against People with Mental and Substance Use Disorders* National Academies Press
There's something compelling about the shine of clicking brass clockwork and hiss of steam-driven automatons. But there was something missing. It was easy to find excellent stories of American and British citizens... but we rarely got to see steampunk from the point of view of the rest of the world. Until now. *Steampunk World* is a showcase for nineteen authors to flip the levers and start the pistons and invite you to experience the entirety of steampunk.
A Dictionary of Albanian Religion, Mythology, and Folk Culture NYU Press
Based on extensive interviews, this text tells the frank and engrossing stories of these women, setting their lives within the wider context of a country undergoing radical upheaval and social transformation.
