One of today's most pressing issues in criminology and crime prevention is the problem of crime in our

cities and towns and its prevention. The topic of crime prevention in the Urban Community was discussed at the 47th International Course of the International Society for Criminology (ISC) held at Chuo University, Tokyo. It was the very first time

such an ISC meeting was held in Asia and this meant that finally a relatively large number of Japanese and other Asian participants were able to express their views on criminal policy and crime prevention in urban centres all over the world. Crime in urban communities is not an exclusively Western phenomenon, but it is also a considerable problem in other parts of the world. This makes an interchange of ideas between Western, Eastern and Third-World criminologists particularly important. General characteristics of the urban communities that suffer from a high crime rate are ethnic and racial tensions, a mix of old housing areas and new

business districts, a prevailing sense of anonymity, slums and juvenile delinquency. The existence of these general characteristics besides mutual differences makes cooperation in the crime prevention sphere definitely worth the effort.

FITNESS TRAINING.

This new book presents the continued evolution of functional training. Ten sections present everything a strength coach or personal trainer may need to understand modern training theory. Boyle updates the reader on the current thinking in core training, back pain, and on how the hip musculature works. Further material on cardiovascular training, and what has worked

for the athletes training in his facility continues the journey. In the second half of the book, the author discusses training strategies, including exercises equipment and tools in use on the gym floor, how he develops speed, and a section on his single-leg training methods. Finally, he puts the entire package together with program design, covering the basic objectives of a sound program, and showing you exactly which programs to use in a variety of circumstances.

The *CCTV Handbook* is an end user's guide to learning the basics of CCTV security technology and what to look for when buying and installing a system. Filled with insights from installers and vendors, the *CCTV Handbook* is designed to help new and experienced users alike learn about the features available and how they work. Many end users find manuals from manufacturers to be too technical or to be filled with sales material. The *CCTV Handbook* examines all the popular technologies of today and examines the pros and cons of each. In addition to learning how to buy the right equipment, the *CCTV Handbook* teaches

users about installing, configuring, & troubleshooting their CCTV security video cameras. This book is intended as an end user's guide to understanding modern CCTV security systems. It is our goal to help users plan, install, and maintain surveillance systems in residential, business, or commercial applications.

This book, Saemaul so far, is a record of the holy works of those who have tried for the development of the country and the happiness of their descendants. President Park Jeonghee said in his handwritten manuscript, 'I see many examples of one good village leader making

one village raise up completely. The achievements they have accomplished should be documented and retained in later history. These people are the heroes of our farm village.' This book is the story of the villages' heroes. □ □ □□ □ □□□□ □ □□ □□□ □ □ □□ □□ □□ □□ □□ □□ □□□. □□ □□□ □□ □ '□ □□ □□ □ □□□ □ □□ □□ □□□ □ □ □ □□ □□. □□ □□ □□ □□ □□ □ □ □□ □□ □□ □□ □□ □□ □□ □□ □□□'□□ □ □ □□□. □□ □ □ □ □ □□ □ □□□□. A certain historian once diagnosed that one of the reasons for causing war was because young children were hungry, and there was nothing to feed them. The Saemaul Undong was a war. It was a war that fought poverty to escape hunger. We

have won the war. I have seen many success stories in order to pass these on this book. These success stories are the story of village heroes. As I read them, I even shed tears with red eyes. The current abundance is only thanks to our great ancestors who sweated blood day and night. It is a report that if the amount of food waste currently being thrown away per year is converted into food value, it will reach KRW 25 trillion and the processing cost alone will reach KRW 800 won. Please regain control of ourselves. Our country becomes like a neighboring country. The Philippines, which has been rich enough to build Jangchung Gymnasium in Korea for free, is unable to

continue its rich national luck and falls into poverty again. Not long ago, it reminds us of our miners and nurses who left for Germany for employment abroad. There is a saying in our country saying that a frog cannot think of a tadpole day. We need to be upright. Wake up.

This book, 'Saemaul so far' is an overview of the progress of Saemaul Undong for half a century. We hope that this book will help villagers, development officials and growing generations of countries around the world who are struggling to escape poverty. It was edited and written in a development manual format to help them induce and share the experience of Saemaul Undong into their own country's development. At the same time, some of the major Policy

Docs(presidential approval documents) produced during the Saemaul Undong development process were cited to refer to their country's policy making. USA President Barack Obama said Korea is a role model for other developing countries to learn from. This revision of the classic book on CCTV technology, CCTV Surveillance, provides a comprehensive examination of CCTV, covering the applications of various systems, how to design and install a system, and how to choose the right hardware. Taking into account the ever-

changing advances in technology using digital techniques and the Internet, CCTV Surveillance, Second Edition, is completely updated with the recent advancements in digital cameras and digital recorders, remote monitoring via the Internet, and CCTV integration with other security systems. Continuing in the celebrated tradition of the first edition, the second edition is written to serve as a useful resource for the end-user as well as the technical practitioner. Each chapter begins with an overview, and presents the latest information on the relevant equipment, describing the characteristics, features and application of each device. Coverage of

aging or obsolete technology is reduced to a historical perspective, and eight brand new chapters cover digital video technology, multiplexers, integrated camera-lens-housing, smart domes, and rapid deployment CCTV systems. Serves as an indispensable resource on CCTV theory Includes eight new chapters on the use of digital components and other related technologies that have seen a recent explosion in use Fully illustrated, the book contains completely updated photographs and diagrams that represent the latest in CCTV technology advancements

Professionals provides the information necessary to design the ideal CCTV system. The chapters are stand-alone sources of information on their subjects and are presented in logical sequence to guide the reader from basic principles to more complex for a complete system understanding. In his straight-forward and informative text, Alan Matchett approaches the camera systems from the user's point of view, providing the security manager with the knowledge to discuss the system, its desired features, and the areas of design concern within the context of an organization's business model. This can prove to be invaluable when evaluating an existing

system, the use and components of a given system, or in evaluating a system design proposed by a vendor. Installers and service personnel will benefit from the functions and possibilities that are available with the various components and by gaining an understanding of their customers' needs. Newer technicians will learn how to set up the system properly, and can familiarize themselves with the technologies that go into a CCTV system. Security equipment sales personnel will also gain a better knowledge of the customer's needs as well as learn to determine exactly what questions they should be asking the customer and what the

customer's responses mean. In this manner, the book will offer invaluable tips to ensure customers get exactly what they expect in a system. * Provides a detailed explanation of CCTV components and the technology behind analog and digital CCTV systems. * Establishes a "common language" for security professionals, CCTV system designers and sales personnel to use as a basis for system design. * Provides a clear explanation of the design process and design principles.

During the last decade in particular the levels of critical engagement with the challenges posed for privacy by the new technologies have been on the rise. Many scholars have continued to explore the big themes in a manner which typifies the complex interplay between privacy,

identity, security and surveillance. This level of engagement is both welcome and timely, particularly in a climate of growing public mistrust of State surveillance activities and business predisposition to monetize information relating to the online activities of users. This volume is informed by the range of discussions currently conducted at scholarly and policy levels. The essays illustrate the value of viewing privacy concerns not only in terms of the means by which information is communicated but also in terms of the political processes that are inevitably engaged and the institutional, regulatory and cultural contexts within which meanings regarding

identity and security are constituted.
