European economic integration has relied on policies intended to make the European Union strong and resilient economically, socially and politically. The Eurozone crisis and Brexit have demonstrated, however, how fragile this hope was and how contested reforms to the major European economic policies have become. Dariusz Adamski explains the evolution of these policies - from the Economic and Monetary Union to the internal market, international trade, the EU's climate policy, as well as its redistributive policies - and demonstrates how this evolution has made European economic integration increasingly frail. He shows how erroneous economic and political assumptions regarding the direction of the European integration project have interplayed with the EU's constitutional context. Arguing that flaws in individual policies contributing to European economic integration can be remedied in compliance with the existing constitutional setup, he explains why such solutions would be economically beneficial and politically feasible.

Housing is crucial to the quality of life and wellbeing for individuals and families, but the availability of adequate or affordable housing also plays a vital role in community economic development. Rural areas face a substantial disadvantage compared to urban areas in regard to housing, and this book explores these issues. Rural Housing and Economic Development includes chapters from nationally known experts from throughout the U.S. to provide insight to help understand and address the difficult housing concerns within rural areas. The chapters cover a variety of issues including housing for rural minorities, the extent of and problems associated with mobile home dwelling, the extent to which affordable rental housing is available in rural areas, the rapidly growing elderly population, and the housing consequences of rapid population and economic growth associated with energy development. The authors not only describe various housing problems, but also suggest policy approaches to more effectively address them. This book will be a vital resource to policy makers at the local, state or national level as they grapple with difficult rural housing problems. Researchers and professionals dealing with housing issues will also benefit from the insights of these experts while the book will also be appropriate for upper level undergraduates or graduate students in courses on housing or economic development.

This book examines why Japan has one of the highest enrolment rates in cram schools and private tutoring worldwide. It sheds light on the causes of this high dependence on 'shadow education' and its implications for social inequalities. The book provides a deep and extensive understanding of the role of this kind of education in Japan. It shows new ways to theoretically and empirically address this issue, and offers a comprehensive perspective on the impact of shadow education on social inequality formation that is based on reliable and convincing empirical analyses. Contrary to earlier studies, the book shows that shadow education does not inevitably result in increasing or persisting inequalities, but also inherits the potential to let students overcome their status-specific disadvantages and contributes to more opportunities in education. Against the background of the continuous expansion and the convergence of shadow education systems across the globe, the findings of this book call for similar works in other national contexts, particularly Western societies without traditional large-scale shadow education markets. The book emphasizes the importance and urgency to deal with the modern excesses of educational expansion and education as an institution, in which the shadow education industry has made itself (seemingly) indispensable. *Self-Help to ICSE Economics Class X* Gurukul Books & Packaging

Evolving Patterns and Conceptual Implications by Mocktime Publication

If treated as a single economy, the European Union is the largest in the world, with an estimated GDP of over 14 trillion euros. Despite its size, European economic policy has often lagged behind the rest of the world in its ability to generate growth and innovation. Much of the European economic research itself often trails behind that of the USA, which sets much of the agenda in mainstream economics. This book, also available as open access, bridges the gap between economic research and policymaking by presenting overviews of twelve key areas for future economic policy and research. Written for the economists and policymakers working within European institutions, it uses comprehensive surveys by Europe's leading scholars in economics and European policy to demonstrate how economic research can contribute to good policy decisions, and vice versa, demonstrating how economics research can be motivated and made relevant by hot policy questions.
