This book is both a description of my journey from Zimbabwe to Canada and a partial story of my life before and after emigrating to Canada in 1990. The journey began with a dream that my wife Barbara Sithabile Simela and I had in the late 1980s when we lived in Zimbabwe. Our dream and hopes were to find a place where we could raise our children in peace and tranquility where they could nurture and nourish their own dreams to their full God-given potential. Early chapters of the book present a heart wrenching decision that I made to abandon a position which I held so dearly with the National Museums and Monuments of Zimbabwe as Acting Regional Director for the western region. It then chronicles the steps we took to apply for permanent residence in Canada. Motor Vehicle Emission Simulator (MOVES) .: AuthorHouse

Contemporary Issues in Management Development in Africa is jointly published with the University of Ghana Business School in response to the growing importance of Africa in global business discourse. The book spans the broad areas of management development in Africa and addresses a wide variety of issues that are critical for Africa's economic and social development, including their implications for management development. Whilst the book's focus is on recent and contemporary development issues, it situates the discourses within historical contexts. For this, the first section of the book is on the historical review of management development in Africa; section two deals with contemporary management issues while the third section is on the policy and institutional perspectives of management development in Africa. The book is an essential reading for students and scholars of international business, finance, economics, accounting, corporate governance and general management. It should be equally a useful guide for practitioners and policy makers alike. Studying and Living in Britain 1990 Writers Republic LLC

Injury is recognized as a major public health issue worldwide. In most countries, injury is the leading cause of death and disability for children and young adults age 1 to 39 years. Each year in the United States, injury claims about 170,000 lives and results in over 30 million emergency room visits and 2.5 million hospitalizations. Injury is medically defined as organ/tissue damages inflicted upon oneself or by an external agent either accidentally or deliberately. Injury encompasses the undesirable consequences of a wide array of events, such as motor vehicle crashes, poisoning,

burns, falls, and drowning, medical error, adverse effects of drugs, suicide and homicide. The past two decades have witnessed a remarkable growth in injury research, both in scope and in depth. To address the tremendous health burden of injury morbidity and mortality at the global level, the World Health Organization in 2000 created the Department of Injury and Violence Prevention, which has produced several influential reports on violence, traffic injury, and childhood injury. The biennial World Conference on Injury Control and Safety Promotion attracts a large international audience and has been successfully convened nine times in different countries. In the United States, the National Center for Injury Prevention and Control became an independent program of the federal Centers for Disease Prevention and Control in 1997. Since then, each state health department has created an office in charge of injury prevention activities and over a dozen universities have established injury control research centers. This volume will fill an important gap in the scientific literature by providing a comprehensive and up-to-date reference resource to researchers, practitioners, and students working on different aspects of the injury problem and in different practice settings and academic fields.

Policing the Open Road examines how the rise of the car, that symbol of American personal freedom, inadvertently led to ever more intrusive policing--with disastrous consequences for racial equality in our criminal justice system. When Americans think of freedom, they often picture the open road. Yet nowhere are we more likely to encounter the long arm of the law than in our cars. Sarah Seo reveals how the rise of the automobile transformed American freedom in radical ways, leading us to accept--and expect--pervasive police power. As Policing the Open Road makes clear, this expectation has had far-reaching political and legal consequences.--

New languages, exotic foods, stunning landscapes and local people with an entirely different outlook

By its nature, insurance is intended to provide financial protection for basic human needs such as shelter, means of self-sustenance, and well-being. You would expect that most, if not all, people would be covered by it in one form or another. Unfortunately, that is not the case for most people

in Mozambique and many other low-income countries. In *Development of Insurance in Mozambique*, Israel Muchena answers questions such as: Why are those who need financial protection the most so often left uncovered? What should key stakeholders in the insurance sector be doing to raise awareness and to promote access of people that need financial protection the most? How do emerging concepts such as micro-insurance, weather index insurance, and digital marketing work? Muchena also examines the history of insurance, beginning with its ancient origins among traders in China, to written rules in ancient Iranian kingdoms, followed by the development of insurance through guilds in Mesopotamia and early markets in Europe. Thereafter,

he leads readers up to the present day of how insurance is handled in Africa, including Mozambique.
