At the turn of the 20th Century, the great cruise liner Virginia shuttles back and forth across the Atlantic Ocean, transporting passengers from old Europe to the New World. When an abandoned baby is found on board the sailors christen Novecento – 1900. The child is destined to a strange fate. Novecento will never leave the ship as long as he lives, yet he becomes the greatest jazz musician the world would never know. He only knows his music, which has a magical effect on everyone who hears. For six years before World War II, Tim Tooney played trumpet with him and Novecento gave him his story... Adapted for film in The Legend of 1900, this stage adaptation presented as a monologue, is a beautiful piece of theatre.

Up until now the dominant view of condensed matter physics has been that of an ?electrostatic MECCANO? (erector set, for Americans). This book is the first systematic attempt to consider the full quantum-electrodynamical interaction (QED), thus greatly enriching the possible dynamical mechanisms that operate in the construction of the wonderful variety of condensed matter systems, including life itself.A new paradigm is emerging, replacing the ?electrostatic MECCANO? with an ?electrodynamic NETWORK,? which builds condensed matter through the long range (as opposed to the ?short range? nature of the usual electrostatic forces) electrodynamical interaction; this interaction creates ?coherent configurations? of the elementary systems (atoms and molecules), which oscillate in phase with a coherent macroscopic (and classical) electromagnetic field that, through the strong interaction with matter, remains trapped inside it.

An enchanting and fascinating insight into Japanese landscape, culture, history and future. Originally written in Japanese, this passionate, vividly personal book draws on the author's experiences in Japan over thirty years. Alex Kerr brings to life the ritualized world of Kabuki, retraces his initiation into Tokyo's boardrooms during the heady Bubble Years, and tells the story of the hidden valley that became his home. But the book is not just a love letter. Haunted throughout by nostalgia for the Japan of old, Kerr's book is part paean to that great country and culture, part epitaph in the face of contemporary Japan's environmental and cultural destruction. Winner of Japan's 1994 Shincho Gakugei Literature Prize. Alex Kerr is an American writer, antiques collector and Japanologist. Lost Japan is his most famous work. He was the first foreigner to be awarded the Shincho Gakugei Literature Prize for the best work of non-fiction published in Japan.

*English-Only Europe?* explores the role of languages in the process of European integration. Languages are central to the development of an integrated Europe. The way in which the European Union deals with multilingualism has serious implications for both individual member countries and international relations. In this book, Robert Phillipson considers whether the contemporary expansion of English represents a serious threat to other European languages. After exploring the implications of current policies, Phillipson argues the case for more active language policies to safeguard a multilingual Europe. Drawing on examples of countries with explicit language policies such as Canada and South Africa, the book sets out Phillipson's vision of an inclusive language policy for Europe, and describes how it can be attained.

"The study of language is pertinent to many fields of inquiry. It is relevant to psychology, anthropology, philosophy, and medicine. It encroaches upon the humanities, as well as upon the social and natural sciences. We may pursue investigations that concentrate on what man has done with or to specific languages; or we may regard language as a natural phenomenon- an aspect of his biological nature, to be studied in the same manner as, for instance, his anatomy. Which of these approaches is to be chosen is entirely a matter of personal curiosity. This book is concerned with the biological aspects of language." -- Preface

CLIL (Content and Language Integrated Learning) has emerged since the millennium as a major trend in education. Written by Do Coyle, Philip Hood and David Marsh and drawing on their experience of CLIL in secondary schools, primary schools and English language schools across Europe, this book gives a comprehensive overview of CLIL. It summarises the theory which underpins the teaching of a content subject through another language and discusses its practical application, outlining the key directions for the development of research and practice. This book acknowledges the uncertainty many teachers feel about CLIL, because of the requirement for both language and subject knowledge, while providing theoretical and practical routes towards successful practice for all.
