Ceasefires have one big downside: they eventually come to an end. And when

they do, once again game nodes are set ablaze, and platoons of Dark Faction soldiers threaten our customary world with destruction. The enemy has grown stronger and more numerous. To make matters worse, they also got their hands on even deadlier weaponry. They have learned painful lessons from previous encounters and adjusted their tactics accordingly. What's more, the vast hordes of enemies are led by the greatest strategist of modern times, and his mage advisors can see all possible futures so they always know just what to do. How can our world possibly stand up against such an enemy? Our only hope is the bravery and tenacity of our best fighters, those who'd rather die than surrender. Well, that and a starship captained by one lone mage.

In 1993 I was 19 years old and still living in South Australia, but then, what else was I going to be doing? 1993 is split into two parts as, well, I beat my previous year's record and wrote 201 songs, so cutting it into two parts makes for easier reading. The book also contains some witty one liners and anecdotes about what was happening, who I wanted to be, or who I had a crush on. They are not perfect, nor meant to be, they're just the musings of a young teenage girl with crushes and dreams.

Here's 1993 part 1. Enjoy!

When Addison Said Goodbye By: Tiffany Hurdle  
When Addison Said Goodbye is the journey of a teenage girl who becomes pregnant at the age of fifteen. The girl defies most odds; however, she can't deny illness and death. The book teaches us to regain triumph and determination in our lives, to stop judging people, to help educate and find cures for rare illnesses such as adrenal insufficiency, and to live each day like

it's the last but in a loving and responsible manner. The message is simple: "Love all, because you never know when the final day will come for you or others."

Our lives are supposed to be resplendent, radiant, and glorious. Instead, what most of us experience is a life filled with struggle, conflict, and

illness. Relationshiping creates a bridge to a new life based upon Dr. Angela Longos more than forty years of clinical experience. Dr. Longo offers an overview of the eight bottom lines, which she defines as the eight major ways in which we block the flow of positive energy into our lives. She explains how to shift that energy to resplendent living by relationshiping through quantum resplendencya quantum way of living. The Relationshiping workbook includes explanations and exercises using the following tools: Heartwaving is an easy-to-use technique used to shift old, unproductive patterns to resplendency. Bathwaves are Longos self-created energy patterns based upon her beliefs, attitudes, thoughts, habits, words, actions, values, and emotions. Love

Letters are messages she sends to herself to guide her to living resplendency. Triunity shows her she is actually three beings in onepromoting understanding of her larger persona. Eternalbeing indicates the larger, unique purpose of her life. Muscle testing helps to assess her perceptions and patterns. Shifting the Eight Bottom Lines, the eight judgments that keep her from changing her Bathwaves to living resplendency. Relationshifting demonstrates the fact that when you are living in the resplendent way, life is EEEZYan eternal, emergent, entanglement as a zestful you.

*Of the Subcontract* Dorrance Publishing  
*Of the Subcontract* is a collection of poems about computational capitalism, each of which was written by an

underpaid worker subcontracted through Amazon.com's Mechanical Turk service. The collection is ordered according to cost-of-production and repurposes metadata about the efficiency of each writer to generate informatic typographic embellishments. Those one hundred poems are braced between two newly commissioned essays; the whole book is threaded with references to Jean-Jacques Rousseau, Wolfgang von Kempelen and the emerging iconography of cloud living. Of the Subcontract reverses out of the database-driven digital world of new labour pools into poetry's black box: the book. It reduces the poetic imagination to exploited labour and, equally, elevates artificial intelligence to the status of the poetic. In doing so, it

explores the all-too-real changes that  
are reforming every kind of work, each

day more quickly, under the surface of  
life.
