Research-Based Methods for the Classroom Third Street Press

How we treat others often influences how individuals feel about themselves. This book illustrates how educators can effectively promote sensitive, inclusive classroom

practices that maximize success for students with disabilities. Embracing Disabilities in the Classroom provides content-rich interdisciplinary lessons accompanied by behavioral, academic, and social interventions that capitalize on student strengths. Inclusion expert Toby J. Karten demonstrates the impact of literature, self-advocacy, role playing, and strategic interventions on students' growth and achievement. The numerous lessons, tables, rubrics, instructional guidelines, and charts help readers:

- Determine effective strategies for differentiating instruction for specific disabilities
- Modify lessons and

curriculum appropriately in the content areas

- Encourage students to become active participants in learning
- Increase disability awareness and foster inclusive mind-sets in students, colleagues, and families

This practical resource provides special education and general education teachers, principals, and teacher leaders with both effective instructional strategies for curriculum delivery and responsive approaches to promoting positive attitudes toward disabilities. Given appropriate support and an accepting environment, all students are able to achieve, thrive, and succeed in school and in life!

Inclusion Succeeds With Effective Strategies & Collaboration, Grades

K-5 Scarecrow Press
A hugely entertaining and riotous re-telling of a classic fairy tale from one of the most original and funny voices in children's books today. Have you ever heard the story of Goldilocks and the Three Dinosaurs? Yes, you heard right - DINOSAURS. Once upon a time, there were three hungry dinosaurs: Papa Dinosaur, Mama Dinosaur and ... a Dinosaur who happened to be visiting from Norway. Of course. One day, purely on a whim, they decided to tidy up their house nice and neat, make their beds up all cosy and comfortable, prepare delicious hot chocolate pudding of varying temperatures, place their chairs just so, and go ... SOMEWHERE ELSE. Let's be clear, they were definitely NOT setting up a trap for some succulent, poorly supervised little girl called Goldilocks who may wander by ... ahem.

Building on the Strengths of Students with Special Needs

Dorrance Publishing
Should digital technology be viewed as a new life form, sharing our ecosystem and coevolving with us? Are humans defining technology, or is technology defining humans? In this book, Edward Ashford Lee

considers the case that we are less in control of the trajectory of technology than we think. It shapes us as much as we shape it, and it may be more defensible to think of technology as the result of a Darwinian coevolution than the result of top-down intelligent design. Richard Dawkins famously said that a chicken is an egg's way of making another egg. Is a human a computer's way of making another computer? To understand this question requires a deep dive into how evolution works, how humans are different from computers, and how the way technology develops resembles the emergence of a new life form on our planet. Lee presents the case for considering digital beings to be living, then offers counterarguments. What we humans do with our minds is more than computation, and what digital systems do—be teleported at the speed of light, backed up, and restored—may never be possible for humans. To believe that we are simply computations, he argues, is a “dataist” faith and scientifically indefensible. Digital beings depend on humans—and humans depend on digital beings.

More likely than a planetary wipe-out of humanity is an ongoing, symbiotic coevolution of culture and technology.
