Since the symmetrical-global East-West conflict was decided in favor of the West, numerous asymmetrical conflicts have erupted around the globe. Jihadist terrorism has spread beyond the borders of the regions in which it had its origin and has reached a global dimension. Research and analysis of the root causes and underlying conditions, motivators and enablers of terrorism including the agitation propaganda of jihadist terrorists are vital to shaping appropriate countermeasures to the threat from Islamic terrorism. This paper looks at the jihadist use of strategic communication management techniques. The mass media and especially the Internet have become the key enablers and the main strategic communication assets for terrorists and have ensured them a favorable communication asymmetry.

The articles and essays in this volume consider the problem of international terrorism from an international legal perspective. The articles address a range of issues starting with the dilemma of how to reach agreement on what constitutes terrorism and how to encapsulate this in a legitimate definition. The essays move on to examine the varied responses to terrorism by states and international organisations. These responses range from the suppression conventions of the Cold War, which were directed at criminalising and punishing various manifestations of terrorism, to more coercive, executive-led responses. Finally, the articles consider the role of the Security Council in developing legal regimes to combat terrorism, for example by the use of targeted sanctions, or by general legislative measures. An evaluation of the contribution of the sum of these measures to the goals of peace and security as embodied in the UN Charter is central to this collection.

New York Times bestselling author Michael Crichton delivers another action-packed techno-thriller in *State of Fear*. When a group of eco-terrorists engage in a global conspiracy to generate weather-related natural disasters, it's up to environmental lawyer Peter Evans and his team to uncover the subterfuge. From Tokyo to Los Angeles, from Antarctica to the Solomon Islands, Michael Crichton mixes cutting edge science and action-packed adventure, leading readers on an edge-of-your-seat ride while offering up a thought-provoking commentary on the issue of global warming. A deftly-crafted novel, in true Crichton style, *State of Fear* is an exciting, stunning tale that not only entertains and educates, but will make you think.

This book's contribution lies in its careful synthesis of concepts and concrete examples on issues of contemporary concern: terrorism, Orientalism, and Dalit Bahujan movements, and their reception in the popular media as well as in academic literature. Drawing from the latest developments in South Asian literary studies, this book examines the uses of postcolonial theory in understanding the structural transformations enabled by post-9/11 discourses of Orientalism and terrorism; the internal contradictions between South Asian approaches to postcolonialism (Subaltern Studies) and its European adaptations; and the resistance produced by the indigenization of local literary traditions in the work of select South Asian literary figures. The three sub-sections—"discourses," "disjunctures," and "indigenisms"—provide the conceptual space necessary for a thematic guidance of the respective arguments presented in this book. This book will be useful to scholars specializing in South Asian studies, Indian English Literature, Postcolonial Studies, Sociology, and Political Science.

Soon after watching the twin towers falling in New York, some of those with business responsibilities were already asking themselves whether people would be willing to work in tall buildings ever again. Is work too risky? How can people be expected to attend work in what might now be seen as precarious and vulnerable workplaces and cities? Although, thankfully, large scale terrorist attacks are infrequent, the world's cities, and the businesses to which they are home, have been put on notice that it can come to any place at any time. In *Terrorism, the Worker and the City*, Luke Howie considers what steps managers and employees can and should take to protect their businesses from such an amorphous and indefinable threat. Deftly combining theoretical insight with empirical research, he reveals how, despite an appearance of 'business as usual', fear, anxiety, and suspicion permeate workplaces, even in cities that may not be at the top of any terrorist group's target list. Using the Australian city of Melbourne, a cosmopolitan city and major business centre with nearly four million people, as a metaphor for other such cities around the world, Dr Howie's research has uncovered that even where they don't perceive a high level threat, business managers who might face having to account for themselves to some post event Inquiry have taken action in consequence of the situation. Often, that action amounts to the introduction of what can be described as 'Simulated Security'. This cannot ever provide certain protection from terrorist attack, but it may be the best we can reasonably do. There is also evidence that it can be effective in terms of providing the reassurance to counter the terrorist objective of disrupting normal life through fear. With its rigorous research compared with other more speculative works on this subject, *Terrorism, the Worker and the City* will appeal to city and business leaders and managers, and security professionals, as well as those in governmental and academic research communities, for all of whom terrorism is now an ever present concern.

A Companion to the War Film Purdue University Press

In September 2001, the world witnessed the horrific events of 9/11. A great deal has happened on the counterterrorist front in the 20 years since. While the terrorist threat has greatly diminished in Northern Ireland, the events of 9/11 and their aftermath have ushered in a new phase for the rest of

the UK with some familiar, but also many novel, characteristics. This ambitious study takes stock of counterterrorism in Britain in this anniversary year. Assessing current challenges, and closely mirroring the 'four Ps' of the official CONTEST counterterrorist strategy - Protect, Prepare, Prevent, and Pursue - it seeks to summarize and grasp the essence of domestic law and policy, without being burdened by excessive technical detail. It also provides a rigorous, context-aware, illuminating, yet concise, accessible, and policy-relevant analysis of this important and controversial subject, grounded in relevant social science, policy studies, and legal scholarship. This book will be an important resource for students and scholars in law and social science, as well as human rights, terrorism, counterterrorism, security, and conflict studies.

Launching a propulsive middle grade nonfiction series, a young woman shares her harrowing experience of being wrongly accused of terrorism. Adama Bah grew up in East Harlem after immigrating from Conakry, Guinea, and was deeply connected to her community and the people who lived there. But as a thirteen-year-old after the events of September 11, 2001, she began experiencing discrimination and dehumanization as prejudice toward Muslim people grew. Then, on March 24, 2005, FBI agents arrested Adama and her father. Falsely accused of being a potential suicide bomber, Adama spent weeks in a detention center being questioned under suspicion of terrorism. With sharp and engaging writing, Adama recounts the events surrounding her arrest and its impact on her life—the harassment, humiliation, and persecution she faced for crimes she didn't commit. Accused brings forward a crucial and unparalleled first-person perspective of American culture post-9/11 and the country's discrimination against Muslim Americans, and heralds the start of a new series of compelling narrative nonfiction by young people, for young people.

A Companion to the War Film contains 27 original essays that examine all aspects of the genre, from the traditional war film, to the new global nature of conflicts, to the diverse formats war stories assume in today's digital culture. It includes new work from experienced and emerging scholars that expands the scope of the genre by applying fresh theoretical approaches and archival resources to the study of war films. The essays discuss "the combat film" but then also move beyond those limited confines to cover home-front films, international and foreign-language films, and the uses of alternative media—including Internet videos, military recruitment ads, government-produced films, and TV programs—across a range of conflicts, nations, and time periods. The essays address complex questions of gender, race, forced internment, international terrorism, and war protest in films such as *American Sniper*, *Good Kill*, *Grace is Gone*, *Gran Torino*, *The Messenger*, *Snow Falling on Cedars*, *So Proudly We Hail*, *Tae Guk Gi: The Brotherhood of War*, *Tender Comrade*, and *Zero Dark Thirty*. Taken together, these essays provide a nuanced vision of war film that brings the genre firmly into the 21st century and points the way for exciting future scholarship.

It has, improbably, been called uncommonly lucid, even riveting by *The New York Times*, and it was a finalist for the 2004 National Book Awards nonfiction honor. It is a literally chilling read, especially in its minute-by-minute description of the events of the morning of 9/11 inside the Twin Towers. It is *The 9/11 Commission Report*, which was, before its publication, perhaps one of the most anticipated government reports of all time, and has been since an unlikely bestseller. The official statement by the National Commission on Terrorist Attacks Upon the United States—which was instituted in late 2002 and chaired by former New Jersey Governor Thomas Kean—it details what went wrong on that day (such as intelligence failures), what went right (the heroic response of emergency services and self-organizing civilians), and how to avert similar future attacks. Highlighting evidence from the day, from airport surveillance footage of the terrorists to phone calls from the doomed flights, and offering details that have otherwise gone unheard, this is an astonishing firsthand document of contemporary history. While controversial in parts—it has been criticized for failing to include testimony from key individuals, and it completely omits any mention of the mysterious collapse of WTC 7—it is nevertheless an essential record of one of the most transformational events of modern times.

The threat of terrorism and the increasing power of terrorist groups has prompted a rapid growth of the security services and changes in legislation, permitting the collection of communications data. This provides journalism with acute dilemmas. The media claims responsibility for holding power to account, yet cannot know more than superficial details about the newly empowered secret services. This book is the first to analyze, in the aftermath of the Snowden/NSA revelations, relations between two key institutions in the modern state: the intelligence services and the news media. It provides the answers to crucial questions including: how can power be held to account if one of the greatest state powers is secret? How far have the Snowden/NSA revelations damaged the activities of the secret services? And have governments lost all trust from journalists and the public?

Violent Extremism: Breakthroughs in Research and Practice Univ of South Carolina Press

The number of natural and man-made disasters has risen dramatically over the last decade. Natural disasters, industrial accidents and terrorist attacks represent major incidents, often involving multiple casualties. In such cases, health professionals face multiple challenges because the type of medical care required differs from what is taught and provided in their everyday hospital duties. The aim of this book is to inform and prepare healthcare professionals for the challenges posed by major incidents, so that they can act effectively in medical teams sent on humanitarian missions or into conflict zones. It offers a holistic and horizontal approach covering all stages of the disaster management cycle. The book is divided into 5 sections: section 1: prehospital emergency services; section ii: hospital response; section iii: management of incidents; section iv: after the disaster; and section v: evaluation, ethical issues, education and research. Healthcare providers will find essential information on the special medical considerations in both prehospital and hospital disaster settings, medical management of disaster response, recovery, mitigation and preparedness. The book offers an interdisciplinary and interprofessional approach, and was written by prominent researchers and experienced practitioners.

Re-Visioning Terrorism: A Humanistic Perspective is an interdisciplinary collection of essays that

aims to offer a plurality of visions on terrorism, expanding its meaning across time and space and raising new questions that explore its multifaceted occurrences. The different ideological, philosophical, and cultural perspectives emerging from the essays and the variety of humanistic disciplines involved intend to provide a complex and even contradictory picture that emphasizes the fact that there cannot be a univocal conception and response to terrorism, in either the practical or the intellectual domain. The editors borrow the concept of rack focus response from cinema to create an innovative and flexible interpretative approach to terrorism. Rack focus refers to the change of focus of a lens so that one image can come into focus while another moves out of focus. Though the focal distance changes, the reality has not changed. Both items and events coexist, but given the nature of optics we can only see clearly one or the other. This occurs not just with lenses, but also with human perceptions, be they emotional or intellectual. The rack focus response requires that we try to shift focus from the depth of field that is absolutely clear and familiar to the "other" that is unclear and unfamiliar. This exercise will lead us to reflect on terroristic events in a more nuanced, nondogmatic, and flexible manner. The essays featured in this volume range from philosophical interpretations of terrorism, to historical analysis of terror through the ages, to cinematic, artistic, and narrative representations of terroristic events that are not limited to 9/11.
