The color photographs and illustrations appearing in select monographs over the past decade represent a significant advance in surgical communication. Previously, black and white renderings were standard because color printing had not been perfected and its cost was prohibitive. We believe the gradual change from black and white etchings and reproductions to detailed color illustrations represents a tremendous twentieth century achievement. In our own urologic practices it became evident that the use of black and white sketches for teaching operative urology, while helpful, left too much to the surgeon's imagination. Even the dimension of depth, produced by varying the intensity of shading, often was inadequate in demonstrating subtle surgical details in a fossa or bed. Since color photography recently has been used to demonstrate operative techniques, we climbed on the bandwagon and photographed in color many of the major operative procedures. However, the reflection of light caused by normal tissue fluid significantly reduces the clarity of photographs. Not infrequently, the crucial operative step is obscured by light reflected on a trickle of blood. Even when meticulous care is taken to irrigate and clean the surgical field, the tissue sheen obscures portions of the field. Color paintings by a gifted artist are not only unique, but can be extraordinary; the vividness with which subtleties can thus be portrayed cannot be matched by photography, black and white or color.

The Rijksmuseum presents the first exhibition devoted to Hendrick Avercamp, the foremost painter of Dutch winter landscapes in the 17th century. Avercamp was the first Dutch artist to specialise in paintings of winter landscapes featuring people enjoying the ice. Some 400 years on, our image of life in the harsh winters of the Golden Age is still dominated by Avercamp's ice scenes with their splendid narrative details of couples skating, children pelting each other with snowballs and unwary individuals falling through the ice. In addition to twenty of his finest paintings, the exhibition features twenty-five of his best drawings from museums and private collections throughout the world.

Mutual Fund Industry Handbook Lippincott Williams & Wilkins
Raymond Williams's work was always concerned with the relation between culture and society. This book focuses on specific texts and authors, exploring the historical and cultural sources of their

particular forms of writing. In it, Williams examines dramatic form and language in Racine and Shakespeare; the politics of fiction in the English Jacobin novel; David Hume and Charles Dickens and the changing characteristics of English prose; Robert Tressell, *The Ragged-Trousered Philanthropists*, and the role of region and class in the English novel. Also included are Williams's reflections on the rise of English studies, on their crisis as the literary traditions of Cambridge University were beset by the 'structuralist controversy', and on the wider implications of this redefinition of the critical field.
