How Judaism and food are intertwined Judaism is a religion that is enthusiastic about food. Jewish holidays are inevitably celebrated through eating particular foods, or around fasting and then eating particular foods. Through fasting, feasting, dining, and noshing, food infuses the rich traditions of Judaism into daily life. What do the complicated laws of kosher food mean to Jews? How does food in Jewish bellies shape the hearts and minds of Jews? What does the Jewish relationship with food teach us about Christianity, Islam, and religion itself? Can food shape the future of Judaism? Feasting and Fasting explores questions like these to offer an expansive look at how Judaism and food have been intertwined, both historically and today. It also grapples with the charged ethical debates about how food choices reflect competing Jewish values about community, animals, the natural world and the very meaning of being human. Encompassing historical, ethnographic, and theoretical viewpoints, and including contributions dedicated to the religious dimensions of foods including garlic, Crisco, peanut oil, and wine, the volume advances the state of both Jewish studies and religious studies scholarship on food.

Bookended with a foreword by the Jewish historian Hasia Diner and an epilogue by the novelist and food activist Jonathan Safran Foer, Feasting and Fasting provides a resource for anyone who hungers to understand how food and religion intersect.

"Mantle and Lichty have assembled a guide that will help you hire, motivate, and mentor a software development team that functions at the highest level. Their rules of thumb and coaching advice are great blueprints for new and experienced software engineering managers alike." —Tom Conrad, CTO, Pandora "I wish I'd had this material available years ago. I see lots and lots of 'meat' in here that I'll use over and over again as I try to become a better manager. The writing style is right on, and I love the personal anecdotes." —Steve Johnson, VP, Custom Solutions, DigitalFish All too often, software development is deemed unmanageable. The news is filled with stories of projects that have run catastrophically over schedule and budget. Although adding some formal discipline to the development process has

improved the situation, it has by no means solved the problem. How can it be, with so much time and money spent to get software development under control, that it remains so unmanageable? In *Managing the Unmanageable: Rules, Tools, and Insights for Managing Software People and Teams*, Mickey W. Mantle and Ron Lichty answer that persistent question with a simple observation: You first must make programmers and software teams manageable. That is, you need to begin by understanding your people—how to hire them, motivate them, and lead them to develop and deliver great products. Drawing on their combined seventy years of software development and management experience, and highlighting the insights and wisdom of other successful managers, Mantle and Lichty provide the guidance you need to manage people and teams in order to deliver software successfully. Whether you are new to software management, or have already been working in that role, you will appreciate the real-world knowledge and practical tools packed into this guide.

A dystopian space opera that straddles the threads of compassion, perseverance and humanity. Three arks. Two worlds. One chance at survival. On an Earth with a dying Sun, there are two kinds of people. The Chosen. And the left behind. We thought it was over. We thought we had lost. A burnt out star left us without enough warmth to thrive, our days as a species were numbered. But then, then a miracle happened. We received a transmission from an alien civilization that scanned our Sun and knew we needed help. So they threw us a life raft in the form of designs for Space Arks, we built 3. Interstellar capable, with pre-

programmed coordinates to bring us to their home world, a place we were told could be called home. 100,000 humans per Ark, chosen to represent the best in us, a last ditch effort to save humanity. Do I trust these aliens? hell no. but what choice do we have? Paulson's the name, Caleb Paulson, you can think of me as the architect of this mission. We're heading to this alien system with no idea what lies ahead. As for the billions who were not so fortunate? The ones who did not receive an invitation aboard the arks? We left them to shepherd a lawless and desperate earth, poor bastards. This stable of arks is humanity's last chance to endure.
