Colloquial Ukrainian (eBook And MP3 Pack) John Wiley & Sons

This book investigates the origins and transformations of medieval image culture and its reflections in theology, hagiography, historiography and art. It deals with a remarkable phenomenon: the fact that, after a period of 500 years of absence, the tenth century sees a revival of monumental sculpture in the Latin West. Since the end of Antiquity and the pagan use of free-standing, life-size sculptures in public and private ritual, Christians were obedient to the Second Commandment forbidding the making and use of graven images. Contrary to the West, in Byzantium, such a revival never occurred: only relief sculpture - mostly integrated within an architectural context - was used. However, Eastern theologians are the authors of highly fascinating and outstanding original theoretical reflections about the nature and efficacy of images. How can this difference be explained? Why do we find the most fascinating theoretical concepts of images in a culture that sticks to two-dimensional icons often venerated as cult-images that are copied and repeated, but only randomly varied? And why does a groundbreaking change in the culture of images - the revival of monumental sculpture - happen in a context that provides more restrained theoretical reflections upon images in their immediate theological, liturgical and artistic contexts? These are some of the questions that this book seeks to answer. The analysis and contextualization of the revival of monumental sculpture includes reflections on liturgy, architecture, materiality of minor arts and reliquaries, medieval theories of perception, and gift exchange and its impact upon practices of image veneration, aesthetics and political participation. Drawing on the historical investigation of specific objects and texts between the ninth and the eleventh century, the book outlines an occidental history of image culture, visibility and fiction, claiming that only images possess modes of visualizing what in the discourse of medieval theology can never be addressed and revealed.

"In the nineteenth century a new type of mystic emerged in Catholic Europe. While cases of stigmatisation had been reported since the thirteenth century, this era witnessed the development of the 'stigmatic': young women who attracted widespread interest thanks to the appearance of physical stigmata. To understand the popularity of these stigmatics we need to regard them as the 'saints' and religious 'celebrities' of their time. With their 'miraculous' bodies, they fit contemporary popular ideas (if not necessarily those of the Church) of what sanctity was. As knowledge about them spread via modern media and their fame became marketable, they developed into religious 'celebrities'"--

In the past decades, the discussion about theoretical approaches to the topic of 'landscape' has increased. This book presents the currently discussed theoretical approaches to landscape and shows its potentials and limits. The theoretical approaches are discussed on the basis of current questions, such as socialisation and the hybridisation of landscape, and combined with empirical results. This is followed by a discussion of the landscape policy operationalisation of theoretical considerations and empirical findings.

Uwe Timm was born in Germany in 1940. Just three years later his brother, Karl-Heinz, who was sixteen years his senior and a sapper in the elite SS Death's Head Division, was killed. His notebook was returned to the family, and the last entry read- 'I close my diary here because I don't see any point in recording the cruel things that sometimes happen.' When Timm decided to write this astonishing memoir, he feared the possibility that his brother's unit had taken part in the shooting of civilians and Jews. Yet he wanted to piece together his brother's experience, and also that of his nation, which once considered the qualities of an SS man so exemplary. As Timm unleashes his memories of this devastating time, he also pinpoints the questions that his parents' generation seemed unable to face, and offers new insights into the impact of the war on ordinary Germans.

Newly adapted for the Anglophone reader, this is an excellent translation of Hans-Thies Lehmann's groundbreaking study of the new theatre forms that have developed since the late 1960s, which has become a key reference point in international

discussions of contemporary theatre. In looking at the developments since the late 1960s, Lehmann considers them in relation to dramatic theory and theatre history, as an inventive response to the emergence of new technologies, and as an historical shift from a text-based culture to a new media age of image and sound. Engaging with theoreticians of 'drama' from Aristotle and Brecht, to Barthes and Schechner, the book analyzes the work of recent experimental theatre practitioners such as Robert Wilson, Tadeusz Kantor, Heiner Müller, the Wooster Group, Needcompany and Societas Raffaello Sanzio. Illustrated by a wealth of practical examples, and with an introduction by Karen Jürs-Munby providing useful theoretical and artistic contexts for the book, Postdramatic Theatre is an historical survey expertly combined with a unique theoretical approach which guides the reader through this new theatre landscape.

Teaching Translation CSIRO PUBLISHING

Over the past half century, translation studies has emerged decisively as an academic field around the world, and in recent years the number of academic institutions offering instruction in translation has risen along with an increased demand for translators, interpreters and translator trainers. Teaching Translation is the most comprehensive and theoretically informed overview of current translation teaching. Contributions from leading figures in translation studies are preceded by a substantial introduction by Lawrence Venuti, in which he presents a view of translation as the ultimate humanistic task - an interpretive act that varies the form, meaning, and effect of the source text. 26 incisive chapters are divided into four parts, covering: certificate and degree programs teaching translation practices studying translation theory, history, and practice surveys of translation pedagogies and key textbooks The chapters describe long-standing programs and courses in the US, Canada, the UK, and Spain, and each one presents an exemplary model for teaching that can be replicated or adapted in other institutions. Each contributor responds to fundamental questions at the core of any translation course - for example, how is translation defined? What qualifies students for admission to the course? What impact does the institutional site have upon the course or pedagogy? Teaching Translation will be relevant for all those working and teaching in the areas of translation and translation studies. Additional resources for Translation and Interpreting Studies are available on the Routledge Translation Studies Portal.
