Michio Kaku, the New York Times bestselling author of *Physics of the Impossible* and *Physics of the Future* tackles the most fascinating and complex object in the known universe: the human brain. *The Future of the Mind* brings a topic that once belonged solely to the province of science fiction into a startling new reality. This scientific tour de force unveils the astonishing research being done in top laboratories around the world—all based on the latest advancements in neuroscience and physics—including recent experiments in telepathy, mind control, avatars, telekinesis, and recording memories and dreams. *The Future of the Mind* is an extraordinary, mind-boggling exploration of the frontiers of neuroscience. Dr. Kaku looks toward the day when we may achieve the ability to upload the human brain to a computer, neuron for neuron; project thoughts and emotions around the world on a brain-net; take a "smart pill" to enhance cognition; send our consciousness across the universe; and push the very limits of immortality.

The "spirit of sonship" is an apostolic grace which brings about the spiritual maturity of the believer, the revival of apostolic Christianity, and ultimately, the maturity of the church in preparation for the coming of Christ. This important book reveals that the values and heart attitudes of what we may call the spirit of sonship is the very nature and essence of authentic apostolic New Testament Christianity. You will discover a fresh approach to understanding and walking in grace, through relationships. The subject is huge, and wonderful; the whole of the Scriptures and all of salvation history must now be seen in the light of sonship and its implications.

For the Burroughs enthusiast and the neophyte, this volume—that contains final-draft typescripts, numerous unpublished contemporaneous writings by Burroughs, his own later introductions to the book, and his essay on psychoactive drugs—is a valuable and fresh experience of a novel that has lost none of its relevance or satirical bite.
