Curious George Plants a Seed; Jorge El Curioso Siembra Una Semilla Turtleback Books

People can visit a market to buy food, and animals look for food in the environment where they live. Plants, however, can't move around. So how do

they obtain the nourishment they need to live and grow? This book takes readers step-by-step through a clear, grade-appropriate explanation of the process of photosynthesis. Children will learn how plants gather water and carbon dioxide and use sunlight to "cook" them up inside their leaves. Along the way, the book also explains how plants make the oxygen that people and animals need in order to breathe, and how we rely on plants as an essential food. Filled with information perfectly suited to the abilities and interests of an early elementary audience, *Cooking with Sunshine: How Plants Make Food* gives readers a chance not only to learn, but also to develop their powers of observation and critical thinking. Beautiful photographs, vivid

diagrams, and high-interest facts make this book a lively, engaging experience. Pumpkin Seed to Pie Houghton Mifflin Harcourt
