Learn to communicate with your dog—using their language “Good reading for dog lovers and an immensely useful manual for dog owners.”—The Washington

Post An Applied Animal Behaviorist and dog trainer with more than twenty years' experience, Dr. Patricia McConnell reveals a revolutionary new perspective on our relationship with dogs—sharing insights on how “man’s best friend” might interpret our behavior, as well as essential advice on how to interact with our four-legged friends in ways that bring out the best in them. After all, humans and dogs are two entirely different species, each shaped by its individual evolutionary heritage. Quite simply, humans are primates and dogs are canids (as are wolves, coyotes, and foxes). Since we each speak a different native tongue, a lot gets lost in the translation. This marvelous guide demonstrates how even the slightest changes in our voices and in the ways we stand can help dogs understand what we want. Inside you will discover: • How you can get your dog to come when called by acting less like a primate and more like a dog • Why the advice to “get dominance” over your dog can cause problems • Why “rough and tumble primate play” can lead to trouble—and how to play with your dog in ways that are fun and keep him out of mischief • How dogs and humans share

personality types—and why most dogs want to live with benevolent leaders rather than “alpha wanna-bes!” Fascinating, insightful, and compelling, *The Other End of the Leash* is a book that strives to help you connect with your dog in a completely new way—so as to enrich that most rewarding of relationships.

Most dog trainers have a strong desire to help dogs learn appropriate behaviors and solve the kinds of problems that most dogs experience or create. It is why they get into the business in the first place and it is what they are trained to do. What is challenging for so many trainers is that their success in working with dogs ultimately depends on the cooperation, understanding and follow-through of the people who bring their dogs to them to be trained. Failure to work with people often leads to failure with the dogs. In *The Human Half of Dog Training*, author Risë VanFleet draws upon her years of experience of working with people as a child and family psychologist to teach dog trainers how take a collaborative approach with clients to help insure the best possible outcomes for their dogs.
