During the last few years, interest in research on the progression of chronic renal diseases has grown to the extent that this field is now in the mainstream of investigative nephrology. This interdisciplinary volume brings together the latest data from institutes at the forefront of current research. The contents cover a diverse range of topics including apoptosis in renal modeling and remodeling, the role of cytokines, growth factors and macrophages, the metabolism of interstitial collagen and collagenous materials, diabetic nephropathy, and vasoactive substances in renal injury. The use of methodology from morphometry to DNA recombinant technology illustrates the wide range of experimental approaches being adopted. Stimulating and up-to-date, this book is essential reading for nephrologists, biochemists, molecular biologists and all investigators interested in the mechanisms of renal disease progression.

Unifying Electrical Engineering and Electronics Engineering is based on the Proceedings of the 2012 International Conference on Electrical and Electronics Engineering (ICEE 2012). This book collects the peer reviewed papers presented at the conference. The aim of the conference is to unify the two areas of Electrical and Electronics Engineering. The book examines trends and techniques in the field as well as theories and applications. The editors have chosen to include the following topics; biotechnology, power engineering, superconductivity circuits, antennas technology, system architectures and telecommunication.

This New York Times bestselling author delivers a "page-turning romance" (Nora Roberts) about a city girl on the run and the strong, protective cowboy who keeps her safe. Brand Merrick is a take-charge cowboy who considers relax a four-letter word. So when an injury lands him six weeks of physical therapy, he intends to keep right on working-until his grandmother hires a therapist to stay at their family ranch. He's not used to following orders, or slowing down, but Avery Grant has a way of getting him to do things he'd never thought he'd do . . . Avery hates to admit it, but this super sexy rancher is testing her patience...and her professionalism. She's a born-and-bred city girl, yet

she finds herself drawn to the rugged wilderness and the equally rugged cowboy she's here to help. But when a threat from her past follows Avery to Montana, it's Brand who rides to the rescue-if only she'll put her trust in him, and the growing feelings in her heart. Includes the bonus novel *Cowboy Rebel* by New York Times bestselling author Carolyn Brown!

#4 in the O.C.L.T. Series There are incidents and emergencies in the world that defy logical explanation, events that could be defined as supernatural, extraterrestrial, or simply otherworldly. Standard laws do not allow for such instances, nor are most officials or authorities trained to handle them. In recognition of these facts, an organization has been created that can. Assembled by a loose international coalition, their mission is to deal with these situations using diplomacy, guile, force, and strategy as necessary. They shield the rest of the world from their own actions, and clean up the messes left in their wake. They are our protection, our guide, our sword, and our voice, all rolled into one. They are O.C.L.T. R.C. Hayes has settled into his job with the FBI, and put behind him the strange incident that ended his military career. But when he and his partner are sent to the Flathead Indian Reservation in Montana to look into a murder, events take an unsettling and eerily familiar turn. R.C. struggles to solve the case as deaths pile up around him and as the situation takes a decidedly unnatural cast. With the help of a mysterious new ally, he may finally come to terms with what happened to him long ago—and enter a strange new career he is uniquely suited for. Provided he can survive the incursion of supernatural elements into his supposedly safe and mundane world. This is the second full-length novel in the O.C.L.T. series. It joins the novellas "Brought to Light" by Aaron Rosenberg and "The Temple of Camazotz" by David Niall Wilson, and the novel "The Parting," also by David Niall Wilson, in setting the stage for further adventures. Each of these works introduces another facet of the O.C.L.T. team; "Incursion" draws the loose ends together, establishes a base, and determines leadership for the fledgling agency.

When Love Walks Through the Door . . . Like all MacKenzie men, Whit respects three things: hard work, his family, and the wild beauty of the Montana land he calls home. The solitude of the high country is a welcome respite to a loner like Whit. So when a powerful spring snowstorm hits as he's tending the herd, Whit heads to one of the family's isolated cabins. The cold winds don't trouble him. The gorgeous mystery woman waiting inside does. All Cara Walton wanted was a chance to clear her head. And the forgotten cabin on the outskirts of the MacKenzie ranch seemed like the perfect place

to do just that-until Whit arrives. The rugged cowboy quickly melts Cara's defenses and she's powerless to resist his strong arms or his tender touch. She desperately wants to trust him, but there's so much Whit doesn't know, so much she hasn't told him. She lost everything once-can she find the courage to risk her heart again?

A woman on the run must trust her family's sworn enemy in this thrilling tale by one of the best in cowboy romance. The cowboy she can't have . . . is the one she can't resist. Annie Dempsey has two rules for her new life in Devil's Door, Wyoming: no romance and no drama. Fresh off a bad breakup, she's already avoiding love. And as long as she steers clear of the Merrick clan—her family's sworn enemies—avoiding drama won't be a problem. But when a charming stranger steps in to protect Annie from a sudden threat, both her rules fly out the door. Because Annie's mystery hero . . . is a Merrick. Jonah Merrick won't allow anyone—even a Dempsey—to be harmed on his watch. It doesn't hurt that sweet, gorgeous Annie makes his heart beat like never before. Against his family's objections, Jonah insists Annie hide out with him at his ranch while they try to outwit a dangerous pursuer. But as the days turn into weeks, Jonah realizes he'll stop anyone who tries to harm Annie . . . or the loving future they're building together.

Biorefineries compiles the basic science and technologies used to convert terrestrial and aquatic biomass into essential molecular compounds and polymeric materials. The book provides in depth insights into this fairly recent concept of industrial chemistry that aims to achieve optimal economic profits while minimizing the environmental impact. Chapters written by renowned experts cover, amongst others, the application of catalysis, downstream processing, biomass sourced olefins, lignin biorefinery techniques and biogas. The authors thoroughly examine and explain the value chain for biomass conversion into platform molecules and their transformation into final products. A comprehensive thematic overview on the topic giving beginners access to fundamental concepts is presented. Supplemented by numerous full color figures and tables, the contents impart knowledge about the involved techniques. Advanced students and experts in the field will find the summary of state-of-the-art research and current literature of valuable interest. Explores the enormous potential of biomass conversion as a future source for fuels and chemicals Focuses on both general scientific background and current innovations in the field of biorefinery Targets students and researchers in Chemistry, Chemical Engineering, Biotechnology, and Materials Science About the Editors Prof. Michele Aresta, Chair of the Scientific Committee of CIRCC in Italy and holds the IMM Chair at the Department of Chemical and Biomolecular Engineering at NUS, Singapore. He is author of over 200 papers and Author or Editor of nine books. Prof. Angela Dibenedetto, Associate Professor at the Department of Chemistry of the University of Bari (Italy) focused on carbon dioxide utilization by applying biorefinery concepts; and Director of the Interuniversity Consortium on Chemical Reactivity and Catalysis-CIRCC. This book highlights novel materials for dye-containing wastewater treatment and presents an up-to-date information on dye degradation/adsorption using new promising materials such as nanocomposites. Development of various industrial sectors, including textile, food, paper, leather, rubber, cosmetic and printing has led to generation of wastewater which contain dye molecules as well as other inorganic and organic compounds. Considering serious health hazards and environmental damage associated with dyes in the environment, researchers and professionals have been attempting to find the most effective methods of treatment. Of late, various composites have received wide attention due to their outstanding properties in wastewater treatment, that are presented in this book.

Lipids play an essential role in cell signaling and subcellular structure. Systematic analysis of the total lipid structure of a cell or organism, the lipodome, can reveal novel avenues of therapeutic intervention and diagnosis. This analysis is best modeled after the lessons learned from proteomics. With contributions from pioneering researchers from the US, Europe, Canada, Japan, and China, Functional Lipidomics introduces lipidomics, explores the current state of the field, and provides a comprehensive background for future groundbreaking work in this burgeoning field. The first book dedicated to the topic, Functional Lipidomics first defines and introduces the field before delving deeply into the methods, processes, analyses, and research aspects. The book uncovers the biosynthesis, metabolism, and function of fatty acids, acylglycerols, glycerophospholipids, sphingolipids, terpenes, and lipids that complex with proteins. Taking both academic and industrial perspectives, the contributors elaborate upon cutting-edge approaches to lipid analysis, diagnostic approaches using lipid and lipid-binding protein patterns, and the therapeutic significance of targeting proteins involved with the lipid signaling pathway. Functional Lipidomics elucidates state-of-the-art strategies and techniques that enable us to understand biochemical patterns related to disease states, develop new targets for drug design, and identify important markers of a developmental stage, pathological condition, or disease treatment.

This New York Times bestselling author delivers a "page-turning romance" (Nora Roberts) about a woman in jeopardy who finds protection--and love--in the arms of a small-town cowboy. After running wild in his youth, Finn Monroe is now on the other side of the law as the local attorney. Between his practice and working at his family's ranch, his days aren't as exciting as they used to be--until Jessica Blair steps into his office. Gorgeous and determined, Jessie has a hunch her aunt is in trouble, and Finn is her last hope. As someone who relies on facts rather than feelings, Finn is skeptical. But it can't hurt to do a little digging. Jessie knows her aunt, and there is no way she would disappear on an "extended honeymoon" after hastily marrying a smooth-talking cowboy. Something is wrong, and Jessie is going to find out what. As soon as she and Finn start poking around, it becomes clear someone is willing to go to great lengths to keep them from the truth. But as the danger grows, so does their attraction. With both their lives on the line, Finn will discover just how far he'll go to keep Jessie safe. Includes Cowboy to the Rescue, a bonus novella by A.J. Pine!

A new beginning . . . A fresh start. That's exactly what Ally Shaw needs and what she's found in Glacier Ridge, Montana. Creating a simpler life with her young son and reconnecting with her only remaining family-it's all part of Ally's plan to chase away the pain of her past. But when a dangerously irresistible cowboy rescues her little boy, Ally can't deny she's excited about what else the future might bring. Reed Malloy was a wild horse who wouldn't be broken. Devoted to his work on the land at the expense of everything else, he'd never met a woman who could hold his interest . . . until Ally. And now, beautiful Ally and her fearless, freckled child have this cowboy wanting more. This isn't Ally's first time at the rodeo, though, and convincing her to trust him isn't easy. But there isn't anything he won't do to keep her safe . . . and make her his.

Clinics Collections: Chronic Obstructive Pulmonary Disease is the most current, comprehensive, and complete resource on the clinical management of COPD and related conditions. Clinics Collections: Chronic Obstructive Pulmonary Disease draws from Elsevier's robust Clinics Review Articles database to provide multidisciplinary teams, including general practitioners, pulmonologists, sleep specialists, radiologists, and critical care nurses, with practical clinical advice and insights on this highly prevalent condition and its comorbidities. Clinics Collections: Chronic Obstructive Pulmonary Disease guides readers on how to apply current primary research findings on COPD to everyday practice to help overcome challenges and complications, keep up with new and improved treatment methods, and improve patient outcomes. Areas of focus include pathogenesis, COPD and secondary disorders, clinical considerations and complications, treatment and pharmacotherapy, and special considerations. Each article begins with keywords and key points for immediate access to the most critical information. Articles are presented in an easy-to-digest and concisely worded format. Elsevier's Clinics Collections provide concise reviews of today's most prevalent conditions and significant medical developments. Other Clinics Collections titles available include Type II Diabetes Mellitus, Asthma, Obesity, Pain Management, and Lipid Disorders.

ADDITIVE MANUFACTURING With NOVEL MATERIALS The book explores practically the latest advancements and techniques in 3D and 4D printing using innovative and unconventional materials. This book comprehensively provides insights into various additive manufacturing processes, novel materials, and their properties, as well as the basic knowledge of AM process parameters, post-processing techniques, and their applications. It also explores the fundamental concepts and recent

advancements in the development of novel materials for several applications, with special emphasis on platforms like AM techniques for polymers, ceramics, metallic materials, composites, nanomaterials, hydrogels, etc. Specific topics like environmental aspects of 3D printing and advanced 4D printing are also introduced. The technological aspects of AM are discussed in a concise and understandable way, with extensive illustrations. Also covered are the challenges and opportunities that arise from 3D printing with these materials. Audience The book will benefit researchers and industry engineers who work in additive manufacturing, mechanical engineering, 3D/4D printing, and materials science.

Bridge Maintenance, Safety, Management, Life-Cycle Sustainability and Innovations contains lectures and papers presented at the Tenth International Conference on Bridge Maintenance, Safety and Management (IABMAS 2020), held in Sapporo, Hokkaido, Japan, April 11-15, 2021. This volume consists of a book of extended abstracts and a USB card containing the full papers of 571 contributions presented at IABMAS 2020, including the T.Y. Lin Lecture, 9 Keynote Lectures, and 561 technical papers from 40 countries. The contributions presented at IABMAS 2020 deal with the state of the art as well as emerging concepts and innovative applications related to the main aspects of maintenance, safety, management, life-cycle sustainability and technological innovations of bridges. Major topics include: advanced bridge design, construction and maintenance approaches, safety, reliability and risk evaluation, life-cycle management, life-cycle sustainability, standardization, analytical models, bridge management systems, service life prediction, maintenance and management strategies, structural health monitoring, non-destructive testing and field testing,

safety, resilience, robustness and redundancy, durability enhancement, repair and rehabilitation, fatigue and corrosion, extreme loads, and application of information and computer technology and artificial intelligence for bridges, among others. This volume provides both an up-to-date overview of the field of bridge engineering and significant contributions to the process of making more rational decisions on maintenance, safety, management, life-cycle sustainability and technological innovations of bridges for the purpose of enhancing the welfare of society. The Editors hope that these Proceedings will serve as a valuable reference to all concerned with bridge structure and infrastructure systems, including engineers, researchers, academics and students from all areas of bridge engineering.

It's always easy to say what one should have or could have done to change the events in their life, but what happens when it's too late? When the damage is already done? Do I just give up? It's hard to see a way out when I am lost in a sea of pain and have to face the realization that a chain of bad choices put me in my present state. I've always believed I was a fighter, but somewhere along the line I forgot that, I gave up, I broke down. But here's the thing, I wanted to be better, I wanted another chance to do better. Don't you think I knew all along that Dylan was my light, my love? I did. But like I said love is twisted. When someone falls victim to their worst nightmare do you catch them when they fall or do you turn your back on them? I know I shouldn't question this, but Luc understood my inner turmoil. Two broken souls, our bond almost seemed unbreakable. Almost. I've met obstacle after obstacle. It's laughable that I thought the threat would end with Luc. The threat is real, the fear I feel when I look over my shoulder is all real. I'm Alexis White and I've learned from my mistakes, the question is: will I be brave enough to give away my heart forever?
