Motorbooks International In production for over 20 years, nearly every Chevrolet V-8 passenger sedan is powered by this engine. This comprehensive manual is packed with photos and detailed information. Popular Science DieCast X covers the

entire spectrum of automotive diecast from customizing to collecting. it takes an insider's look at the history behind popular diecast cars and trucks, as well as how each model has helped shape the automotive industry and motor sports *Popular Mechanics* Examines such classic stock cars as Richard Petty's 1960 Plymouth, Bill Elliott's 1978 Mercury, Davey Allison's 1987

Thunderbird, and Ernie Irvan's 1991 Chevrolet Lumina Dodge Dart and Plymouth Duster The 1973 oil crisis forced the American automotive industry into a period of dramatic change, marked by stiff foreign competition, tougher product regulations and suddenly altered consumer demand. With gas prices soaring and the economy in a veritable tailspin, muscle cars

and the massive "need-for-speed" engines of the late '60s were out, and fuel efficient compacts were in. By 1980, American manufacturers were churning out some of the most feature laden, yet smallest and most fuel efficient cars they had ever built. This exhaustive reference work details every model from each of the major American manufacturers from model years 1973

through 1980, including various "captive imports" (e.g. Dodge's Colt, built by Mitsubishi.) Within each model year, it reports on each manufacturer's significant news and details every model offered: its specifications, powertrain offerings, prices, standard features, major options, and production figures, among other facts. The work is heavily

illustrated with approximately 1,300 photographs.
