Nobody should have a monopoly of the truth in this universe. The censorship and suppression of challenging ideas against the tide of mainstream research, the blacklisting of scientists, for instance, is neither the best way to do and filter science, nor to promote progress in the human knowledge. The removal of good and novel ideas from the scientific stage is very detrimental to the pursuit of the truth. There are instances in which a mere unqualified belief can occasionally be converted into a generally accepted scientific theory through the screening action of refereed literature and meetings planned by the scientific organizing committees and through the distribution of funds controlled by "club opinions". It leads to unitary paradigms and unitary thinking not necessarily associated to the unique truth. This is the topic of this book: to critically analyze the problems of the official (and sometimes illicit) mechanisms under which current science (physics and astronomy in particular) is being administered and filtered today, along with the onerous consequences these mechanisms have on all of us. Apart from the editors, Juan Miguel Campanario, Brian Martin, Wolfgang Kundt, J. Marvin Herndon, Marian Apostol, Halton C. Arp, Tom Van Flandern, Andrei P. Kirilyuk, Dmitri Rabounski and Henry H. Bauer, all of them

professional researchers, reveal a pessimistic view of the miseries of the actual system, while a glimmer of hope remains in the "leitmotiv" claim towards the freedom in doing research and attaining an acceptable level of ethics in science.

An Introduction to Catholic Social Thought Teaching Resources

The current preoccupation with the role of women in the church obscures the more serious problem of the perennial absence of men. This provocative book argues that Western churches have become women's clubs, that the emasculation of Christianity is dangerous for the church and society, and that a masculine presence can and must be restored.After documenting the highly feminized state of Western Christianity, Dr. Podles identifies the masculine traits that once characterized the Christian life but are now commonly considered incompatible with it. He contends that though masculinity has been marginalized within Christianity, it cannot be expunged from human society. If detached from Christianity, it reappears as a substitute religion, with unwholesome and even horrific consequences. The church, too, is diminished by its emasculation. Dr. Podles concludes by considering how Christianity's virility might be restored.In the otherwise stale and overworked field of gender studies, The Church Impotent is the only book to confront the lopsidedly feminine cast of modern Christianity with a profound analysis of its historical and sociological roots.
