Story Structure

Architect Catapult

The beloved debut novel about an affluent Indian family forever changed by one fateful day in 1969, from the author of *The Ministry of Utmost Happiness*
 NEW YORK TIMES BESTSELLER • MAN BOOKER PRIZE WINNER
 Compared favorably to the works of Faulkner and Dickens, Arundhati Roy's modern classic is equal parts powerful family saga, forbidden love story, and piercing political drama. The seven-year-old twins Estha and Rahel see their world shaken irrevocably by the arrival of their beautiful young cousin, Sophie. It is an event that will lead to an illicit liaison and tragedies accidental and intentional, exposing

“big things [that] lurk unsaid” in a country drifting dangerously toward unrest. Lush, lyrical, and unnerving, *The God of Small Things* is an award-winning landmark that started for its author an esteemed career of fiction and political commentary that continues unabated.

The God of Small Things Little, Brown Books for Young Readers

An essential guide for teachers and parents that's destined to become a classic, *The Art of Teaching Children* is one of those rare and masterful books that not only defines a craft but offers a magical reading experience. After more than thirty years in the classroom, award-winning teacher Phillip Done decided that it was time to retire. But a teacher's job is never truly finished, and he set out to write the greatest lesson of his career: a book for educators and parents that would pass along everything he learned about working with kids. From the first-day-of-school jitters to the last

day's tears, Done writes about the teacher's craft, classrooms and curriculums, the challenges of the profession, and the reason all teachers do it—the children. Drawing upon decades of experience, Done shares time-tested tips and sage advice: Real learning is messy, not linear. Greeting kids in the morning as they enter the classroom is an important part of the school day. If a student is having trouble, look at what you can do differently before pointing the finger at the child. Ask yourself: Would I want to be a student in my class? When children watch you, they are learning how to be people, and one of the most important things we can do for our

students is to model the kind of people we would like them to be. Done tackles topics you won't find in any other teaching book, including Back to School Night nerves, teacher pride, the Sunday Blues, Pinterest envy, teacher guilt, and the things they never warn you about in "teacher school" but should, like how to survive recess duty, field trips, and lunch supervision. Done also addresses some of the most important issues schools face today: bullying, excessive screen time, the system's obsession with testing, teacher burnout, and the ever-increasing demands of meeting the diverse learning needs of students. But *The Art of Teaching Children* is

more than a guide to educating today's young learners. These pages are alive with inspiration, humor, and tales of humanity. Done welcomes us like visitors at Open House Night to the world of elementary school, where we witness lessons that go well and others that flop, periods that run smoothly and ones that go haywire when a bee flies into the room. We meet master teachers and new ones, librarians and lunch supervisors, principals and parents (some with too much time on their hands). We get to know kids who want to hold a ball and those who'd rather hold a marker, students with difficult home lives and children with disabilities, youngsters who need drawing out

and those who happily announce (in the middle of a math lesson) that they have a loose tooth. With great wit and wisdom, irresistible storytelling, and boundless compassion, *The Art of Teaching Children* is the new educator's bible for teachers, parents, and all who work with kids and care about their learning and success. *The Dreamweavers* Simon and Schuster *Storying Plants in Australian Children's and Young Adult Literature: Roots and Winged Seeds* explores cultural and historical aspects of the representation of plants in Australian children's and young adult literature, encompassing colonial, postcolonial, and Indigenous

perspectives. While plants tend to be backgrounded as of less narrative interest than animals and humans, this book, in conversation with the field of critical plant studies, approaches them as living beings worthy of attention. Australia is home to over 20,000 species of native plants - from pungent Eucalypts to twisting mangroves, from tiny orchids to spiky, silvery spinifex. Indigenous Australians have lived with, relied upon, and cultivated these plants for many thousands of years. When European explorers and colonists first invaded Australia, unfamiliar species of plants captured their imagination. Vulnerable to bushfires, climate change, and

introduced species, plants continue to occupy fraught but vital places in Australian ecologies, texts, and cultures. Discussing writers from Ambelin Kwaymullina and Aunty Joy Murphy to May Gibbs and Ethel Turner, and embracing transnational perspectives from Ukraine, Poland, and Aotearoa New Zealand, *Storying Plants* addresses the stories told about plants but also the stories that plants themselves tell, engaging with the wide-ranging significance of plants in Australian children's and Young Adult literature. *Video Games* Penguin Explores the work of twelve contemporary illustrators of children's books and discusses the techniques and

features of effective illustration across a variety of styles and media.

Soviet literature in general and Soviet children's literature in particular have often been labeled by Western and post-

Soviet Russian scholars and critics as propaganda. Below the surface, however, Soviet children's literature and culture allowed its creators greater experimental and creative freedom than did the socialist realist culture for adults. This volume explores the importance of children's culture, from literature to comics to theater to film, in the formation of Soviet social identity and in connection with broader Russian culture, history, and society.

Krys Malcolm Belc's visual memoir-in-essays explores how the experience of gestational parenthood—conceiving, birthing, and breastfeeding his son Samson—eventually clarified his gender identity. Krys Malcolm Belc has thought a lot about the interplay between parenthood and gender. As a nonbinary, transmasculine parent,

giving birth to his son Samson clarified his gender identity. And yet, when his partner, Anna, adopted Samson, the legal documents listed Belc as “the natural mother of the child.” By considering how the experiences contained under the umbrella of “motherhood” don't fully align with Belc's own experience, *The Natural Mother of the Child* journeys both toward and through common perceptions of what it means to have a body and how that body can influence the perception of a family. With this visual memoir in essays, Belc has created a new kind of life record, one that engages directly with the documentation often thought to constitute a record of one's life—childhood

photos, birth certificates—and addresses his deep ambivalence about the “before” and “after” so prevalent in trans stories, which feels apart from his own experience. The *Natural Mother of the Child* is the story of a

person moving past societal expectations to take control of his own narrative, with prose that delights in the intimate dailiness of family life and explores how much we can ever really know when we enter into parenting.
