Learn how to develop modern object-oriented applications with PHP using test-driven development (TDD) and behavior-driven development (BDD) aided by mature reusable components Key FeaturesCreate clean code based on components' reusability to create large-scale enterprise applicationsMake effective use of design patterns in an object-oriented softwareUnderstand the division of a PHP web application structure in layers to build customized websites and apps for various business needsBook Description Considered the next generation of the Zend framework, Laminas is a high-performance PHP framework for creating powerful web applications with an evolutive architecture. This book takes a hands-on approach to equip you with the knowledge of the Laminas framework necessary to start building web applications based on the reuse of loosely coupled components. You'll learn how to create the basic structure of a PHP web application divided into layers, understand Laminas' MVC components, and be able to take advantage of the Eclipse platform as a method for developing with Laminas. Step by step, you'll build an e-commerce application based on the technical requirements of a fictional business, and get to grips with implementing those requirements using Laminas components. By the end of this web development book, you'll be able to build a completely secured MVC application in PHP language

using Laminas. What you will learnDiscover how object-relational mapping is implemented with laminas-dbUnderstand behavior-driven development concepts to sharpen your skillsCreate lean controllers and flexible viewsBuild complete models and reusable componentsExplore the Eclipse platform for developing with LaminasFind out how easy it is to generate HTML forms with laminas-formPractice test-driven development to write precise programsWho this book is for This book is best suited for programming beginner or developers with some experience looking to create clean-coded object-oriented web applications. Knowledge of basic PHP syntax, specifically variables, control structures, and functions, will aid you in understanding the concepts covered. *Direct Support and General Support Maintenance Manual for Shelter System, Collective Protection, Chemical-biological, Inflatable, Trailer-transported, M51 (NSN 4240-00-854-4144)*.
