This title was first published in 2002: Perspectives on Civil Religion introduces the concept of civil religion, examines the use of the concept in recent scholarship and investigates examples of civil religion in the contemporary world. The book sets out to explore tensions and complexities in the relationship between the 'sacred' and the 'secular', and draws on two major case studies for in-depth illustration of key issues. It looks first at the development of rituals of remembrance from the American civil war, British and American responses to the two world wars and the controversial Vietnam Veterans Memorial in Washington. It then considers civil religion in the Italian city of Siena, especially in relation to the Palio of Siena and Siense devotion to the Virgin. The five textbooks and Reader that make up the Religion Today Open University/Ashgate series are: From Sacred Text to Internet; Religion and Social Transformations; Perspectives on Civil Religion; Global Religious Movements in Regional Context; Belief Beyond Boundaries; Religion Today: A Reader Religious Leadership Gracewing Publishing This book presents the first full-length study of the relationship between religion and the controversial concept of civil society. Across the world in the last two decades of the twentieth century religions re-entered public space as influential discursive and symbolic systems apparently beyond the control of either traditional religious authorising institutions or states. This differentiation of religion from traditional institutions and entry into secular public spheres carries both dangers and possible benefits for democracy. Offering a fresh interdisciplinary approach to understanding religion in contemporary societies, this book provides an invaluable resource for students and researchers in religious studies, sociology, politics and political philosophy, theology,

international relations and legal studies. Part one presents a critical introduction to the interaction between religion, modernization and postmodernization in Western and non-Western settings (America, Europe, the Middle East and India), focussing on discourses of human rights, civil society and the public sphere, and the controversial question of their cross-cultural application. Part two examines religion and civil society through case studies of Egypt, Bosnia and Muslim minorities in Britain, and compares Poland as an example of a Christian majority society that has experienced the public reassertion of religion.

The topic covered by this book is important (crucially so in post-apartheid South Africa) and the research is meticulous. This has resulted in an impressive collection of material concerning welfare, religion and gender in twenty-first century South Africa, which includes both theoretical reflections and an abundance of empirical data. - Professor Grace Davie (Professor Emerita of Sociology, University of Exeter, UK) *Cultural Heritage and Its Educational Implications* Taylor & Francis Understanding the place of religion in Early Childhood Education and Care is of critical importance for the development of cultural literacy and plays a key role in societal coherence and inclusion. This international handbook provides a comprehensive overview of the place of religion in the societal educational arenas of the very youngest children across the globe. Drawing together contributions from leading international experts across disciplinary backgrounds, it offers a critical view of how to approach the complexities around the place of religion in Early Childhood Education and Care. Through its four parts, the book examines the theoretical, methodological, policy and practice perspectives and explores the complex intersections of transmission of "cultural heritage" and "national values" with the diverse, changing societal contexts. Each chapter contributes to an increased understanding of how the place

of religion in Early Childhood Education and Care can be understood across continents, countries and educational systems. The Routledge International Handbook of the Place of Religion in Early Childhood Education and Care is an essential resource for academics, researchers, students and practitioners working in Early Childhood Education, Sociology of Childhood, Religious Education and other related fields **The Statesman's Yearbook 2000** Springer Science & Business Media This book offers a range of contemporary sociological reflections on new manifestations of religion, religiosity, and spirituality in Central and Eastern Europe, a region that has seen significant social and political transformation. It explores the development of cultural and religious trends, including secularisation, new spirituality, and a resurgence of religiosity outside of traditional structures. The theoretical and empirical contributions by established and emerging scholars address topics including: the experiences and values of young people, the role and influence of media, the relationship between public and private religion, and the position of state and institutions. The book will be of particular interest to sociologists of religion and others focused on contemporary Central and Eastern European societies.

"I have read the draft of this book sent to me by the editor. After reading this draft, I do think this book is valuable and timely. It discusses the contemporary issues that have worried many people in the present world: terrorism, human rights, Islamic radicalism and the problem of identity in the Singaporean capitalism. These issues are not discussed in the theoretical/abstract way (it also doesn't mean that theories are not discussed at all), but in the context of various concrete societies. The book deals with one of the above issues in Malaysia, Singapore and Indonesia (Aceh and Sumenep in Madura). Each issue is written by a different author that has studied the issue thoroughly. So, the book is a collection of research done by specialists of these issues. Two essays on Southeast Asia (one on health and the other on human security) give the general picture of this region, acting as a broad introduction of the chapters that follow. Each chapter has been written professionally and the readers will learn many things from each of them. One has to read the chapter in order to really appreciate them. Therefore I really recommend that this manuscript to be published as a book in order to get a large audience. One shortcoming though, this book deals with three countries only (Malaysia, Singapore and Indonesia), albeit these three are the important countries in the region. Other important Southeast Asian countries such as Thailand, the Philippines and Burma are not discussed individually. With the omission of these countries, it thus can be argued whether this book can represent the Southeast Asian region? Also in dealing with Indonesia, the chapters talk on sub-national level, namely on Aceh province and a peripheral city Sumenep in the island of Madura, East Java, while Malaysia and Singapore are dealt on the level of nation state. To conclude, even with these shortcomings, this book is still valuable. Therefore I would like to recommend it be published." —Arief Budiman, Foundation Professor of Indonesian, Asia Institute, The University of Melbourne, Australia

The rise of early Christianity has been examined from a myriad of perspectives, but until recently ritual has been a neglected topic. *Ritual and Christian Beginnings: A Socio-Cognitive Analysis* argues that ritual theory is indispensable for the study of Christian beginnings. It also makes a strong case for the application of theories and insights from the Cognitive Science of Religion, a field that has established itself as a vigorous movement in Religious Studies over the past two decades. Risto Uro develops a 'socio-cognitive' approach to the study of early Christian rituals, seeking to integrate a social-level analysis with findings from the cognitive and evolutionary sciences. *Ritual and Christian Beginnings* provides an overview of how ritual has been approached in previous scholarship, including reasons for its neglect, and introduces the reader to the emerging fields of Ritual Studies and the Cognitive Science of Religion. In particular, it explores the ways in which cognitive theories of ritual can shed new light on issues discussed by early Christian scholars, and opens up new questions and avenues for further research. The socio-cognitive approach to ritual is applied to a number of test cases, including John the Baptist, the ritual healing practiced by Jesus and the early Christians, the social life of Pauline Christianity, and the development of early Christian baptismal practices. The analysis creates building blocks for a new account of Christian beginnings, highlighting the role of ritual innovation, cooperative signalling, and the importance of bodily actions for the generation and transmission of religious knowledge.

An estimated 75,000 Iranians emigrated to Britain after the 1979 revolution and the establishment of the Islamic Republic.

They are politically, religiously, socio-economically and ethnically heterogeneous, and have found themselves in the ongoing process of settlement. The aim of this book is to explore facets of this process by examining the ways in which religious traditions and practices have been maintained, negotiated and rejected by Iranians from Muslim backgrounds and how they have served as identity-building vehicles during the course of migration, in relation to the political, economic, and social situation in Iran and Britain. While the ethnographic focus is on Iranians, this book touches on more general questions associated with the process of migration, transnational societies, Diasporas, and religious as well as ethnic minorities.

Increasing numbers of young adults go to university. This book explores contemporary understandings of what universities are for, what impact they might be having on their students, and what visions of life and society are driving them. It criticises a narrow view of higher education which focuses on serving the economy. It argues that, for the sake of the common and individual good, universities need to be about forming citizens and societies as well as being an economic resource. It does so in the light of theological perspectives mainly from the Christian but also from the Muslim faith, and has a global as well as a British perspective. It brings together key thinkers in theology and higher education policy - including Rowan Williams, David Ford, Mike Higton, and Peter Scott - to present a unique perspective on institutions which help shape the lives of millions.

**A study of National Health Mission scheme** Routledge

Discussions of religion in international relations have often focused narrowly on religious fundamentalism and on the potentially negative consequences of religious differences. This book attempts to take a more balanced and much broader view of the subject, bringing together new research-based studies by specialists from international relations, history and theology. Case-studies and thematic analyses examine both seldom-discussed issues - such as the political consequences of large-scale religious change - and review old themes in new ways.

This 2-volume set within The SAGE Reference Series on Leadership tackles

issues relevant to leadership in the realm of religion. It explores such themes as the contexts in which religious leaders move, leadership in communities of faith, leadership as taught in theological education and training, religious leadership impacting social change and social justice, and more. Topics are examined from multiple perspectives, traditions, and faiths. Features & Benefits: By focusing on key topics with 100 brief chapters, we provide students with more depth than typically found in encyclopedia entries but with less jargon or density than the typical journal article or research handbook chapter. Signed chapters are written in language and style that is broadly accessible. Each chapter is followed by a brief bibliography and further readings to guide students to sources for more in-depth exploration in their research journeys. A detailed index, cross-references between chapters, and an online version enhance accessibility for today's student audience.

Old Religion, New Spirituality: Implications of Secularisation and Individualisation in Estonia Routledge

*Religion, Language and Power* shows that the language of 'religion' is far from neutral, and that the packaging and naming of what English speakers call 'religious' groups or identities is imbued with the play of power. *Religious Studies* has all too often served to amplify voices from other centers of power, whether scripturalist or otherwise normative and dominant. This book's de-centering of English classifications goes beyond the remit of most postcolonial studies in that it explores the classifications used in a range of languages — including Arabic, Sanskrit, Chinese, Greek and English — to achieve a comparative survey of the roles of language and power in the making of 'religion'. In contextualizing these uses of language, the ten contributors explore how labels are either imposed or emerge interactively through discursive struggles between dominant and marginal groups. In dealing with the interplay of religion, language and power, there is no other book with the breadth of this volume.

Islam and English Law UBC Press  
The relationship of economics, capitalism and wealth to the ethics and morality of religion has intrigued and challenged policymakers, pressure groups, theologians, sociologists, economists and historians for centuries. Here David Jeremy addresses these questions in the context of modern Britain. His preliminary survey of historical controversies within religion and business, and the accompanying chronology of significant events since the 1770s are an extremely useful introduction for those unfamiliar with the field.
