The intent of my book is to assist writers of all ages and levels of expertise in improving their skills in discovering the attributes of

successful paragraph construction with an in-depth understanding of the dynamics of writing award-winning essays. The most critical component of competitive success is the ability to translate an idea into a comprehensive written report. The MEALS (Main point, Evidence, Analysis, Logic, and synonym), an acronym, is a tool designed to act as a guide to promote ease and excellence in writing endeavors. During his graduate work, Dr. Elsayess developed a new tool with the acronym MEALS. The MEALS method could assist while creating written works to earn a degree. In addition, using this method could allow students to move ahead with a good competency level for writing. Dr. Elsayess utilized the MEALS tool for assessing his students and developing his book. Not only did Lovitts (2007) report a high rate of unacceptable dissertations would lead to university dropout, but also, Lovitts (2007) reported that the Council of Graduate Schools indicated that “a 50% student dropout rate, writing the dissertation reported as the major stumbling block.” Reference: Lovitts, B. In that *The Anatomy of Speech Notions* (1976) was the precursor to *The Grammar of Discourse* (1983), this revision embodies a third "edition" of some of the material that is found here. The original intent of the 1976 volume was to construct a hierarchical arrangement of notional categories, which find surface realization in the grammatical constructions of the various languages of the world. The idea was to marshal the categories that every analyst—regardless of theoretical bent—had to take account of as cognitive entities. The volume began with a couple of chapters on what was

then popularly known as "case grammar," then expanded upward and downward to include other notional categories on other levels. Chapters on discourse, monologue, and dialogue were buried in the center of the volume. In the 1983 volume, the chapters on monologue and dialogue discourse were moved to the fore of the book and the chapters on case grammar were made less prominent; the volume was then renamed *The Grammar of Discourse*. The current revision features more clearly than its predecessors the intersection of discourse and pragmatic concerns with grammatical structures on various levels. It retains and expands much of the former material but includes new material reflecting current advances in such topics as salience, clines for discourse, rhetorical relations, paragraph structures, transitivity, ergativity, agency hierarchy, and word order typologies.

From granular concerns, such as sentence structure and grammar, to big-picture issues, such as adhering to genre patterns for successful research and publishing and developing productive and rewarding writing habits, Hayot helps ambitious students, newly minted Ph.D.'s, and established professors shape their work and develop their voices. Hayot does more than explain the techniques of academic writing. He aims to adjust the writer's perspective, encouraging scholars to think of themselves as makers and doers of important work. Scholarly writing can be frustrating and exhausting, yet also satisfying and crucial, and Hayot weaves these experiences, including his own trials and tribulations, into an ethos for scholars to draw on as they write. Combining psychological support with practical suggestions for composing introductions and conclusions, developing a schedule for writing, using notes and citations, and structuring paragraphs and essays, this guide to the elements of academic style does its part to rejuvenate scholarship and writing in the humanities.

Effective Sentences uses high-interest readings, useful vocabulary, and straightforward grammar lessons to teach sentence writing. The text targets students--both traditional ESL/ESOL students and Generation 1.5--who write English at a basic level but need help producing accurate sentences with a complexity that matches their thoughts. Effective Sentences has a two-part structure. First, students learn to recognize basic sentence structure and closely examine elements to take the mystery out of English sentences. Then, they learn to use adjectives, objects, and prepositional phrases to create compound and complex sentence structures from simple sentences. Grammar presented is driven by the students' needs and the stories-written by language students at this level--within each chapter. Vocabulary is open-ended and highlights words in the readings that students may find difficult. Paragraph structure is also introduced, along with topic sentences, general to specific movement, and sentence variety within paragraph structure.
