FLIGHT 194 LANDED. SOMETHING LETHAL AWAITS OUTSIDE. THIS IS DEAD ON ARRIVAL.

An airplane touches down at a desolate airport in a remote

Colorado ski town. Shortly after landing, Dr. Lyle Martin, a world-class infectious disease specialist, is brusquely awakened to shocking news: Everyone not on the plane appears to be dead. The world has gone dark. While they were in the air, a lethal new kind of virus surfaced, threatening mankind's survival, and now Martin—one of the most sought-after virologists on the planet until his career took a precipitous slide—is at the center of the investigation. Moving at lightning pace from the snowbound Rockies to the secret campus of Google X, where unlimited budgets may be producing wonders beyond our capacity to control, *Dead on Arrival* is a brilliantly

imaginative, intricately plotted thriller that draws on Matt Richtel's years of science and technology reporting for the New York Times, and establishes him as one of the premier thriller writers working today.

Even a Pandemic Can't Stop Love and Murder

Archway Publishing

When Thomas Langford, an author from Columbus, Ohio checks into the Empire Suites, a New York City hotel for a meeting with his publisher, the worse pandemic in modern history begins ravishing the city. Jerry Ellison, a successful entrepreneur and friend from back home, stops by to see Thomas at his hotel, coming back from where he imports his products, China. Shortly after the visit, guests and staff at the Empire Suites Hotel in Times Square begin falling ill, infected with the dreaded COVID-19 coronavirus. New York

City's Health Department quarantines the hotel in the wake of the infections; all of Thomas's meeting's have been canceled as the entire country goes into lockdown. To occupy his idle hours in quarantine, Thomas decides to keep a diary. More and more people in the hotel become sick, cell service and access to the internet go down, as the situation in the hotel begins to spiral out of control. The death toll rockets as the virus of the century will spare very few that it infects. Social Distancing and respirator masks become compulsory. Schools and businesses across the country have all been ordered closed. The biohazard-suited Dr. Merrick,

from the CDC, pays a visit to those quarantined at the Empire Suites. The doctor brings with him the latest testing device, which instantly diagnosis whether or not someone is virus-free or infected with COVID-19. Thomas is tested and found to be infected with the virus. His world is suddenly turned upside down. All is not what it seems as he crosses over from reality into the strange and horrifying realm of the virus.

Operation Black

Dragon Luzifer-Verlag
Two grad students track the spread of Covid-19 from an infected patient who, unknown to them, is a U.S. spy employed by the CIA. The trackers interview the spy's many contacts, unaware the contacts

are part of the patient's espionage network. When the grad students publish their findings (which were written by the anonymous ghostwriter), they are murdered. The ghostwriter who wrote the article - a former student named Takis Soulivakis - knows he might be the next to be killed. The novel concerns the ghostwriter's struggle to survive hitmen from the CIA while attempting to learn why the article triggered the deaths of the grad students.

New York Times #1- bestselling author Robin Cook takes on the cutting-edge world of gene modification in this pulse-pounding medical thriller. When

a young, seemingly healthy woman collapses suddenly on a New York City subway car and dies upon reaching the hospital, her case is chalked up to a virulent strain of influenza. That is, until she ends up on veteran medical examiner Jack Stapleton's autopsy table, where Jack discovers some striking anomalies: First, that the young woman has had a heart transplant, and second, that her DNA matches that of the transplanted heart. After two other victims succumb to a similar rapid death, Jack fears the city is facing an unprecedented pandemic. But the facts aren't adding up, and now Jack must race against the clock to determine what kind of virus can wreak such

terrifying havoc. But when his investigation leads him into the fascinating realm of CRISPR/Cas9, a gene-editing biotechnology that allows animal DNA to be inserted into living human cells, he'll uncover the dark underbelly of the organ-transplant market...and come face-to-face with a megalomaniacal businessman willing to risk human lives to fulfill his dreams of conquering a lucrative new medical frontier. And if Jack's not careful, the next life lost might be his own...

COVID-19. For months, the coronavirus has been holding the world in a death grip. By now, it's dawning on people that nothing will ever be the same. It's the liberal societies of the West that are feeling the merciless impact the most. Besides the immense, spiraling costs, they must also cope with the reality that their freedom-orientated societal models are beginning to unravel because of this disaster. Because of the COVID-19 pandemic, the West is faltering. The West as a colossus with feet of clay- that's what's impelling the men around Chinese intelligence agent Yue Fei. Author Klaus Mewes has written a

gripping thriller, a sophisticated mixture weaving together geostrategy, the history of the virus pandemic, and the research behind it. Klaus also expertly uses China's breathtaking development and eventful history over the past thirty years to infuse his story with realism. The author sheds light on the - fictitious, to be sure - events leading up to the outbreak of the pandemic. Meanwhile, a young woman physician, Shenmi, lives through the 1989 events that occurred on Tiananmen Square. Traumatized, she withdraws emotionally. That is, until the death of a boy during the 1997 H5N1 flu epidemic changes her life yet again, and she

resolves to dedicate herself to researching viruses - specifically, coronaviruses. Yue Fei, however, the cunning intelligence agent, is playing his own game. Failing in his hunt for dissidents and professionally exiled as a consequence, he contemplates revenge and the opportunity to rehabilitate himself in the eyes of his superiors. One day, by random chance, he stumbles across an old acquaintance - whereupon he hatches a plan that will change the world. Now begins a breathless race against time.

THE DEATH - Die Trilogie (Bundle)

John W. Vance

An anthology series wherein survivors of a viral infection seek help from therapists who are just as

traumatized as they are.***Conspiracies run deep within the recovering United States, where a small percentage of its population once suffered from a viral outbreak brought on by infected cats that were dropped into low-income neighborhoods. One decade later, the trauma is still fresh as an orphaned boy, a disenfranchised postal worker, and an ex-member of a dystopian cult seek therapy from professionals who had suffered from their own chaotic experiences during the epidemic.

Because the war on drugs is not going well, DEA conspirators initiate a secret project mixing a lethal Venezuelan hepatitis virus into heroin,

rationalizing that a few deaths from a new type of hepatitis will deter drug abuse in many. When Dr. Kris Jensen, a medical detective with the CDC's hepatitis division, arrives in Mississippi to investigate rapidly fatal hepatitis in two drug users, she doesn't expect to become a victim. Two days after an accidental needlestick, she realizes that she is now infected with this unknown lethal virus and has only five days left to find answers to its origin. Jensen's investigation takes her into the depths of a web of drug use and revenge murders, tracked by DEA assassins who are determined to keep her from discovering the truth.

QUARANTÄNE (The Death 1) Sandstone Press Ltd
A fast-paced, gripping thriller in the tradition of Michael Crichton, Robin Cook, and James Rollins, *The Red Death* is a thriller fueled by the re-emergence of an ancient plague that gave rise to the Black Death--and the people trying to stop it. The question is: How do you stop something that you can't see?

***** AN ANCIENT DISEASE re-emerges in the heart of New York City--a deadly bacteria that gave rise to the Black Death. Maggie De Luca, an epidemiologist who is fighting her own

demons, works to uncover clues to contain the disease, but is always one step behind--her fate determined by the flip of a coin. Microbiologist Michael Harbinger believes he can make a vaccine that can stop the disease, but to do so would require an elusive plant that only grows in a remote region of the Amazon. With the help of J.D. Stallings, a paleoanthropologist, and Samantha Boutroux, a bacteriologist, they set out to find the plant that holds the key before the Red Death pandemic grips the world--or has the First Horseman of the Apocalypse, Plague, already opened the gates to our final annihilation?

VERNICHTUNG (The Death 3) CreateSpace "Things Like That Never Happen Here." The townsfolk of Black Dog wrapped themselves in that sentiment like a security blanket. Being part of the tight-knit, small town shielded them from the horror that plagued the evening news. And then something happened. It happened fast. Two fishermen became ill after a day on Black Dog Lake. The mysterious virus that had an almost supernatural way of evolving began to spread. People got sick. People got violent. And then they

died. But the hunger that ravaged their bodies lived on. The infected were considered the lucky ones. The cloudy film covering their eyes blinded them from the death of mankind. The survivors witnessed everything-the true value of life and the evil that lurked deep in the human soul. Each day the world darkened. On the bright side, it would all be over in five days.
