This Festschrift honours Dr. Gerrit Reinink on the occasion of the end of his professional career as a senior lecturer of Syriac and Aramaic studies at the University of Groningen, The Netherlands. The Festschrift includes, in addition to a brief biography and a complete bibliography of Reinink's scholarly writings, fifteen articles, arranged according to the chronology of their topics and covering a wide variety of subjects, ranging from the days of Julian the Apostate to the year of the fall of Constantinople, through the period of Late Antiquity, the Byzantine period, early Islam and the Middle Ages. The authors are all prominent experts in the field of Syriac studies and adjacent areas. The title of the book, *Syriac Polemics*, is a clear reference to one of Reinink's favourite research topics: Eastern Christian reactions to the rise of Islam. This volume is a valuable contribution to the study of Syriac literature and culture in general.

Die Übersetzung war das wichtigste Medium der griechischen Aufklärung, die um 1820 ihren Höhepunkt erreichte. Ziel dieser Arbeit ist es, anhand des quantifizierbaren und klassifizierbaren Prozesses der Übersetzungen, den deutschen Beitrag zur Entstehung der griechischen Nation zu erarbeiten. Dieses wissenschaftliche Werk beschäftigt sich fachübergreifend mit allen deutsch-griechischen Übersetzungen der Aufklärungszeit und deren Übersetzern, wobei der Schwerpunkt bei den literarischen Übersetzungen liegt. Deutsche Literatur wurde ins Neugriechische übersetzt, um das Nationalgefühl und die Kultur der Griechen neu zu beleben, mit dem Zweck der Annäherung an die europäischen Kulturvölker und der Wiedergeburt Griechenlands.

As Stefan Ihrig shows in this first comprehensive study, many Germans sympathized with the Ottomans' long-standing repression of the Armenians and with the Turks' program of extermination during World War I. In the Nazis' version of history, the Armenian Genocide was justifiable because it had made possible the astonishing rise of the New Turkey.

Inhaltsangabe:Abstract: The market of mobile technologies is growing at an enormous rate worldwide. With the latest developments in technology, new services are being invented which were not even possible some years ago. As new devices, applications and services emerge, also the

number of mobile users is increasing in a rapid manner. Mobile broadband networks like UMTS, EDGE or Wireless LAN make it possible to reach a large group of users who gain access with their personal mobile devices, equipped with multimedia and data capabilities. Due to this development, new interesting possibilities arise for many areas. One of these areas is the tourism sector, which is being referred to in this thesis. The so-called m-tourism (mobile tourism) is an emerging field with an enormous marketing potential, as described in Chapter 2. Recent hardware inventions and developments are greatly pushing the market share. Companies are offering tailored products filling the needs of their customers. Personalization of services becomes a popular trend in this sector. But what do users think about such a mobile tourism service? Do they feel the service has added benefits, compared to traditional media and Web-based services? Are those products really user friendly? What would be the crucial applications and qualities that make the big difference? A range of usability issues concerning mobile services is being discussed in the science community; are there already viable, good solutions? With the recent hype of so-called location based services, the consumer keeps calling for more usable products, featuring more intuitive interfaces. Others may fear being overwhelmed with features. Especially for the senior users, a relatively big target group for most mobile applications, these products often remain a mystery. Usability has been and should always remain a key element for quality software and successful applications. In this thesis, several applications are described, some of their user interfaces are analyzed and major flaws discovered. Furthermore, a corresponding prototype user interface is introduced with a specific analysis of each development step, taken from the book *The Usability Engineering Lifecycle* by Deborah J. Mayhew. Once prototypical realisations are available, users can validate the implemented approaches and evaluate concepts and realization details from their point of view. Such first user experiences are a valuable guidance for further [...]

First English U.S. PREMIUM HARDCOVER Edition of the cult dystopia "METRO 2033". * * * Metro 2033 tells the story of a young man named Artyom who goes a long way to save his world from mortal danger. The book describes the consequences of an atomic war. Its only survivors strive for existence in the mazes of the Moscow subway (Metro) some two decades after the nuclear Holocaust. Formally a sci-fi novel, Metro 2033 describes a dystopia, in which Russia's present-day society is superficially analyzed and described. It also critically examines communism in the former Soviet Union and the rise of fascism in modern Russia. Over 2,000,000 copies of Metro 2033 have been sold worldwide. Foreign book rights have been sold to more than 37 countries. The franchise gave birth to two cult video games, Metro 2033 and Metro Last Light. Film rights were optioned by MGM Studios in Hollywood.

Paintings by Renaissance masters Lucas Cranach the Elder, Albrecht Durer, and Hans Holbein the Younger are among the works featured in this lavish volume, the first to comprehensively study the largest collection of early German paintings in America. These works, created in the 14th through 16th centuries in the region that comprises present-day Germany, Austria, and Switzerland, include religious images - such as "Virgin and Child with Saint Anne" by Durer and the double-sided altarpiece "The Dormition of the Virgin" by Hans Schaufelein - as well as remarkable portraits by

Holbein and the iconic "Judgment of Paris" by Cranach. In all, more than 70 works are thoroughly discussed and analyzed, making this volume an incomparable resource for the study of this rich artistic period.

Vor gut 25 Jahren beklagte Lawrence Venuti die Unsichtbarkeit des Übersetzers, und Beispiele für solche Unsichtbarkeiten gibt es in der Tat zuhauf. Es gibt aber auch eine andere Geschichte der Übersetzung, eine Geschichte der Sichtbarkeit und Agentialität – und diese Geschichte, eingeschlossen ihrer verschiedenen Theorien und Praktiken, stellt der geplante Sammelband mit Blick auf die Zielsprache Deutsch ins Zentrum. Das Interesse gilt dabei dem verändernden Potential der Übersetzung sowohl zwischen als auch innerhalb von Sprachen. Der Band versammelt Beiträge von Wissenschaftler:innen und Übersetzer:innen.

This is the third and final volume of the Etymological Dictionary of Egyptian. It comprises the Egyptian words with initial m-. The amount of material offered, the extensive treatment of scholarly discussions on each item, and the insights into the connections of Egyptian and the related Afro-Asiatic (Semitic-Hamitic) languages, including many new lexical parallels, will make it an indispensable tool for comparative purposes and an unchallenged starting point for every linguist in the field. The reader will find the etymological entries even more detailed than those of the introductory volume, due to the full retrospective presentation of all etymologies proposed since A. Erman's time, and thanks to an extremely detailed discussion of all possible relevant data even on the less known Afro-Asiatic cognates to the Egyptian roots.

The German Minority in Interwar Poland analyzes what happened when Germans from three different empires - the Russian, Habsburg and German - were forced to live together in one new state. After the First World War, German national activists made regional distinctions among these Germans and German-speakers in Poland, with preference initially for those who had once lived in the German Empire. Rather than becoming more cohesive over time, Poland's ethnic Germans remained divided and did not unite within a single representative organization. Polish repressive policies and unequal subsidies from the German state exacerbated these differences, while National Socialism created new hierarchies and unleashed bitter intra-ethnic conflict among German minority leaders. Winson Chu challenges prevailing interpretations that German nationalism in the twentieth century viewed 'Germans' as a single homogeneous group of people. His revealing study shows that nationalist agitation could divide as well as unite an embattled ethnicity.

Grotesque Visions focuses on the radical avant-garde interventions of Salomo Friedländer (aka Mynona), Til Brugman, and Hannah Höch as they challenged the questionable practices and evidentiary claims of late-19th- and early-20th-century science. Demonstrating the often excessive measures that pathologists, anthropologists, sexologists, and medical professionals went to present their research in a seemingly unambiguous way, this volume shows how Friedländer/Mynona, Brugman, Höch, and other Berlin-based artists used the artistic grotesque to criticize, satirize, and subvert a variety of forms of supposed scientific objectivity. The volume concludes by examining the exhibition Grotesk!: 130 Jahre Kunst der Frechheit/Comic Grotesque: Wit and Mockery in German Arts, 1870-1940. In contrast to the ahistorical and amorphous concept informing the exhibition, Thomas O. Haakenson reveals a unique deployment of the artistic grotesque that targeted specific established and emerging scientific discourses at the turn of the last fin-de-siècle.

Studying the nature of translation theory and offering the reasons for success or failure of translation - this book is for anyone with an academic or professional interest in translation. It presents a new approach - combining a complex model of reality and a biocybernetic computer-aided methodology for the study of translation processes. The study is discussing translation as systemic

interaction and connecting for the first time Translation Studies with biocybernetics, fuzzy logic, information theory, intercultural communication, action theory, psychology and various technical disciplines (including Russian, German and English examples). It is a breakthrough in the understanding of irregularities in translation processes in theory and practice as well as in the training of translators and interpreters. Dr. Heidemarie Salevsky is professor of Translation Studies at Okan University, Istanbul, and worked as an interpreter, translator and lector. She was Head of the Translation Studies Department at Humboldt University in Berlin and professor of Translation Studies and Technical Communication in Magdeburg. She was a visiting professor at the Universities of New York/Binghamton, Heidelberg, Innsbruck and Vienna. Dr. Ina Müller works as a research assistant at the Academy of Sciences and Literature in Mainz. She worked as a graduate technical translator and lecturer.

The present volume offers a selection of papers on current issues in Slavic languages. It takes stock of the past 20 years of linguistic research at the Department of Slavic Studies at Leipzig University. Within these two decades, the scientific writing, teaching, and organization done in this Department strengthened the mode of research in formal description of Slavic languages, formed another center for this kind of linguistic research in the world, and brought about a remarkable amount of scientific output. The authors of this volume are former or present members of the Department of Slavic studies or academic friends. Based on the data from East, West, and South Slavic languages, the papers tackle issues of all grammatical subdisciplines in current models of description, compare parts of the grammars of Slavic languages, explain categories and phrases in Slavic languages that do not exist in present-day Indogermanic languages of Western Europe, and propose ways how to update the standard of lexicography in still less described Slavic languages. A study of language competence is dedicated to the actual requests on heritage speakers and shows how their abilities can be evaluated.
