#1 New York Times Bestseller In 1989, Ken Follett astonished the literary world with *The Pillars of the Earth*, a sweeping epic novel set in twelfth-century England centered on the building of a cathedral and many of the hundreds of lives it affected. *World Without End* is its equally irresistible sequel—set two hundred years after *The Pillars of the Earth* and three hundred years after the *Kingsbridge* prequel, *The Evening and the Morning*. *World Without End* takes place in the same town of *Kingsbridge*, two centuries after the townspeople finished building the exquisite Gothic cathedral that was at the heart of *The Pillars of the Earth*. The cathedral and the priory are again at the center of a web of love and hate, greed and pride, ambition and revenge, but this sequel stands on its own. This time the men and women of an extraordinary cast of characters find themselves at a crossroads of new ideas—about medicine, commerce, architecture, and justice. In a world where proponents of the old ways fiercely battle those with progressive minds, the intrigue and tension quickly reach a boiling point against the devastating backdrop of the greatest natural disaster ever to strike the human race—the Black Death. Three years in the writing and nearly eighteen years since its predecessor, *World Without End* is a "well-researched, beautifully detailed portrait of the late Middle Ages" (*The Washington Post*) that once again shows that Ken Follett is a masterful author writing at the top of his craft.

#1 New York Times Bestseller Oprah's Book Club Selection The "extraordinary . . . monumental masterpiece" (Booklist) that changed the course of Ken Follett's already phenomenal career—and begins where its prequel, *The Evening and the Morning*, ended. "Follett risks all and comes out a clear winner," extolled Publishers Weekly on the release of *The Pillars of the Earth*. A departure for the bestselling thriller writer, the historical epic stunned readers and critics alike with its ambitious scope and gripping humanity. Today, it stands as a testament to Follett's unassailable command of the written word and to his universal appeal. *The Pillars of the Earth* tells the story of Philip, prior of *Kingsbridge*, a devout and resourceful monk driven to build the greatest Gothic cathedral the world has known . . . of Tom, the mason who becomes his architect—a man divided in his soul . . . of the beautiful, elusive Lady Aliena, haunted by a secret shame . . . and of a struggle between good and evil that will turn church against state and brother against brother. A spellbinding epic tale of

ambition, anarchy, and absolute power set against the sprawling medieval canvas of twelfth-century England, this is Ken Follett's historical masterpiece.

This brilliant blend of history, biography, and criticism explores the seminal figures of twentieth-century French art—Matisse, Picasso, Derain, Léger, Dufy, Braque, Giacometti, Balthus, and Hélión—and the vital art world in which they thrived. The ten interlocking essays in this important book include radical new evaluations of Derain, Léger, and Dufy, and penetrating studies of the final works of Picasso and Braque. *Paris Without End*, Jed Perl's first book, is now celebrating its twenty-fifth anniversary and is essential reading for anyone passionate about modern art. Roberta Smith called it "a quiet, cogent tour de force. . . . As one critic's demonstration of what he considers the best in art and the best way to write about it, this book sets a high standard." Hilton Kramer also noted, "Everyone who cares about the art of the twentieth century will find something to disagree with in this book—its many unorthodox judgments are bound to be controversial—but that, in my view, is a mark of the book's importance."

The science of finding habitable planets beyond our solar system and the prospects for establishing human civilization away from our ever-less-habitable planetary home. Planet Earth, it turns out, may not be the best of all possible worlds—and lately humanity has been carelessly depleting resources, decimating species, and degrading everything needed for life. Meanwhile, human ingenuity has opened up a vista of habitable worlds well beyond our wildest dreams of outposts on Mars. *Worlds without End* is an expertly guided tour of this thrilling frontier in astronomy: the search for planets with the potential to host life. With the approachable style that has made him a leading interpreter of astronomy and space science, Chris Impey conducts readers across the vast, fast-developing field of astrobiology, surveying the dizzying advances carrying us ever closer to the discovery of life beyond Earth—and the prospect of humans living on another planet. Since the first exoplanet, or planet beyond our solar system, was discovered in 1995, over 4,000 more have been pinpointed, including hundreds of Earth-like planets, many of them habitable, detected by the Kepler satellite. With a view spanning astronomy, planetary science, geology, chemistry, and biology, Impey provides a state-of-the-art account of what's behind this accelerating progress, what's next, and what it might mean for humanity's future. The existential threats that we face here on Earth lend urgency to this search, raising the question: Could space be our salvation? From the definition of habitability to the changing shape of space exploration—as it expands beyond the interests of government to the pursuits of private industry—*Worlds without End* shows us the science, on horizons near and far, that may hold the answers.

World Without End, Claude Wilkinson's fourth poetry collection, takes its title from the last words of the *Gloria Patri*. But the preceding words--"as it was in the beginning, is now and ever shall be"--

also echo the book's overarching theme: the seemingly infinite spiritual implications woven throughout our experience in the natural world. The poems are organized into meditations on family and community, spiritual worldviews, art and its insights, and nature's endless source of ever-relevant metaphor. The poems also speak to each other across these sections--and even with poems in Wilkinson's earlier collections. *World Without End* opens with "Among Other Things, My Father Teaches Me How to Mow Grass," exploring the relationship of father and son, something that is revisited later on in "Salvia." Both poems long for conciliation between father and son through yard work--restoring order in the garden, a lost Eden. Wilkinson's gift for ekphrastic poetry remains strong in *World Without End*, though here it is more referential and allusive. Rather than engaging specific works of art, the poet strives to understand the broader aesthetic visions of figures like Theodore Dreiser, Vincent Van Gogh, and Walter Anderson. In the title poem, a reference to Edward Hicks's *The Peaceable Kingdom* suggests art's ephemeral yet sustaining power--and an irrepressible yearning for a return to paradise.

"Every twenty seconds, all over the world, some aspect of life and social ritual is recorded by the camera: empty rooms, the glinting flanks of horses and bathing beauties, society ladies, the dead and dying ... More than forty major artists and photographers and more than 200 works are included in *World Without End*, the first major international photography exhibition to be organised from Australia. Some of the most rare, beautiful and unusual images will be presented through vintage prints and publications. Amongst those included are Diane Arbus, Eugène Atget, Pat Brassington, Walker Evans, Carol Jerrems, Man Ray, August Sander, Alfred Stieglitz and Weegee. *World Without End* examines the extraordinary role of photography in shaping 20th century consciousness. This was a century characterised by prolific creation, circulation and consumption of images. It is now impossible to imagine our reality unmediated by the camera."--Site web de l'éditeur.

Featuring multidisciplinary research by an international team of leading scholars, this volume addresses the contested aspects of arabesque while exploring its penchant for crossing artistic and cultural boundaries to create new forms. Enthusiastically imported from its Near Eastern sources by European artists, the freely flowing line known as arabesque is a recognizable motif across the arts of painting, music, dance, and literature. From the German Romantics to the Art Nouveau artists, and from Debussy's compositions to the serpentine choreographies of Loïe Fuller, the chapters in this volume bring together cross-disciplinary perspectives to understand the arabesque across both art historical and musicological discourses.

Musings are recollections of memories, of dreams, of ideas. Such recollections are persistent because they remain unresolved--whether as concepts about the world or as actions, taken or avoided, in art, life, and love. My musings are ripe because I have been chewing on them for many years. I am an old painter and a somewhat younger philosopher, and I remain concerned with how these fit together. So my first essay is about my journey through the landscape of such fitting. This done, I take on some art of our and other times that I revere or dislike. Then, as I am not a believer in straight paths, I go on to muse on how the world was before it began and how it will be after it ends, and how we can be who's and whats in places that are not the same. I return to art to argue against theories that champion brain over mind, and I enlist my artist-dog to illustrate my argument. My musings end with a broader journey that pits the alternate societies of crooked and straights in their strivings for fulfillment-and their needs, on occasion, to come together.

A religion professor elucidates the theory of the multiverse, its history, and its reception in science,

philosophy, religion, and literature. Multiverse cosmologies imagine our universe as just one of a vast number of others. Beginning with ancient Atomist and Stoic philosophies, Mary-Jane Rubenstein links contemporary models of the multiverse to their forerunners and explores the reasons for their recent appearance. One concerns the so-called fine-tuning of the universe: nature's constants are so delicately calibrated that it seems they have been set just right to allow life to emerge. For some thinkers, these "fine-tunings" are evidence of the existence of God; for others, however, and for most physicists, "God" is an insufficient scientific explanation. Hence the multiverse's allure: if all possible worlds exist somewhere, then like monkeys hammering out Shakespeare, one universe is bound to be suitable for life. Of course, this hypothesis replaces God with an equally baffling article of faith: the existence of universes beyond, before, or after our own, eternally generated yet forever inaccessible to observation or experiment. In their very efforts to sidestep metaphysics, theoretical physicists propose multiverse scenarios that collide with it and even produce counter-theological narratives. Far from invalidating multiverse hypotheses, Rubenstein argues, this interdisciplinary collision actually secures their scientific viability. We may therefore be witnessing a radical reconfiguration of physics, philosophy, and religion in the modern turn to the multiverse. "Rubenstein's witty, thought-provoking history of philosophy and physics leaves one in awe of just how close Thomas Aquinas and American physicist Steven Weinberg are in spirit as they seek ultimate answers."—Publishers Weekly "A fun, mind-stretching read, clear and enlightening."—San Francisco Book Review

In *The Art of Being a Tourist at Home*, Jenny Herbert takes us on a journey through our neighbourhood streets and our local parks, through museums and libraries, art galleries and bookshops. There's wonder to be found in the theatre and music-making all around us, vibrancy in fresh-food markets, new friends to meet through hobbies and clubs, and so many lifetime learning opportunities to be had - all without the stress involved in planning a holiday. After all, why do we travel in the first place? It's an urgent question in these days of climate crisis and global instability. Staying closer to home makes good sense: it's cheaper, easier, less stressful and better for our health as well as the health of the planet. But Jenny doesn't suggest that we should abandon all future travel plans. Instead, she shows travellers of all kinds how we can still harness the spirit of travel through the art of the 'staycation'. With beautiful illustrations throughout, *The Art of Being a*

Tourist demonstrates that travelling at home offers the greatest potential for us to discover what contributes to our wellbeing and our happiness.

A reporter for the Los Angeles Times once noted that "I Love Lucy is said to be on the air somewhere in the world 24 hours a day." That Lucy's madcap antics can be watched anywhere at any time is thanks to television syndication, a booming global marketplace that imports and exports TV shows. Programs from different countries are packaged, bought, and sold all over the world, under the watch of an industry that is extraordinarily lucrative for major studios and production companies. In *Global TV*, Denise D. Bielb and C. Lee Harrington seek to understand the machinery of this marketplace, its origins and history, its inner workings, and its product management. In so doing, they are led to explore the cultural significance of this global trade, and to ask how it is so remarkably successful despite the inherent cultural differences between shows and local audiences. How do culture-specific genres like American soap operas and Latin telenovelas so easily cross borders and adapt to new cultural surroundings? Why is *The Nanny*, whose gum-chewing star is from Queens, New York, a smash in Italy? Importantly, Bielby and Harrington also ask which kinds of shows fail. What is lost in translation? Considering such factors as censorship and other such state-specific policies, what are the inevitable constraints of crossing over? Highly experienced in the field, Bielby and Harrington provide a unique and richly textured look at global television through a cultural lens, one that has an undeniable and complex effect on what shows succeed and which do not on an international scale.

Aftershocks is a collection of essays, review essays, book reviews and occasional pieces that covers the period from 1996-2018. The connecting thread of *Aftershocks* is the cultural and social transformations wrought by the series of 'shocks' that have occurred since the beginning of the new millennium: terrorism after 9/11, the triumph of capital, the impact of the digital revolution and the fluidity of identity. The collection explores how writers, artists, and society at large seem to be caught up in a series of aftershocks: no sooner has one wave hit than another is upon us.

One girl and her doppelgangers try to stop the end of the world in this YA sci-fi adventure. When Hazel Stanczak was born, an interdimensional rift tore open near her family's home, which prompted immediate government attention. They soon learned that if Hazel strayed too far, the rift would become volatile and fling things from other dimensions onto their front lawn—or it could swallow up their whole town. As a result, Hazel has never left her small Pennsylvania town, and the government agents garrisoned on her lawn make sure it stays that way. On her sixteenth birthday, though, the rift spins completely out of control. Hazel comes face-to-face with a surprise: a second Hazel. Then another. And another. Three other Hazels from three different dimensions! Now, for the first time, Hazel has to step into the world to learn about her connection to the rift—and how to close it. But is Hazel—even more than one of her—really capable of saving the world?
