TRB's National Cooperative Highway Research Program (NCHRP) Report 672: Roundabouts: An Informational Guide - Second Edition explores the planning, design, construction, maintenance, and operation of roundabouts. The report also addresses issues that may be useful in helping to explain the trade-offs associated with roundabouts. This report updates the U.S. Federal Highway Administration's Roundabouts: An Informational Guide, based on experience gained in the United States since that guide was published in 2000. [Coach & Motor Body Builder for Australia and New Zealand](#) OECD Publishing

This OECD report on the road sector examines existing regulatory approaches and then explores how performance standards might be used to improve regulatory outcomes.

Driving Past Balboa Press

It's almost impossible to believe that on an average weekend eight people died in road accidents in Victoria in the late 1960s with a low of four and a high of an incredible sixteen. Geoff Quayle joined Commonwealth Department of Shipping and Transport in 1967 determined to play a role in doing something about these stark statistics. This memoir is an insider's account of the organised activity that it took to promote meaningful traffic safety reforms in Australia, weaving personal anecdotes into the historical account. The first

steps taken in Australia were to enact strict drink-driving laws and then make seat belt wearing compulsory. However, he cautions against concentrating on ever more restrictive legislative measures to reduce the death toll on the roads that is barely as third of what it was in 1970. Rather, he sees a continuing need to adapt the road and traffic environment to the capabilities, limitations and needs of people rather than the other way around. Quayle argues that the automated enforcement of speed limits that bear little relationship to the risk of crashing on the safest roads, whilst failing to guide drivers as to what is a safe speed elsewhere, only compounds the problem. As he recalls a career devoted to traffic safety, he reflects on what still needs to

be done today, noting that while Australia has come a long way, it would be a dreadful mistake to revisit the blind alleys of the past.

Industrial & Mining Standard Routledge
This book focuses on various aspects of research on ageing, including in relation to assistive technology; dignity of aging; how technology can support a greater understanding of the experience of physically aging and cognitive changes; mobility issues associated with the elderly; and emerging technologies. The 80+ age group represents an expanding market, with an estimated worth of £21.4 billion a year. Everyone is affected by this shift in demographics – we are getting older and may become carers – and we need to prepare ourselves and adjust our surroundings for longer life.

Products, services and environments have been changing in response to the changing population. Presenting international design research to demonstrate the thinking and ideas shaping design, this book is a valuable resource for designers; product developers; employers; gerontologists; and medical, health and service providers; as well as everyone interested in aging.

Highway Research Abstracts

Transportation Research Board
The bible of the industrial storage and distribution industry and the manual of policy and practice. It provides information for those with empty buildings on their hands, those trying to find space for new and/or growing enterprises and those faced with the

problem of how to manage multi-tenant, multi-use buildings. An outline of feasibility studies both from the standpoint of users looking for a building and buildings looking for a use is also included. One is matched with the other. The whole process is explained and placed in a legal and planning framework. Allowances for technological change and expansion are outlined as well as an explanation of the significance of various patterns of ownership, tenancy and management that can be adopted. As the container has been universally accepted for use in materials handling, this book is internationally relevant. Preface by George Heery AIA of the Heery Corporation, one of the largest and most successful industrial storage and distribution companies in the US.

Roundabouts John Wiley & Sons

This compendium of everything that's new in cars and trucks is packed with feedback from Canadian drivers, insider tips, internal service bulletins, and confidential memos to help the consumer select what's safe, reliable, and fuel-frugal.

Publisher description

The Horseless Age

Phil Edmonston, Canada's automotive "Dr. Phil," pulls no punches. He says there's never been a better time to buy

a new car or truck, thanks to a stronger Canadian dollar and an auto industry offering reduced prices, more cash rebates, low financing rates, bargain leases, and free auto maintenance programs. In this all-new guide he says: Audis are beautiful to behold but hell to own (biodegradable transmissions, "rodent snack" wiring, and mind-boggling depreciation) Many 2011-12 automobiles have "chin-to-chest" head restraints, blinding dash reflections, and dash gauges that can't be seen in sunlight, not to mention painful wind-tunnel roar if the rear windows are opened while underway Ethanol and hybrid fuel-saving claims have more in common with Harry Potter than the Society of Automotive Engineers GM's 2012 Volt electric car is a mixture of

hype and hypocrisy from the car company that "killed" its own electric car more than a decade ago. You can save \$2,000 by cutting freight fees and "administrative" charges. Diesel annual urea fill-up scams can cost you \$300, including an \$80 "handling" charge for \$25 worth of urea. Lemon-Aid's 2011-12 Endangered Species List: the Chinese Volvo, the Indian Jaguar and Land Rover, the Mercedes-Benz Smart Car, Mitsubishi, and Suzuki.
