Lene Hansen devotes particular attention to methodology and provides explicit directions for how to build discourse analytical research designs. Part II applies discourse analytical theory and methodology in a detailed analysis of the Western debate on the Bosnian war. This analysis includes a historical genealogy of the Western construction of the Balkans as well as readings of the official British and American policies, the debate in the House of Commons and the US Senate, Western media representations, academic debates and travel writing and autobiography. The Practice of Critical Discourse Analysis: an Introduction Routledge

Organized around these three concepts, Culture/ Power/History brings together both classic and new essays that address Foucault's "new economy of power relations" in a number of different, contestatory directions. Representing innovative work from various disciplines and sites of study, from taxidermy to Madonna, the book seeks to affirm the creative possibilities available in a time marked by growing uncertainty about established disciplinary forms of knowledge and by the increasing fluidity of the boundaries between them. The book is introduced by a major synthetic essay by the editors, which calls attention to the most significant issues enlivening theoretical discourse today. The editors seek not only to encourage scholars to reflect anew on the course of social theory, but also to orient newcomers to this area of inquiry.

Critical Discourse Analysis Routledge

In this groundbreaking, cross-disciplinary book, Rebecca Rogers explores the complexity of family literacy practices through an in-depth case study of one family, the attendant issues of power and identity, and contemporary social debates about the connections between literacy and society. The study focuses on June Treader and her daughter Vicky, urban African Americans labeled as "low income" and "low literate." Using participant-observation, ethnographic interviewing, photography, document collection, and discourse analysis, Rogers describes and explains the complexities of identity, power, and discursive practices that June and Vicky engage with in their daily life as they proficiently, critically, and strategically negotiate language and literacy in their home and community. She explores why, despite their proficiencies, neither June or Vicky sees themselves as literate,

and how this and other contradictions prevent them from transforming their literate capital into social profit. This study contributes in multiple ways to extending both theoretically and empirically existing research on literacy, identity, and power: * Critical discourse analysis. The analytic technique of critical discourse analysis is brought into the area of family literacy. The detailed explanation, interpretation, and demonstration of critical discourse analysis will be extremely helpful for novices learning to use this technique. This is a timely book, for there are few ethnographic studies exploring the usefulness and limits of critical discourse analysis. * Combines critical discourse analysis and ethnography. This new synthesis, which is thoroughly illustrated, offers an explanatory framework for the stronghold of institutional discursive power. Using critical discourse analysis as a methodological tool in order to build critical language awareness in classrooms and schools, educators working toward a critical social democracy may be better armed to recognize sources of inequity. * Researcher reflexivity. Unlike most critical discourse analyses, throughout the book the researcher and analyst is clearly visible and complicated into the role of power and language. This practice allows clearer analysis of the ethical, moral, and theoretical implications in conducting ethnographic research concerned with issues of power. * A critical perspective on family literacy. Many discussions of family literacy do not acknowledge the raced, classed, and gendered nature of interacting with texts that constitutes a family's literacy practices. This book makes clear how the power relationships that are acquired as children and adults interact with literacy in the many domains of a family's literacy lives. A Critical Discourse Analysis of Family Literacy Practices: Power In and Out of Print will interest researchers and practitioners in the fields of qualitative methodology, discourse analysis, critical discourse studies, literacy education, and adult literacy, and is highly relevant as a text for courses in these areas.

Discourse Analysis and the Bosnian War Polity

Over the last decade, Critical Discourse Analysis (CDA) has accrued an exceptional amount of attention across a wide number of academic disciplines within the humanities and social sciences. In almost every field of human activity, we are surrounded by and caught up in a network of texts and discourses. At the same time, a gradual enfranchising of individuals in Western societies tends to make us less inclined to accept those surrounding texts and discourses unquestioningly. It is these twin factors that underpin all studies that appear under the aegis of CDA. This unique, multidisciplinary collection gathers together the most influential writings adopting a CDA approach, along with the most important antecedent essays and articles from the earlier Twentieth Century. The articles that make up this collection are drawn from a wide range of journal sources, including articles critical of the Critical Discourse Analysis approach as well as those that illustrate applications of its principles and methods. A detailed index and new introduction by the editor will help the reader navigate this wealth of diverse material.

What is Discourse Analysis? addresses new researchers and other academics interested in language and its associated practices. The book outlines the history of discourse analysis, its key concepts and theorists and its uses and challenges. Discussions of published studies illustrate the use of the approach to investigate a range of research topics, such as gender, health and national identities.
