*Cargo Securement Handbook for Drivers* Elsevier

Drawing on psychoanalytic and semiotic perspectives, this book examines discourses mediating the global War on Terror, including governmental speeches, legal documents, print and broadcast journalism, and military memoirs. The book argues that these discourses motivate, and are motivated by, a myth of imminent harm that purportedly justifies a series of "preemptive" measures such as war, torture, and targeted killing, as well as an array of intrusive domestic security procedures such as profiling and mass surveillance. Dominant themes include selective compassion in the mainstream media, the language of war and the sacrificial sublime, asymmetrical warfare and the nostalgia for total war, weaponized drones and just war theory, and the role of American exceptionalism in normalizing endless war. Scholars and students alike will take interest in this original contribution to the fields of cultural studies, psychoanalysis, media studies, rhetoric, critical international relations, and international humanitarian law and ethics.

In their history of Cornell since 1940, Glenn C. Altschuler and Isaac Kramnick examine the institution in the context of the emergence of the modern research university. The book examines Cornell during the Cold War, the civil rights movement, Vietnam, antiapartheid protests, the ups and downs of varsity athletics, the women's movement, the opening of relations with China, and the creation of Cornell NYC Tech. It relates profound, fascinating, and little-known incidents involving the faculty, administration, and student life, connecting them to the "Cornell idea" of freedom and responsibility. The authors had access to all existing papers of the presidents of Cornell, which deeply informs their respectful but unvarnished portrait of the university. Institutions, like individuals, develop narratives about themselves. Cornell constructed its sense of self, of how it was special and different, on the eve of World War II, when America defended democracy from fascist dictatorship. Cornell's fifth president, Edmund Ezra Day, and Carl Becker, its preeminent historian, discerned what they called a Cornell "soul," a Cornell "character,"

a Cornell "personality," a Cornell "tradition"—and they called it "freedom." "The Cornell idea" was tested and contested in Cornell's second seventy-five years. Cornellians used the ideals of freedom and responsibility as weapons for change—and justifications for retaining the status quo; to protect academic freedom—and to rein in radical professors; to end in loco parentis and parietal rules, to preempt panty raids, pornography, and pot parties, and to reintroduce regulations to protect and promote the physical and emotional well-being of students; to add nanofabrication, entrepreneurship, and genomics to the curriculum—and to require language courses, freshmen writing, and physical education. In the name of freedom (and responsibility), black students occupied Willard Straight Hall, the anti-Vietnam War SDS took over the Engineering Library, proponents of divestment from South Africa built campus shantytowns, and Latinos seized Day Hall. In the name of responsibility (and freedom), the university reclaimed them. The history of Cornell since World War II, Altschuler and Kramnick believe, is in large part a set of variations on the narrative of freedom and its partner, responsibility, the obligation to others and to one's self to do what is right and useful, with a principled commitment to the Cornell community—and to the world outside the Eddy Street gate.

What would one call taking teens with no evident running talent and putting them through breakneck training combined with mantras from the rock n' roll, techniques from Kenya, philosophy from Australia and turning them champions? Is it revolutionary? Or just plain crazy? Bill Aris has heard both, but one thing is indisputable. Everything Aris does with his runners—male and female—is new and extraordinary, and he has created a new American running dynasty. The runners of Fayetteville-Manlius High School, or F-M, have won the last nine out of ten national championships and have the best cumulative record in cross country history. F-M's domination has shocked the sport for its defiance of accepted running principles and limitations. One year, the girls defeated the 2nd-place team in the country by an average of 59 seconds per girl in a 5k race. Another year, the F-M girls' ran faster than their Kenyan counterparts, who had come to Oregon as a showcase. Across the country, top coaches all whisper, "How do they do it?" From adopting long-forgotten Spartan creeds to focusing on teenaged developmental psychology and gender-blindness in training, *The Running Revolutionaries* is a must read for millions of runners and the millions more who strive for better performance.
