Beyond 'Gifted' and 'Ungifted' Oxford University Press

The present volume provides a comparative look at the contents and layout features of secondary annotations in biblical manuscripts across linguistic traditions. Due to the privileged focus on the text in the columns, these annotations and the practices that produced them have not received the scholarly attention they deserve. The vast richness of extant verbal and figurative notes accompanying the biblical texts in the intercolumns and margins of the manuscript pages have thus been largely overlooked. The case studies gathered in this volume explore Jewish and Christian biblical manuscripts through the lens of their annotations, addressing the various relationships between the primary layer of text and the secondary notes, and exploring the roles and functions of annotated manuscripts as cultural artifacts. By approaching biblical manuscripts as potential "notepads", the volume offers theoretical reflection and empirical analyses of the ways in which secondary notes may shed new light on the development and transmission of text traditions, the shifting engagement with biblical manuscripts over time, as well as the change of use and interpretation that may result from the addition of the notes themselves.

The Market Leader specialist titles extends the scope of the Market Leader series and allows teachers to focus on the reading skills and vocabulary development required for specific areas of business.

Psychology of Communication Routledge

Features original articles by some of the most distinguished contemporary scholars of Hegel's thought, The most comprehensive collection of Hegel scholarship available in one volume, Examines Hegel's writing in a chronological order, from his very first published works to his very last, Includes chapters on the newly edited lecture series Hegel conducted in the 1820s Book jacket.

Project-Management in Practice Cambridge University Press

The book contributes to the refutation of the separation of philosophy in the 20th century into analytic and continental. It is shown that Edmund Husserl was seriously concerned with issues of so-called analytic philosophy, that there are strict parallelisms between Husserl's treatment of philosophical subjects and those of authors in the analytic tradition, and that Husserl had a strong influence on Rudolf Carnap's 'Aufbau'.

In Minimal Selfhood and the Origins of Consciousness, R.D.V. Glasgow seeks to ground the logical roots of consciousness in what he has previously called the 'minimal self'. The idea is that elementary forms of consciousness are logically dependent not, as is commonly assumed, on ownership of an anatomical brain or nervous system, but on the intrinsic reflexivity that defines minimal selfhood. The aim of the book is to trace the logical pathway by which minimal selfhood gives rise to the possible appearance of consciousness. It is argued that in specific circumstances it thus makes sense to ascribe elementary consciousness to certain predatory single-celled organisms such as amoebae and dinoflagellates as well as to some of the simpler animals. Such an argument involves establishing exactly what those specific circumstances are and determining how elementary consciousness differs in nature and scope from its more complex manifestations. *Husserl and Analytic Philosophy* Longman

On the occasion of Habermas's 80th birthday, the German publisher Suhrkamp brought out five volumes of Habermas's papers that spanned the full range of his philosophical thought, from the theory of rationality to the critique of metaphysics. For each of these volumes, Habermas wrote an introduction that crystallized, in a remarkably clear and succinct way, his thinking on the key philosophical issues that have preoccupied him throughout his long career. This new book by Polity

brings together these five introductions and publishes them in translation for the first time. The resulting volume provides a unique and comprehensive overview of Habermas's philosophy in his own words. In the five chapters that make up this volume, Habermas discusses the concept of communicative action and the grounding of the social sciences in the theory of language; the relationship between rationality and the theory of language; discourse ethics; political theory and problems of democracy and legitimacy; and the critique of reason and the challenge posed by religion in a secular age. The volume includes a substantial introduction by Jean-Marc Durand-Gasselín, which offers a synoptic view of the development of Habermas's thought as a whole followed by concise accounts of his contributions in each of the areas mentioned. Together they provide the reader with the necessary background to understand Habermas's distinctive and original contribution to philosophy. Philosophical Introductions will be an indispensable text for students and scholars in philosophy and in the humanities and social sciences generally, as well as anyone interested in the most important developments in philosophy and critical theory today. *Against Management* John Wiley & Sons

Much has been written about leadership and team building, but there are still major gaps in thinking and research about how to engage senior stakeholders in support of an organisation's projects. The central role of stakeholders in the successful delivery of organisational strategy is becoming increasingly recognised, as is the importance of developing a sponsor culture to support more collaborative practices within the organisation. Building, and managing, relationships with senior (upwards) stakeholders is essential for success. Advising Upwards brings together the ideas of experts in fields related to engaging senior stakeholders, such as risk management, decision-making, understanding cultural considerations, effective communication and other disciplines that may enhance the sustainable engagement of senior stakeholders. The starting point is an examination of the difficulties that senior managers face as they move through the ranks of an organisation from middle management to executive levels. Senior managers usually move up through the organisation on the basis of command and control management. Once in the executive ranks they must develop a more collaborative approach and adopt the principles of emotional intelligence (EQ) to succeed. Awareness of difficulties that senior stakeholders may face drives effective approaches for communication between the team and sponsors. Case studies and stories from experts illustrate practical, structured approaches that enable the teams to develop robust relationships with senior stakeholders will result in teams 'being heard', and support their 'being extraordinary' through innovative approaches to advising upwards.

This is the third edition of Peter Jarvis' classic textbook, Adult and Continuing Education, which established itself as the most widely used and respected book about education for adults today. In this new edition, the author has made extensive revisions and included substantial additional material to take account of the many changes that have occurred in the field of adult education. Additional and updated material in this much-anticipated new edition includes: a discussion on both globalisation and Europeanisation, indicating the pressures that have been exerted on the educational system to change a greater emphasis on lifelong education, lifelong learning and society an extended discussion on the theorists of distance education and introductory material on e-learning and on-line learning an updated look at changes in UK policy and European policy documents new material on the relationship between research, learning and the changing approaches to knowledge, with more emphasis placed on action learning and research. *To Fudge Or Not to Fudge* Harvard University Press

Everyone wants to be virtuous, but recent psychological investigations suggest that this may not be possible. Mark Alfano challenges this theory and asks, not whether character is empirically adequate, but what characters human beings could have and develop. Although psychology suggests that most people do not have robust character traits such as courage, honesty and open-mindedness, Alfano argues that we have reason to attribute these virtues to people because such

attributions function as self-fulfilling prophecies - children become more studious if they are told that they are hard-working and adults become more generous if they are told that they are generous. He argues that we should think of virtue and character as social constructs: there is no such thing as virtue without social reinforcement. His original and provocative book will interest a wide range of readers in contemporary ethics, epistemology, moral psychology and empirically informed philosophy.

Wittgenstein's Antiphilosophy BoD – Books on Demand

Certainly all presidents and prime ministers have engaged in spin to a certain extent, but in the past the media - and the public - checked the extent to which our leaders were able to fudge the truth. However, President Bush has repeatedly used deception, told outright lies, and rewritten history to sell his policy agenda. And thanks to one of the most aggressive public relations teams ever assembled, he has been able to get away with it since he began his campaign. In the wake of September 11, the administration has taken its questionable conduct to a new level by attempting to intimidate critics and has tried to connect virtually every policy initiative to the war on terrorism. Bush has used the same tactics to mislead the public on a wide range of other major policy initiatives, from the environment to homeland security to Social Security - all with little scepticism from the media.

A Companion to the History of Economic Thought Garnet Publishing

The book is a systematic study of the issue of self-individuation in the scholastic debate on principles of individuation (*principia individuationis*). The point of departure is a general formulation of the problem of individuation acceptable for all the participants of the scholastic debate: a principle of individuation of *x* is what makes *x* individual (in various possible senses of 'making something individual'). The book argues against a *prima facie* plausible view that everything that is individual is individual by itself and not by anything distinct from it (Strong Self-Individuation Thesis). The keynote topic of the book is a detailed analysis of the two competing ways of rejecting the Strong Self-Individuation Thesis: the Scotistic and the Thomistic one. The book defends the latter one, discussing a number of issues concerning substantial and accidental forms, essences, properties, instantiation, the Thomistic notion of *materia signata*, Frege's Begriff-

Gegenstand distinction, and Geach's form-function analogy developed in his writings on Aquinas. In the context of both the scholastic and contemporary metaphysics, the book offers a framework for dealing with issues of individuality and defends a Thomistic theory of individuation.

Advising Upwards Springer

This volume contains seventeen essays written by Eckhard J. Schnabel, written over the past 25 years. The essays focus on the realities of the work of Jesus, Paul, John, and the early church, exploring aspects of the history, missionary expansion, and theology of the early church including lexical, ethical, and ecclesiological questions. Specific subjects discussed include Jesus' silence at his trial, the introduction of foreign deities to Athens, the understanding of Rom 12:1, Paul's ethics, the meaning of baptizein, the realities of persecution, Christian identity and mission in Revelation, and singing and instrumental music in the early church.

This book recounts the events involving Raquel Liberman, an impoverished immigrant to Argentina that was forced by circumstances into prostitution, and the powerful Zwi Migdal, which controlled the recruitment and deployment of Jewish prostitutes in Argentina while maintaining mutually profitable relations with corrupt politicians and policemen. Liberman's story is presented as an example of individual courage and determination in the face of the violence and corruption of the prostitution business. Her struggle with the Zwi Migdal and triumphant public victory over her oppressors was widely publicized in newspapers and magazines, and was a political cause celebre in its time. This book gives readers an intimate view of how the affair caught the public imagination, and was interpreted and transformed by the artistic imagination.

A Foundation in Digital Communication Walter de Gruyter GmbH & Co KG

Alain Badiou takes on the standard bearer of the "linguistic turn" in modern philosophy and anatomizes the "antiphilosophy" of Ludwig Wittgenstein. In the course of his interrogation of Wittgenstein's thinking, Badiou refines his own definitions of the universal truths that govern his work. Bruno Bosteels's introduction argues that a continuing dialogue with Wittgenstein is inescapable for contemporary philosophy.

Forensic Investigation of Explosions, Second Edition John Wiley & Sons

In this short book Peter Sloterdijk offers a genealogy of the concept of freedom from Ancient Greece to the present day. This genealogy is part of a broader theory of the large political body,

according to which Sloterdijk argues that political communities arise in response to a form of anxiety or stress. Through a highly original reading of Rousseau's late *Reveries of a Solitary Walker*, Sloterdijk shows that, for Rousseau, the modern subject emerges as a subject free of all stress, unburdened by the cares of the world. Most of modern philosophy, and above all German Idealism, is an attempt to reign back Rousseau's useless and anarchical subject and anchor it in the cares of the world, in the task of having to produce both the world and itself. In the light of this highly original account, Sloterdijk develops his own distinctive account of freedom, where freedom is conceptualized as the availability for the improbable. This important text, in which Sloterdijk develops his account of freedom and the modern subject, will be of great interest to students and scholars in philosophy and the humanities and to anyone interested in contemporary philosophy and critical theory.

Verzeichnis lieferbarer Bücher BRILL

In the past few decades, scientists of human nature—including experimental and cognitive psychologists, neuroscientists, evolutionary theorists, and behavioral economists—have explored the way we arrive at moral judgments. They have called into question commonplaces about character and offered troubling explanations for various moral intuitions. Research like this may help explain what, in fact, we do and feel. But can it tell us what we ought to do or feel? In *Experiments in Ethics*, the philosopher Kwame Anthony Appiah explores how the new empirical moral psychology relates to the age-old project of philosophical ethics. Some moral theorists hold that the realm of morality must be autonomous of the sciences; others maintain that science undermines the authority of moral reasons. Appiah elaborates a vision of naturalism that resists both temptations. He traces an intellectual genealogy of the burgeoning discipline of "experimental philosophy," provides a balanced, lucid account of the work being done in this controversial and increasingly influential field, and offers a fresh way of thinking about ethics in the classical tradition. Appiah urges that the relation between empirical research and morality, now so often antagonistic, should be seen in terms of dialogue, not contest. And he shows how experimental philosophy, far from being something new, is actually as old as philosophy itself. Beyond illuminating debates about the connection between psychology and ethics, intuition and theory, his book helps us to rethink the very nature of the philosophical enterprise.
