Kidnapped and sold into slavery in the American South, freeman Solomon Northup spent twelve years in bondage before being freed. *Twelve Years a Slave* is Northup's moving memoir, revealing unimaginable details of the horrors he faced as a slave on Southern plantations, and his unshakable belief that he would return home to his family. Written in the year after Northup was freed and published in the wake of Harriet Beecher

Stowe's *Uncle Tom's Cabin*, Northup's story was quickly taken up by abolitionist groups and news organizations as part of the fight against slavery, and continues to resonate more than a century after the end of the American Civil War.

Hand and Wrist Anatomy and Biomechanics A Comprehensive Guide  
There is a saying that "hand surgery without a tourniquet is like repairing a clock in a barrel full of dark ink." Operating without a sound fundamental knowledge of anatomy can be compared to "stirring around in the soup." Classic anatomy instruction covers only a fraction of the area of hand surgery: bones, muscles/ligaments, vessels, and nerves. The many different connective-tissue structures are often only briefly highlighted. The complex interaction of the various structures remains a mystery to most. This book presents the specialty of applied anatomy and is intended for medical professionals involved with the hand and its functionality: hand surgeons, trauma specialists, orthopaedists, plastic surgeons, occupational therapists, and physio-therapists. Key Features: Almost 150 illustrations, anatomical drawings, and photos of anatomy in vivo. Up-to-date information on clinical aspects such as diseases, their causes, and their treatment. Part 1 deals with the anatomy and functional anatomy of the hand Part 2

is dedicated to the surface anatomy of the structures of the forearm, wrist, and hand

Die authentische Geschichte einer Frau von ihrer frühen Kindheit bis ins mittlere Lebensalter. Als Säugling wurde sie von ihrer Mutter in ein Kinderheim abgegeben, wo sie zwei Jahre verbrachte, bis sie adoptiert wurde. Ihre Adoptivmutter war sehr unbeständig und wechselte häufig die Arbeitstellen, die Wohnung, wie auch die Männer. Sie führte ein unstabiles Leben und ließ Ulrike nicht die nötige Aufmerksamkeit zukommen, die ein Kind für eine stabile Entwicklung braucht. Dadurch war sie schon in frühesten Kindheit auf sich allein gestellt, was sich in ihrer persönlichen Entwicklung niederschlug. In jungen Jahren musste sie häusliche Gewalt und den Selbstmordversuch ihrer Adoptivmutter miterleben. Noch minderjährig bekam sie ihr erstes Kind, das auch sie zur Adoption frei gab. Angefangen vom Kindesmissbrauch bis zur körperlichen Gewalt in ihrer Ehe, beschreibt der Autor die Höhen und Tiefen ihres Lebens. The heterogeneity in the practice of diagnosis and treatment of head and neck squamous cell carcinoma (HNSCC) is known and expected to be inversely correlated with the level of evidence on a given topic. Literature on various aspects of management of HNSCC were previously published, but were usually restricted within narrow foci. Due to the lack of a similar comprehensive work published so far, the Head and Neck Cancer Working Group of Swiss Group for Clinical Cancer Research (SAKK) decided to perform a survey covering the whole spectrum of controversial topics concerning the diagnosis and the treatment of HNSCC

among its member institutions. This survey was designed to discuss current diagnostic and treatment strategies for HNSCC of all localizations, and to find out probable differences and level of consensus between the participating academic institutions by means of a questionnaire-based pattern of care study. The items in the survey was generated with a scored voting system by inclusion of all involved centers, and divided into four sections, each of them not exceeding twenty questions: head and neck surgery, radiation oncology, medical oncology and biomarkers. Surely, the topics and questions were intentionally chosen from controversial areas. Nonetheless, the lack of major consensus in most queried areas provide an insight to head and neck oncologist in terms of the scope of heterogeneity in their practice. Although none of the participated centers being plainly wrong, it is still disturbing to see, that a patient may be treated with quite discrepant diagnostic and treatment concepts even in a relatively small country adhering to up to date evidence based medicine. We believe that this work will serve the head and neck oncologists to be

aware of their discrepancies and to stimulate discussion toward standardization of practice and prioritize topics of future clinical research.
