### ACEVEDO LANE

**Researching Practice** Juta and Company Ltd

This book analyzes recent local government finance reforms in Tanzania, including the introduction of a formula-based system of intergovernmental grants. Due to the scope and speed of Tanzania's local government finance reforms, the country is becoming one of the best-practice examples of fiscal decentralization reform in Africa.

*Career Construction Theory* Ohio University Press

Study & master economic and management sciences grade 8 has been especially developed by an experienced author team for the Curriculum and Assessment Policy Statement (CAPS). This new and easy-to-use course helps learners to master essential content and skills in economic and management sciences.

*Unemployment Insurance Contributions Act, 4 of 2002* HSRC Publishers

This textbook shows how people can and do transform the world through transforming their practices and the practice architectures that shape them, and contributes to contemporary practice theory. It provides an authoritative, comprehensive, and contemporary account of the theory of practice architectures, illustrated through examples drawn from years of research by participants in the Pedagogy, Education, and Praxis international research network from Australia, New Zealand, Finland, Norway, Sweden, the Netherlands, Colombia, and the Caribbean. Its content provides a variety of resources for researchers who are new to research using the theory of practice architectures. It includes tables to assist with the analysis of practices, and provides clear examples to aid understanding and application. This textbook provides readers with a thorough grounding in the theory and ways the theory of practice architectures has been used in investigations of social and educational practice.

*Beyond Memory* Brill / Sense

Academic textbook paper backDescribes a theory of vocational behavior

*491 Days* African Minds

Examines four different ways in which poverty can be measured in South Africa, and presents the findings from each method, mainly using existing Statistics SA data sets.

*Land Redistribution for Agricultural Development* CABI

Seekings and Natrass explain why poverty persisted in South Africa after the transition to democracy in 1994. The book examines how public policies both mitigated and reproduced poverty, and explains how and why these policies were adopted. The analysis offers lessons for the study of poverty elsewhere in the world.

**Renewing Workers' Education** Department of Land Affairs

"Renewing workers' education focuses on educational methods created by workers for workers. It extends beyond trade unions to include a range of educational initiatives aimed at the working class including working class women, casual and informal sector workers, migrant workers, and workers' political parties. This book fills a gap in the South African literature on workers' education and documents the recent history as well as current practices and perspectives, including some international experiences. It explores conceptual tools that may assist in reflecting on and theorising the practice of workers' education and analyses current challenges. This captivating book also seeks to inform future policy and practices on workers' education and is key for those who wish to reinvigorate and contribute to building an alternative future for workers' education." --Back cover.

**Cervical, Breast and Prostate Cancer (Black and White)** World Health Organization

South Africa possesses one of the richest popular music traditions in the world - from marabi to mbaqanga, from boeremusiek to bubblegum, from kwela to kwaito. Yet the risk that future generations of South Africans will not know their musical roots is very real. Of all the recordings made here since the 1930s, thousands have been lost for ever, for the powers-that-be never deemed them worthy of preservation. And if one peruses the books that exist on South African popular music, one still finds that their authors have on occasion jumped to conclusions that were not as foregone as they had assumed. Yet the fault lies not with them, rather in the fact that there has been precious little documentation in South Africa of who played what, or who recorded what, with whom, and when. This is true of all music-making in this country, though it is most striking in the musics of the black communities. *Beyond Memory: Recording the History, Moments and Memories of South African Music* is an invaluable publication because it offers a first-hand account of the South African music scene of the past decades from the pen of a man, Max Thamagana Mojapelo, who was situated in the very thick of things, thanks to his job as a deejay at the South African Broadcasting Corporation. This book - astonishing for the breadth of its coverage - is based on his diaries, on interviews he conducted and on numerous other sources, and we find in it not only the well-known names of recent South African music but a countless host of others whose contribution must be recorded if we and future generations are to gain an accurate picture of South African music history of the late 20th and early 21st centuries.

**Anorexics and Bulimics Anonymous** Springer

A faith based 12 Step program... Directed toward those trapped in the labyrinth of eating disorders, their families, and their therapists, the text lays out in detail the steps taken, the tools used, the love that grew and the healing received. Illustrated with true-life experience and complete with a

compilation of personal stories by individual members.

*Global Tuberculosis Report 2017* Springer

Offers a detailed account of all the most important aspects of the judiciary in South Africa, both now and in the past. Provides a general survey of the judiciary as an institution.

*Event Management and Sustainability* Iconcept Press

The book provides critical and creative input to the discourse on qualitative research methodologies.

**RPL As Specialised Pedagogy** Juta and Company Ltd

Cervical cancer and breast cancer are two of the most common cancers found in women. Cervical cancer is when cancer arises from the cervix. Early on there are typically no symptoms. Later symptoms may include abnormal vaginal bleeding, pelvic pain or pain during sex. Breast cancer is when cancer develops from breast tissue. Signs of breast cancer may include a lump in the breast, a change in breast shape, dimpling of the skin, fluid coming from the nipple, or a red scaly patch of skin. Prostate cancer is when cancer develops in the prostate, a gland in the male reproductive system. It may initially cause no symptoms. In later stages it can cause difficulty urinating, blood in the urine, or pain in the pelvis, back or when urinating. This book provides some latest research and findings on breast cancer, cervical cancer and prostate cancer. The aim of this book is to serve as an important reference book for individuals working in biomedical laboratories, and for clinical professionals. There are totally 13 chapters in this book. Chapter 1 proposes an outlook on different endoscopic surgical procedures to treat cervical cancer, using traditional laparoscopy and robotics. Chapter 2 reviews the clinical results of carbon ion radiotherapy (C-ion RT) for uterine cervical cancer. Carbon-ion RT has been established as a safe short-term treatment for locally advanced uterine cervical cancer. Chapter 3 summarises chrysin inhibits proliferation, induces apoptosis and reduce angiogenesis in most tested cancer cells, including cervical cancer cells. Chapter 4 shows that involving physicians in the promotion of public health programs and initiatives is a viable option. Chapter 5 summarizes the published findings about the controversial role of METCAM, a cell adhesion molecule, in the progression of human breast cancer. Chapter 6 focuses on the biology of "neu" in breast cancer - the potential mechanisms that may contribute to tumor resistance and the numerous uncertainties that persist despite the bona-fide progress made in treating this particular subtype of breast cancer. Chapter 7 describes the mechanisms by which estrogen can exert its role in estrogenresponsive cells, focusing on specific aspects of estrogen receptor signaling. Moreover, this chapter shows how some of the proteins involved in estrogen receptor signaling can be used as predictive markers in breast cancer and describes a proposed clinical study related to the combined use of two drugs (bortezomib and tamoxifen) as therapeutic agents for estrogen receptor negative breast cancers. Chapter 8 summarizes the recent studies indicating that AngII facilitates breast cancer metastasis by contributing to the cross-talk between cancer cells and the host stroma. Chapter 9 focuses on a rationale pharmaceutical development along with a detailed understanding of biological effects so as to accelerate the incorporation of nanocarriers in breast cancer therapy. Chapter 10 summarizes the mTOR pathway and the clinical results in breast cancer treatment, relating them to results obtained using cultured MCF-7 breast cancer tamoxifen resistant sublines. Chapter 11 discusses how to develop a standard extraction method, yielding tomato products which are suitable for cell cultures, and enable product comparison of different tomato varieties. Chapter 12 describes principles and processes that are involved in investigating biological or clinical problems with nuclear magnetic resonance (NMR) based metabolomics - an approach that involves the global analysis of metabolites. The authors use prostate cancer as a case study to outline the processes, applications and potential of metabolomics for inform scientists and clinicians. Chapter 13 discusses the epidemiology, screening, diagnosis and treatment options of prostate cancer and its association with osteoporosis.

*Annual Performance Report* Springer

On a freezing winter's night, a few hours before dawn on May 12, 1969, South African security police stormed the Soweto home of Winnie Madikizela-Mandela, activist and wife of the imprisoned Nelson Mandela, and arrested her in the presence of her two young daughters, then aged nine and ten. Rounded up in a group of other antiapartheid activists under Section 6 of the Terrorism Act, designed for the security police to hold and interrogate people for as long as they wanted, she was taken away. She had no idea where they were taking her or what would happen to her children. For Winnie Mandela, this was the start of 491 days of detention and two trials. Forty-one years after Winnie Mandela's release on September 14, 1970, Greta Soggot, the widow of one of the defense attorneys from the 1969?-70 trials, handed her a stack of papers that included a journal and notes she had written while in detention, most of the time in solitary confinement. Their reappearance brought back to Winnie vivid and horrifying memories and uncovered for the rest of us a unique and personal slice of South Africa's history. *491 Days: Prisoner number 1323/69* shares with the world Winnie Mandela's moving and compelling journal along with some of the letters written between several affected parties at the time, including Winnie and Nelson Mandela, himself then a prisoner on Robben Island for nearly seven years. Readers will gain insight into the brutality she experienced and her depths of despair, as well as her resilience and defiance under extreme pressure. This young wife and mother emerged after 491 days in detention unbowed and determined to continue the struggle for freedom.

**Broadcasting in South Africa**

Internationally, Recognition of Prior Learning (RPL) has become a standard component of education policy reforms aimed at meeting the requirements of a globalised labour market on the one hand, while responding to demands for widening access to further and higher education on the other. However, despite the promises of RPL to enable 'optimal inclusion', this ideal is not easily realised in practice. Drawing on case study research of RPL

practices in four different contexts in South Africa, RPL as Specialised Pedagogy: Crossing the Lines offers a novel theoretical framework for understanding RPL not simply as an assessment practice, but as a specialised pedagogy for navigating knowledge boundaries across different contexts. The book develops a conceptual language for describing what is common and distinctive about RPL practices across different sites and contexts, thus providing a unique contribution to a field that has traditionally been under-theorised. RPL as Specialised Pedagogy will be of significant interest to RPL practitioners and educators, to researchers and students in the field, and to policy researchers and policy makers.

Public Service Act, 1994 (Proclamation 103 of 1994)

Sustainable management is an important consideration for businesses and organisations, and the enormous number of tourism events taking place requiring facilities, power, transport, people and much more makes sustainable event planning a considerable priority. By looking at mega events, sports events, conferences and festivals, this book uses best practice case studies to illustrate sustainable management issues and practical considerations that managers need to apply, providing an essential reference for researchers and students in leisure and tourism.

Debates of the Legislature of the Free State Province (Hansard)

WHO's Global Tuberculosis Report provides a comprehensive and up-to-date assessment of the TB epidemic and of progress in care and prevention at global, regional and country levels. This is done in the context of recommended global TB strategies and associated targets, and broader development goals. For the period 2016-2035, these are WHO's End TB Strategy and the United Nations' (UN) Sustainable Development Goals (SDGs), which share a common aim: to end the global TB epidemic. The main data sources for the report are annual rounds of global TB data collection implemented by WHO's Global TB Program since 1995 and databases maintained by other WHO departments, UNAIDS and the World Bank. In WHO's 2017 round of global TB data collection, 201 countries and territories that account for over 99% of the world's population and TB cases reported data.
