business and still rockin'. The Story Of UFO - A Genuine Rock Phenomenon Thrill Ride Simon and Schuster When it was released in 1955, the film Rebel Without a Cause had a revolutionary impact on moviemaking and youth culture, virtually giving birth to our concept of the American teenager. For the first time, Live Fast, Die Young tells the complete story of the explosive making of Rebel, a film

that has rocked every generation since its release. Set against a backdrop of the Atomic Age and an old Hollywood studio system on the verge of collapse, it vividly evokes the cataclysmic, immensely influential meeting of four of Hollywood's most passionate artists. When James Dean, Natalie Wood, Sal Mineo, and director Nicholas Ray converged, each was at a crucial point in

his or her career. The young actors were grappling with fame, their burgeoning sexuality, and increasingly reckless behavior. As Ray engaged his cast in physical melees and psychosexual seductions of startling intensity, the on- and off-set relationships between his ambitious young actors ignited, sending a shock wave through the film. Through interviews with the surviving

members of the cast and crew and firsthand access to both personal and studio archives, Lawrence Frascella and Al Weisel reveal Rebel's true drama -- the director's affair with sixteen-year-old Wood, his tempestuous "spiritual marriage" with Dean, and his role in awakening the latent homosexuality of Mineo, who would become the first gay teenager to appear on film. Complete with thirty

photographs, including ten never-before-seen photos by famed Dean photographer Dennis Stock, Live Fast, Die Young tells the absorbing inside story of an unforgettable and absolutely essential American film -- a story that is, in many ways, as provocative as the film itself. **High Stakes & Dangerous Men** Monette Draper

New for this edition are hints about digital technologies for planning and navigating while kayak touring as well as lots of tips for outfitting boats, adapting equipment and finessing fishing technique while kayak angling—whether casting and jigging for fun on a day trip or trolling for dinner on a longer expedition. Also fully updated are the sections

on managing risk and the inspiring stories of adventure, including Freya Hoffmeister's record-breaking circumnavigation of Australia and Japanese paddlers' increasingly challenging trips around the islands and beyond. As a sport, sea kayaking continues to evolve. Once the sport of a very few long-distance paddlers embarking on international expeditions, then the recreational

pursuit of many weekend tourers, sea kayaking is now popular with many day trippers as well. As more and more paddlers take to the water—for the day, the weekend or many months, this classic guide continues to be required reading for those seeking adventure on the open ocean. *Ride Out the Storm* Vantage Press This volume contains the lectures and seminars

given at the NATO Advanced Study Institute on "Sensor Systems for Biological Threats: The Algal Toxins Case", held in Pisa, Italy in October, 2007. The Institute was sponsored and funded by the Scientific Affairs Division of NATO. It is my pleasant duty to thank this institution. This ASI offered updated information on how far the research on algal toxins has gone in the

exploration of structures, biosynthesis and regulation of toxins, and the development of technology for bio-monitoring these compounds. Algae can form heavy growths in ponds, lakes, reservoirs and sl- moving rivers throughout the world; algae can house toxins which are usually released into water when the cells rupture or die. Hundreds of toxins have been identified so

far. Detection methods, including rapid screening, have been developed to help us learn more about them, especially to find out which toxins are a real threat for people and what conditions encourage their production and accumulation. Early detection of algal toxins is an important aspect for public safety and natural environment, and significant efforts are underway to

develop effective and reliable tools that can be used for this purpose.

In an era of spectacular thoroughbreds , Spectacular Bid was perhaps the most exalted racehorse of them all. In 1979 he won the Kentucky Derby and the Preakness Stakes--and transcended his sport on a run of twelve consecutive stakes victories--but his quest for the Triple

Crown was lost with a third-place finish in the Belmont Stakes due to a series of bizarre events that have never been accurately reported. In *The Fast Ride*, Jack Gilden tells the story of what really happened that day the Bid lost the biggest race of his life. Along the way, he introduces the reader to a cast of characters from the gilded age of late twentieth-century horse racing, from

Bid's owners, the renowned Meyerhoff family, to Grover "Buddy" Delp, the fast-talking trainer, to teenage jockey Ronnie Franklin, whose meteoric rise to fame aboard Spectacular Bid came at the cost of his innocence and well-being. Also present are four of the era's magnificent Latino riders, Ángel Cordero Jr., Jacinto Vasquez, Georgie Velasquez, and Ruben Hernandez,

who all felt the sting of rejection and bigotry during their long careers even as they found their way and raised the level of competition to a feverish pitch. Underlying Spectacular Bid's saga was a thin line between hard work and excess, including substance abuse, animal manipulation and doping, and race fixing. Hardly anyone in the horse's circle made it out unscathed or undamaged.

The Fast Ride is the story of a great racehorse, unfulfilled dreams, the exhilaration and steep price of striving at all costs, and an American era in which getting everything you ever wanted could be the most empty and unfulfilling sensation of all.

#1 NEW YORK TIMES BESTSELLER • A memoir of leadership and success: The executive chairman of Disney, Time's 2019 businessperson of the year, shares the ideas and values he embraced during his fifteen years as CEO while reinventing one of the world's most beloved companies and inspiring the people who bring the magic to life.

NAMED ONE

OF THE BEST BOOKS OF THE YEAR BY NPR Robert Iger became CEO of The Walt Disney Company in 2005, during a difficult time. Competition was more intense than ever and technology was changing faster than at any time in the company's history. His vision came down to three clear ideas: Recommit to the concept that quality matters, embrace technology instead of fighting it, and think

bigger—think global—and turn Disney into a stronger brand in international markets. Today, Disney is the largest, most admired media company in the world, counting Pixar, Marvel, Lucasfilm, and 21st Century Fox among its properties. Its value is nearly five times what it was when Iger took over, and he is recognized as one of the most innovative and successful CEOs of our era. In The

Ride of a Lifetime, Robert Iger shares the lessons he learned while running Disney and leading its 220,000-plus employees, and he explores the principles that are necessary for true leadership, including: • Optimism. Even in the face of difficulty, an optimistic leader will find the path toward the best possible outcome and focus on that, rather than give in to pessimism

and blaming.

- Courage. Leaders have to be willing to take risks and place big bets. Fear of failure destroys creativity. • Decisiveness. All decisions, no matter how difficult, can be made on a timely basis. Indecisiveness is both wasteful and destructive to morale. • Fairness. Treat people decently, with empathy, and be accessible to them. This book is about the relentless curiosity that has driven Iger for forty-five years,

since the day he started as the lowliest studio grunt at ABC. It's also about thoughtfulness and respect, and a decency-over-dollars approach that has become the bedrock of every project and partnership Iger pursues, from a deep friendship with Steve Jobs in his final years to an abiding love of the Star Wars mythology. "The ideas in this book strike me as universal" Iger writes. "Not just to the

aspiring CEOs of the world, but to anyone wanting to feel less fearful, more confidently themselves, as they navigate their professional and even personal lives."

Tommy Conklin always imagined discovering more than his placid Indiana life had to offer. As a naive nineteen-year-old and scuba enthusiast, he is lured by a government agent into joining an American underwater expedition based in Honduras. After selling all of his possessions to buy a stake in the company and relocating to the island, Tommy quickly learns that, as the

He, in fact, unwittingly becomes a central figure in several local episodes, which magnify into an international incident. Dive into Fathom to discover if Tommy survives his adventures through his

sheer ingenuity and instinct, or succumbs to the overwhelming odds against him. Michael Gaff is a former PADI scuba diving instructor, having taught and certified more than two thousand people. He also assisted hundreds of Indiana and Ohio scuba rescue and body recovery team divers. His diving experiences reach from the more modern shipwrecks of Lake Superior, Lake Michigan

and the Georgian Bay of Lake Erie in Canada to the ancient remnants of Spanish and English galleons beneath the coastal waters of Central and South America. A former airline pilot with Piedmont Airlines and USAirways, he is presently a corporate pilot, flying a Citation business jet. Mr. Gaff resides with his wife Debbie, dog Millie and five cats outside of Chattanooga, Tennessee.

Ocean, from the #1 New York Times bestselling author of *The Perfect Horse* and *The Eighty-Dollar Champion*. “The gift Elizabeth Letts has is that she makes you feel you are the one taking this trip. This is a book we can enjoy always but especially need now.”—Elizabeth Berg, author of *The Story of Arthur Truluv* In 1954, sixty-three-year-old Maine farmer Annie Wilkins embarked on an impossible

journey. She had no money and no family, she had just lost her farm, and her doctor had given her only two years to live. But Annie wanted to see the Pacific Ocean before she died. She ignored her doctor’s advice to move into the county charity home. Instead, she bought a cast-off brown gelding named Tarzan, donned men’s dungarees, and headed south in mid-November, hoping to beat

the snow. Annie had little idea what to expect beyond her rural crossroads; she didn’t even have a map. But she did have her ex-racehorse, her faithful mutt, and her own unfailing belief that Americans would treat a stranger with kindness. Annie, Tarzan, and her dog, Depeche Toi, rode straight into a world transformed by the rapid construction of modern highways. Between 1954 and 1956, the

three travelers pushed through blizzards, forded rivers, climbed mountains, and clung to the narrow shoulder as cars whipped by them at terrifying speeds. Annie rode more than four thousand miles, through America's big cities and small towns. Along the way, she met ordinary people and celebrities—from Andrew Wyeth (who sketched Tarzan) to Art Linkletter and Groucho Marx.

She received many offers—a permanent home at a riding stable in New Jersey, a job at a gas station in rural Kentucky, even a marriage proposal from a Wyoming rancher. In a decade when car ownership nearly tripled, when television's influence was expanding fast, when homeowners began locking their doors, Annie and her four-footed companions inspired an outpouring of neighborliness

in a rapidly changing world.
