An Introduction to Criminology Routledge
This textbook provides an accessible and interdisciplinary introduction to genocide with an emphasis on the criminal aspect of genocide. It draws on sociological, political, and historical concepts to discuss how they contribute to our understanding of genocide as an international crime. It walks students through the evolution of genocide as a criminal act and the legal responses available using case studies to demonstrate how concepts work in action. It combines Criminology and Law, arguing that Criminology can help explain the 'why and how' while Law can explain the responses to crime. This textbook includes a chapter on genocide denial as well as discussion questions at the end of the chapters, boxed examples, and further reading. It speaks to students in Criminology, Law, Socio-Legal Studies, and beyond, as well as to practitioners in the criminal justice field.

Queer criminological work is at the forefront of critical academic criminology, responding to the exclusion of queer communities from criminology, and the injustices that they experience through the criminal justice system. This volume draws together both theoretical and empirical contributions that develop the growing scholarship being produced at the intersection of 'queer' and 'criminology'. Reflecting the diversity of research that is undertaken at this intersection, the contributions to this volume offer a deeper theoretical and conceptual development of this field alongside empirical research that illustrates the continued relevance and urgency of such scholarship. The contributions consider what it means to be queering criminology in the current political, social, and criminological climate, and chart directions along which this field might develop in order to ensure that

greater social and criminal justice for LGBTIQ communities is achieved.

"If you are considering a career in any aspect of criminal justice, and you want to know more about the motivations and socio-psychological makeup of serious offenders, then this book is for you! Introduction to Criminology: Why Do They Do It? applies the dominant theories in the existing criminological literature as to why people commit crimes. In addition, we examine many recent (as well as many hypothetical) examples of serious crimes, and we demonstrate applications of theory as to why the offenders did what they did. While other textbooks do a decent job in discussing the basic theories, as well as exploring the various types of crime, our book integrates various street crimes within each chapter and applies theories that are appropriate in explaining such criminal activity. This is extremely important because most instructors never get to the latter typology chapters in a given semester or term. So our approach is to incorporate them into the theoretical

chapters in which they apply directly to the theories presented. Our specific examples and true stories, such as notable serial killings and other recent crimes, in each chapter, as well as our use of established theoretical models to explain the offenses, is another primary distinction of this book. Obviously, this book is meant to be central to an introductory course in criminology, but due to the emphasis on applied theoretical explanations, it is also appropriate for higher-level undergraduate and graduate courses in criminological theory or as a reference for anyone in the field of criminal justice. In it, we have integrated true crimes (and some hypothetical examples) both on a general level, such as in the Applying Crime to Theory sections, and more specifically in the Why Do They Do It? sections, which often involve serial killings, mass murderers, or other notorious examples of offenders/offending. The subtitle of our book-Why Do They Do It?-relates to our theme. Our goal in writing this book was to apply established theories of crime, which are often seen as abstract and hypothetical, to real crimes that have occurred, as well as to hypothetical ones that are quite likely to occur. To this end, we explore the various reasons for offending, or the "why they do it" in various cases, from the first documented serial killers in the United States-the Harpe Brothers in the late 18th century-to California cop-killer/spree-killer Christopher Dorner in 2013 and then Payton S. Gendron, who massacred 10 Black shoppers at a grocery store in Buffalo, New York in 2022. Importantly, throughout these discussions of actual crimes we will apply theories. As you will see, some of the theories that applied to the earliest crimes seem to apply to the most modern crimes as well. Unlike other authors in this field, we chose not to include separate chapters on violent or property crimes because we have worked those into and applied them to the theories explored in each chapter. We strongly believe that by integrating discussions of such serious crimes-all crimes previously identified by the FBI as Index or Part I offenses, including murder, rape, robbery, aggravated assault, burglary, motor-vehicle theft, larceny, and arson, as well as other crimes such as simple assault and driving under the influence-into the theoretical chapters provides the best exploration of why people commit such offenses. And the flip side is good as well; by discussing offenses together with theories, we show you how to apply theories toward explaining other instances of criminal behavior. Again, this

goes back to our theme of "why do they do it?" It demonstrates our goal: Apply the appropriate theories for the specific crime"--

The 'issue' of the Chittagong Hill Tracts is as divisive as the region itself. At one end there are tales of woe: how the original inhabitants of the region are being evicted from their land through violence and trickery, their marginalization, and elimination of their traditional way of life simultaneously while it is being exoticized for tourism. These accounts, however, paint a static picture where the members of these ethnic groups are victims, always and without any agency. Consequently these accounts fail to hold up in front of close examination and invites counter-opinion rage: that the Bengali and other ethnicities of CHT are prevented from living in harmony by disruptive elements within the society, that the oppression and repression of the hill peoples are made-up stories that feed national and international conspiracies. In 'Conflict Mapping in the Chittagong Hill Tracts,' researchers from the Department of Peace and Conflict Studies at the University of Dhaka cut through this fog of confusion by presenting dispassionate, unornamented data. With the help of original data and systematic analysis, they show how the social life of CHT is marked by deep polarization, both within and across the ethnic divide, how it is beset by real and perceived accounts of discrimination and by lack of confidence on state agencies and the rule of law. They also investigate the trajectory of major cases of violence in the region in the past two decades and reveal that these have a common escalation pattern with various points marked by missed opportunities for prevention. Based on a study that draws from a large survey of a cross section of people from 8 of the most crime-prone Upazilas of the region, semi-structured interview of selected elites and analysis of the dynamics of 14 incidents of large-scale violence between 1997 and

2014, this book aims at initiating a healthy, constructive conversation on the issue. It challenges long-held prejudices, common-sense beliefs and unsubstantiated propaganda. By offering the lens of social science, the book invites readers with well-meaning but vague opinions as well as consumers of zealous and spoon-fed ideas to form informed and nuanced opinion.

Over the last few decades, electronic monitoring has become an important means for combating crime without depriving offenders of their liberty. Any deprivation of liberty inevitably affects social ties, breaks family relations, often causes the loss of a job or a home and harms the prospects for employment and housing after release. It also contributes in general to the social exclusion of offenders and increases the risks of reoffending. The use of electronic monitoring alone can only be effective for reducing the risk of re-offending in the short term. In order to have long-term results and contribute to desistance from crime this supervision measure needs to be combined with treatment and assistance interventions. The need for common standards and principles at European level regarding the use, duration and deontology regarding electronic monitoring has resulted in the adoption of Recommendation CM/Rec(2014)4 of the Committee of Ministers of the Council of Europe.

criminology textbook, now in its third edition, argues that crime must be understood as both a social and a political phenomenon. Using this lens, Marginality and Condemnation contends that what is defined as criminal, how we respond to "crime" and why individuals behave in anti-social ways are often the result of individual and systemic social inequalities and disparities in power. Beginning with an overview of criminological discourse, mainstream approaches and new directions in criminological theory, the book is then divided into sections, based on key social inequalities of class, gender, race and age, each of which begins with an outline of the general issues for understanding crime and an introduction that guides readers through the empirical chapters that follow. The studies provide insights into general issues in criminology, ranging from the historical and current nature of crime and criminal justice to the various responses to criminality. Readers are encouraged and challenged to understand crime and justice through concrete analyses rather than abstract argumentation. In addition to a new introductory chapter that confronts how we define crime, measure crime, and understand and use criminology in this millennium, the third edition provides new chapters examining crime in relation to the environment, terrorism, masculinity, children and youth, and Aboriginal gangs and the legacy of colonialism.
