La fonction du système cardiovasculaire est d'acheminer oxygène et nutriments dans divers organes et de collectionner, en retour, le gaz carbonique. Pour assurer efficacement cette fonction de nutrition et d'entretien, le système cardiovasculaire a besoin de maintenir l'intégrité de sa structure anatomique pour pouvoir répondre aux différentes stimulations hormonales. Nous avons donc rassemblé,

dans ce livre, les données scientifiques très bien connues pour rappeler la structure du système cardiovasculaire et surtout pour souligner les principes qui gouvernent la signalisation dans les cellules cardiovasculaires. Les mécanismes comparables décrits avec d'autres types de cellules ont été aussi rapportés.

D?at de S?rac (1872-1921) is best known for his piano music but his compositions included orchestral and vocal works, including opera, cantata and incidental music. Claude Debussy described S?rac's music as "exquisite and rich with ideas." The early works were influenced by Impressionist harmonies, church modes, cyclic techniques, folk-like melodies and

Andalusian motives. S?rac's style changed dramatically in 1907 when he left Paris and began to include Catalan elements in his compositions - a transition that has hitherto gone unrecognized. Robert Waters provides a much-needed study of the life and works of S?rac, focusing on the composer's regionalist philosophy. S?rac's engagement with folk music was not a patriotic gesture in the vein of nationalistic composers, but a way of expressing regional identity within France to counter the restrictive styles sanctioned by the Paris Conservatory. His musical philosophy mirrored larger social and political debates regarding anti-centralist positions on education, politics, art and culture in fin de si?e France. Such debates involved political and social leaders whom S?rac knew and personally admired, including the writer Maurice Barr?and the poet Fr?ric Mistral. The book will appeal to those specializing in French music, European ethnic musics, piano music and French music history.

*Research in the History of Economic Thought and Methodology* Routledge The Retirement Series documents Jefferson's written legacy between his return to private life on 4 March 1809 and his death on 4 July 1826. During this period Jefferson founded the University of Virginia and sold his extraordinary library to the nation, but his greatest legacy from these years is the astonishing depth and breadth of his correspondence with statesmen, inventors, scientists, philosophers, and ordinary citizens on topics spanning virtually every field of human endeavor.--From publisher description.
