The claim that 'LGBT rights are human rights' encounters fierce opposition in many parts of the world, as governments and religious leaders have used resistance to 'LGBT rights' to cast themselves as defenders of traditional values against neo-colonial interference and western decadence.

Queer Wars explores the growing international polarization over sexual rights, and the creative responses from social movements and activists, some of whom face murder, imprisonment or

rape because of their perceived sexuality or gender expression. This book asks why sexuality and gender identity have become so vexed an issue between and within nations, and how we can best advocate for change.

The Imagination of the New Left SAGE

Shortlisted for the 2005 British Academy Book prize, Nicola Lacey's entrancing biography recounts the life of H.L.A. Hart, the pre-eminent legal philosopher of the twentieth century.

Following Hart's life from modest origins as the son of Jewish tailor parents in Yorkshire to worldwide fame as the most influential English-speaking legal theorist of the post-War era, the

book traces his successive metamorphoses; from Yorkshire schoolboy to Oxford scholar, from government intelligence officer to Professor of Jurisprudence, from awkward batchelor to family figurehead. In the tradition of Ray Monk's biography of Wittgenstein, Nicola Lacey paints an absorbing picture of intellectual and psychological development, of a mind struggling to cope with intellectual self-doubt, uncertain sexuality, a difficult marriage and an anti-semitic society. In depicting the evolution of Hart's life and mind, Lacey provides a vivid recreation of both the intellectual and social climate of Oxford in the post-War era.

"The Imagination of the New Left" brings to life the social movements and events of the 1960s that made it a period of world-historical importance: the Prague Spring; the student movements in Mexico, Japan, Sri Lanka, Italy, Yugoslavia, and Spain; the Test Offensive in Vietnam and guerilla movements in Latin America; the Democratic Convention in Chicago; the assassination of Martin Luther King; the near-revolution in France of May 1968; and the May 1970 student strike in the United States. Despite its apparent failure, the New Left represented a global transition to a newly defined cultural and political epoch, and its impact continues to be felt today.

This book describes the constitutions of six major federations and how they have been interpreted by their highest courts, compares the interpretive methods and underlying principles that have guided the courts, and explores the reasons for major differences between these methods and principles. Among the

interpretive methods discussed are textualism, purposivism, structuralism and originalism. Each of the six federations is the subject of a separate chapter written by a leading authority in the field: Jeffrey Goldsworthy (Australia), Peter Hogg (Canada), Donald Kommers (Germany), S.P. Sathe (India), Heinz Klug (South Africa), and Mark Tushnet (United States). Each chapter describes not only the interpretive methodology currently used by the courts, but the evolution of that methodology since the constitution was first enacted. The book also includes a concluding chapter which compares these methodologies, and attempts to explain variations by reference to different social, historical, institutional and political circumstances.

Going to the Dogs is set in Berlin after the crash of 1929 and before the Nazi takeover, years of rising unemployment and financial collapse. The moralist in question is Jakob Fabian, "aged thirty-two, profession variable, at present advertising copywriter . . .

weak heart, brown hair," a young man with an excellent education but permanently condemned to a low-paid job without security in the short or the long run. What's to be done? Fabian and friends make the best of it—they go to work though they may be laid off at any time, and in the evenings they go to the cabarets and try to make it with girls on the make, all the while making a lot of sharp-sighted and sharp-witted observations about politics, life, and love, or what may be. Not that it makes a difference.

Workers keep losing work to new technologies while businessmen keep busy making money, and everyone who can goes out to dance clubs and sex clubs or engages in marathon bicycle events, since so long as there's hope of running into the right person or (even) doing the right thing, well—why stop? Going to the Dogs, in the words of introducer Rodney Livingstone, "brilliantly renders with tangible immediacy the last frenetic years [in Germany] before 1933." It is a book for our time too. *Violence and Serious Theft* University of Michigan Press
'An invaluable survey of

the origins and development of the European Parliament, and of its uncertain role in narrowing the gap between European institutions and voters. Julie Smith traces the rising influence of the European Parliament over EU policy-making in the 20 years since it was first elected, the extension of its authority through successive Intergovernmental Conferences, and the ambiguities which nevertheless persist over its legitimacy as representing 'the people' in its dialogue with the Commission and Council.'

WILLIAM WALLACE 'Julie Smith places the fifth direct elections to the European Parliament in the broader context of the EU's development. She examines the arguments and debates which surrounded the creation and evolution of a unique institution, considers the effects which direct elections have had - not always those expected - and the growing relations between EP political groups and national parties. She argues that national politicians should more openly acknowledge the shift in the balance of powers which European integration has caused.'

The Constitutionalization of the World Trade Organization Routledge This is the second edition of this wide-ranging survey of EU law. The new edition has been significantly enlarged. Unlike many other EU law books it takes full account not only of the Lisbon Treaty changes to the EU treaties, but also of the fact that the EU Charter of Fundamental Rights now has the same legal value as the EU Treaties. It therefore not only covers the relevant case law of the Court of Justice of the European Union, but also ties that case law into the decisions of the European Court of Human Rights, because it is clear that EU law can only now properly be understood and applied against this background of European fundamental rights jurisprudence. The book sets out very clearly the broad shape of the European Union's legal systems, while also giving the reader a good feel for the policy motivations in the Court of Justice of the

European Union and the scope of EU legislative activity. Written in a lively and accessible style, it is an ideal guide for practitioners, whether those coming to the subject for the first time or those already with a background in EU law. Among the additions and changes in this expanded edition the book includes new chapters on the EU and fundamental rights, on commercial agency, on criminal law and on private international law in the EU. It also contains a full treatment of EU equality law. The first edition 'EC Law for UK Lawyers' by Aidan O'Neill and Jason Coppel (ISBN: 9780406024596) was published by Butterworths in 1994.

The Cambridge Yearbook of European Legal Studies provides a forum for the scrutiny of significant issues in European Union Law, the Law of the Council of Europe, and Comparative Law with a "European" dimension, and particularly those which have come to the fore during the year preceding publication. The contributions appearing in the collection are commissioned by the Centre for European Legal

Studies (CELS) Cambridge, which is the research Centre of Cambridge University Law Faculty specialising in European legal issues. The papers presented are all at the cutting edge of the fields which they address, and reflect the views of recognised experts drawn from the University world, legal practice, and the civil services of both the EU and its Member States. Inclusion of the comparative dimension brings a fresh perspective to the study of European law, and highlights the effects of globalisation of the law more generally, and the resulting cross fertilisation of norms and ideas that has occurred among previously sovereign and separate legal orders. The Cambridge Yearbook of European Legal Studies is an invaluable resource for those wishing to keep pace with legal developments in the fast moving world of European integration. Mosse, one of this century's great historians, finished writing his memoir, a fascinating and fluent account of a remarkable life that spanned three continents and many of the major events of the twentieth century. Writing about the events of his life through a historian's lens, Mosse gives us a personal history of our century. This is a story told with the clarity, passion, and verve that entranced thousands of Mosse's students and that countless readers have

found, and will continue to find, in his scholarly books. This book describes Mosse's opulent childhood in Weimar Berlin; his exile in Paris and England, including boarding school and study at Cambridge University; his second exile in the U.S. at Haverford, Harvard, Iowa, and Wisconsin; and his extended stays in London and Jerusalem. Mosse also deals with matters of personal identity. He discusses being a Jew and his attachment to Israel and Zionism. He addresses his gayness, his coming out, and his growing scholarly interest in issues of sexuality. This touching memoir, sometimes harrowing, often humorous, is guided in part by Mosse's belief that "what man is, only history tells," and by his constant themes of the fate of liberalism, the defining events that can bring about the generational political awakenings of youth (from the anti-fascism struggles of the 1930s to the campus anti-war movement of the 1960s, the meanings of masculinity and racial and sexual stereotypes, the enigma of exile, and - most of all - the importance of finding

one's self through the pursuit of truth, and through an honest and unflinching analysis of one's place in the context of the times.

Life Style and Criminality sellier. european law publ. This book deals with the rules that are in force in Europe for juvenile offenders. The aim of the rules is to uphold the rights and safety of juvenile offenders subject to sanctions or measures and to promote their physical, mental and social well-being when subject to community sanctions or measures, or any form of deprivation of liberty. It is based on Recommendation Rec(2008)11 of the Committee of Ministers of the Council of Europe on the European Rules for juvenile offenders subject to sanctions or measures, which was adopted on 5 November 2008. The first part of the book contains the text of the recommendation and is followed by a commentary which explains in finer detail the rules and the points raised by the text. The final section provides an analysis of the national replies to a questionnaire related to the treatment of juvenile offenders. This work will be of interest to human rights scholars,

researchers and students of law, criminology and international relations. Enabling Social Europe Bloomsbury Publishing This is a comprehensive history of political violence during Europe's incredibly violent twentieth century. Leading scholars examine the causes and dynamics of war, revolution, counterrevolution, genocide, ethnic cleansing, terrorism and state repression. They locate these manifestations of political violence within their full transnational and comparative contexts and within broader trends in European history from the beginning of the dissolution of the Ottoman Empire in the late nineteenth-century, through the two world wars, to the Yugoslav Wars and the rise of fundamentalist terrorism. The book spans a 'greater Europe' stretching from Ireland and Iberia to the Baltic, the Caucasus, Turkey and the southern shores of the Mediterranean. It sheds new light on the extent to which political violence in twentieth-century Europe was inseparable from the generation of new forms of state power and their projection into other

societies, be they distant territories of imperial conquest or ones much closer to home.

Interpreting Constitutions
Springer

First published in 1999, this volume is a series of essays on the countries of Central Europe. The essays explore the post-1989 establishment of the rule of law and civil society. It brings together analysis and perceptions from social scientists, political scientists and lawyers, seeking through particular issues to explore the similarities and differences between different countries. While other books have explored the changes in former Soviet Block countries since 1989, the book's distinctiveness lies in three qualities: its concentration on Central Europe a concept explored in the book; giving fuller attention to the Czech Republic and Slovakia than other post-communist studies often do; providing perceptions of scholars from different disciplines.

The WTO is generally seen as a key actor of globalization and, as such, has been the point of convergence of popular irritation worldwide. Many

of the reproaches addressed to the WTO show civil society's concern with what is perceived as a democratic deficit in the way the organization operates. The main fear is to see trade rise as the ultimate value, prevailing over concerns such as health and environment. The *Role of the Judge* offers insight into how disputes are solved at the WTO level, into how the judicial branch interacts with the rest of the organization, and into the degree of sensitivity of the system to external input. The book sheds light on the judicial system governing the WTO and shows it to be the only truly multilateral system where disputes are solved by third-party adjudication. The book develops along three lines: the first a search for cases submitted to the WTO where the judge exceeded its authority; the second a comparison of the WTO with the operations of national judicial systems having different levels of integration, specifically the United States (federal level) and the EC (quasi-federal level); and the third an exploration of directions for the future of dispute settlement in the WTO. Reflecting the

diversity of its contributors, this book addresses questions of economics, political science, and law, bringing an unusual level of multidisciplinary to this topic and context. It is designed for both academic readers and practitioners, who will find it full of practical insights as well as rich and detailed analysis. Thomas Cottier is Professor of European and International Economic Law, University of Bern, and Managing Director, World Trade Institute, University of Bern. Petros C. Mavroidis is Professor of Law, University of Neuchâtel. He formerly worked in the Legal Affairs Division of the World Trade Organization. Patrick Blatter is Mavroidis's scientific collaborator.

Research on law's relationship with time has flourished over the past decade. This edited collection aims to put law and time scholarship into wider context, advancing conversations on time and temporalities between socio-legal scholars, anthropologists, sociologists, geographers and historians. Through a

diverse range of contributions, the collection explores how legal modalities of time emerge and have effects within wider clusters of social and political action. Themes include: law's diverse roles in maintaining linear historicist models of time; law's participation in the materialisation of times; and the unsteady effects of temporal pluralism and polytemporalities in law. De-naturalising the 'time' in law and time scholarship, this collection positions time as something that can be enacted and materialised as well as experienced, with distinct implications for questions of social justice.

Multilingual Interpretation of European Union Law

The Alternative Investment Fund Managers Directive (AIFMD) may be the most important European asset management regulation of the early 21st century. However, a preponderance of practitioners and academics in the field argue that, in its present form, the directive is seriously out of touch with both the system of European financial law and industry practice. In this first in-depth analytical and critical discussion of the content and system of the directive, thirty-four contributing authors – academics, lawyers, consultants, fund supervisors, and fund industry experts – examine the AIFMD from every angle. They cover structure, regulatory history, scope, appointment and authorization of the manager, rules on delegation, reporting requirements, transitional provisions, and the objectives stipulated in the recitals and other official documents. The

challenging implications and contexts they examine include the following: connection with systemic risk and the financial crisis; impact on money laundering and financial crime; nexus with insurance for negligent conduct; connection with corporate governance doctrine; risk management; transparency; the cross-border dimension; liability for lost assets; and impact on alternative investment strategies. Ten country reports add a national perspective to the discussion of the European regulation. These chapters deal with the potential interactions among the AIFMD and the relevant laws and regulations of Italy, Switzerland, Luxembourg, The Netherlands, Austria, Liechtenstein, the United Kingdom, Germany, France, and Ireland. The former are Europe's most vibrant financial centres and markets. Designed to spur a critical attitude towards the emerging new European financial markets framework presaged by the AIFMD, this much-needed discussion not only elaborates on the inconsistencies and difficulties sure to be encountered when

applying the directive, but also provides potential solutions to the problems it raises. The book will be warmly welcomed by investors and their counsel, fund managers, depositaries, asset managers, and administrators, as well as academics in the field.

Law and Time New York Review of Books Rev. ed. of : The foundations of European Community law / by T.C. Hartley. 6th ed. c2007. International Criminal Evidence OECD Publishing 'Enabling Social Europe' examines how the paradigm of the 'enabling welfare state' might offer a new perspective for European social policy in the decades to come. The 'enabling' concept is perceived as going beyond that of mere 'activation', thus also embracing policies aimed at increasing personal autonomy, individual responsibility and social

inclusion by endowing individuals with the resources and capabilities needed to manage and balance their life courses in a better way. The study is distinguished by a unique collaboration of social and economic policy experts coming from a wide range of disciplines: economics, law, sociology, political science, and philosophy. The authors seek to shed new light on whether European social policy ought to play a role in the future and, if so, what sort of role that could be. They convincingly argue that despite an implicit normative consensus on the 'European social model', there is still room for a multifaceted world in which welfare regimes can maintain their own path-dependent ways of achieving a fair and just society with a high level of welfare for all. The empirical part of the book

contains an appraisal of policies and reforms with a view to the 'enabling welfare state' approach in four important policy areas: health care, old-age security, family policy, and poverty prevention. Within each sector, the authors compare the policies and practices of two countries attributable to different regime types: Germany and the United Kingdom, Poland and Germany, Finland and Estonia, and Belgium and Denmark. This book is highly recommendable not only for scholars and policymakers active in this field, but also for students of welfare and labour economics, sociology, social policy, political science and law. *The Legislative History of the International Criminal Court* Council of Europe Recoge: 1.
