The story of how one man cut down a single tree to see how many things could be made from it. Out of all the trees in the world, the ash is most closely bound up with who we are: the tree we have made the greatest and most varied use of over the course of human history. One frigid winter morning, Robert Penn lovingly selected an ash tree and cut it down. He wanted to see how many beautiful, handmade objects could be made from it. Thus begins an adventure of craftsmanship and discovery. Penn visits the shops of modern-day woodworkers—whose expertise has been handed down through generations—and finds that ancient woodworking techniques are far from dead. He introduces artisans who create a flawless axe handle, a rugged and true wagon wheel, a deadly bow and arrow, an Olympic-grade toboggan, and many other handmade objects using their knowledge of ash's unique properties. Penn connects our daily lives back to the natural woodlands that once dominated our landscapes. Throughout his travels—from his home in Wales, across Europe, and America—Penn makes a case for the continued and better use of the ash tree as a sustainable resource and reveals some of the dire threats to our ash trees. The emerald ash borer, a voracious and destructive beetle, has killed tens of millions of ash trees across North America since 2002. Unless we are prepared to act now and better value our trees, Penn argues, the ash tree and its many magnificent contributions to mankind will become a thing of the past. This exuberant tale of nature, human ingenuity, and the pleasure of

making things by hand chronicles how the urge to understand and appreciate trees still runs through us all like grain through wood.

Burlington has welcomed local farms, breweries and distilleries with open arms. The Queen City fosters a unique culture around beer and farm-to-table cuisine. Daniel Standiford established the city's first brewery in 1880. Prohibition ushered in a dry era that remained for more than a century until Greg and Nancy Noonan fought the law and established Vermont Pub & Brewery in the late 1980s. Since then, breweries have popped up, from nationally recognized Magic Hat down to the city's first blendery, House of Fermentology. Authors Adam Krakowski and Jeff S. Baker II explore Burlington's sudsy history from early newspaper clippings to modern-day tastemakers, along with some delicious recipes.

The Publishers' Trade List Annual Atria Books

A book for makers, for seekers of all kinds, an exhilarating look into the heart and soul of artisans—and how their collective wisdom can inspire us all. "Despite our technological advances, we're busier than ever, our lives more frazzled. That's why the handmade object, created with care and detail, embodying a history and a tradition, is enormously powerful. It can cut through so much and speak in ways that we don't often hear, or that we've forgotten." —Eric Gorges, from *A Craftsman's Legacy* In this joyful celebration of skilled craftsmen, Eric Gorges, a corporate-refugee-turned-metal-shaper, taps into a growing hunger to get back to what's real. Through visits with fellow artisans—calligraphers, potters, stone carvers, glassblowers, engravers, woodworkers, and more—many of whom he's profiled for his popular television program, Gorges identifies values that are useful for all of us: taking time to slow down and enjoy the process, embracing failure, knowing when to stop and when to push through, and accepting that perfection is an illusion. Most of all, *A Craftsman's Legacy* shows how all of us can embrace a more creative and authentic life and learn to focus on doing what we love.

Why We Make Things and Why it Matters W. W. Norton & Company

In a world without wood, we might not be here at all. Without wood, we wouldn't have had the fire, heat, and shelter that allowed us to expand into the colder regions of the planet. If civilization somehow did develop, our daily lives still would be vastly different: there would be no violins, baseball bats, chopsticks, or wine corks. The book you are now holding wouldn't exist. At the same time, many of us are removed from the world where wood is shaped and celebrated every day. That world is inhabited by a unique assortment of eccentric craftsmen and passionate enthusiasts who have created some of the world's most beloved musical instruments, feared weapons, dazzling architecture, sacred relics, and bizarre forms of transportation. In *A Splintered History of Wood*, Spike Carlsen has uncovered the most outlandish characters and examples, from world-champion chainsaw carvers to blind woodworkers, the Miraculous Staircase to the Lindbergh kidnapping case, and many more, in a passionate and personal exploration of nature's greatest gift.

**3D Printers for Woodworkers** McGraw-Hill/Contemporary  
Why do we make things? Why do we choose the emotionally and physically demanding work of bringing new objects into the world with creativity and skill? Why does it matter that we make things well? What is the nature of work? And what is the nature of a good life? This January, whether you're honing your craft or turning your hand to a new skill, discover the true value in what it means to be a craftsman in a mass-produced world. Part memoir, part polemic, part philosophical reflection, this is a book about the process of creation. For woodworker Peter Korn, the challenging work of bringing something new and meaningful into the world through one's own efforts is exactly what generates authenticity, meaning, and fulfillment, for which many of us yearn. This is not a 'how-to' book in any sense, Korn wants to get at the 'why' of craft in particular, and the satisfaction of creative work in general, to understand its essential nature. How does the making of objects shape our identities? How do the products of creative work inform society? In short, what does the process of making things reveal to us about ourselves? Korn draws on four decades of hands-on experience to answer these questions eloquently in this heartfelt, personal and revealing book. 'If you are in the building trade or just love creating things as a hobby, you will find this book fascinating' *The Sun*

After two New York Times bestsellers, Nick Offerman—woodworker, actor, comedian, and co-host of NBC's crafting competition series *Making It*—returns with the subject for which he's known best—his incredible real-life woodshop. Nestled among the glitz and glitter of Tinseltown is a testament to American elbow grease and an honest-to-god hard day's work: *Offerman Woodshop*. Captained by hirsute woodworker, actor, comedian, and writer Nick Offerman, the shop produces not only fine handcrafted furniture, but also fun stuff—kazoos, baseball bats, ukuleles, mustache combs, even cedar-strip canoes. Now Nick and his ragtag crew of champions want to share their experience of working at the Woodshop, tell you all about their passion for the discipline of woodworking, and teach you how to make a handful of their most popular projects along the way. This

book takes readers behind the scenes of the woodshop, both inspiring and teaching them to make their own projects and besotting them with the infectious spirit behind the shop and its complement of dusty wood-elves. In these pages you will find a variety of projects for every skill level, with personal, easy-to-follow instructions by the OWS woodworkers themselves; and, what's more, this tutelage is augmented by mouth-watering color photos (Nick calls it "wood porn"). You will also find writings by Nick, offering recipes for both comestibles and mirth, humorous essays, odes to his own woodworking heroes, insights into the ethos of woodworking in modern America, and other assorted tomfoolery. Whether you've been working in your own shop for years, or if holding this stack of compressed wood pulp is as close as you've ever come to milling lumber, or even if you just love Nick Offerman's brand of bucolic yet worldly wisdom, you'll find *Good Clean Fun* full of useful, illuminating, and entertaining information.

William Coperthwaite is a teacher, builder, designer, and writer who for many years has explored the possibilities of true simplicity on a homestead on the north coast of Maine. In the spirit of Henry David Thoreau, Emily Dickinson, and Helen and Scott Nearing, Coperthwaite has fashioned a livelihood of integrity and completeness—buying almost nothing, providing for his own needs, and serving as a guide and companion to hundreds of apprentices drawn to his unique way of being. *A Handmade Life* carries Coperthwaite's ongoing experiments with hand tools, hand-grown and gathered food, and handmade shelter, clothing, and furnishings out into the world to challenge and inspire. His writing is both philosophical and practical, exploring themes of beauty, work, education, and design while giving instruction on the hand-crafting of the necessities of life. Richly illustrated with luminous color photographs by Peter Forbes, the book is a moving and inspirational testament to a new practice of old ways of life.

IN GRANDPA'S WORKSHOP, the tools tell stories. Some have sailed the Seven Seas, some have passed from hand to hand through the centuries. This is the story of a family of woodworkers stretching back into history. I, Sylvain, am the youngest. I spend vacations in Grandpa's shop. He gives me scraps of wood to build little houses and boats. But most importantly, I listen to my Grandpa, Pèpère, and the stories of his tools, our ancestors, and

the elves in his shop.
