The EBMT Handbook Oxford University Press

How propaganda undermines democracy and why we need to pay attention Our democracy today is fraught with political campaigns, lobbyists, liberal media, and Fox News commentators, all using language to influence the way we think and reason about public issues. Even so, many of us believe that propaganda and manipulation aren't problems for us—not in the way they were for the totalitarian societies of the mid-twentieth century. In *How Propaganda Works*, Jason Stanley demonstrates that more attention needs to be paid. He examines how propaganda operates subtly, how it undermines democracy—particularly the ideals of democratic deliberation and equality—and how it has damaged democracies of the past. Focusing on the shortcomings of liberal democratic states, Stanley provides a historically grounded introduction to democratic political theory as a window into the misuse of democratic vocabulary for propaganda's selfish purposes. He lays out historical examples, such as the restructuring of the US public school system at the turn of the twentieth century, to explore how the language of democracy is sometimes used to mask an undemocratic reality. Drawing from a range of sources, including feminist theory, critical race theory, epistemology, formal semantics, educational theory, and social and cognitive psychology, he explains how the manipulative and hypocritical declaration of flawed beliefs and ideologies arises from and perpetuates inequalities in society, such as the racial injustices that commonly occur in the United States. *How Propaganda Works* shows that an understanding of propaganda and its mechanisms is essential for the preservation and protection of liberal democracies everywhere.

Middle Range Theory for Nursing Benjamin-Cummings Publishing Company

Animals and Women is a collection of pioneering essays that explores the theoretical connections between feminism and animal defense. Offering a feminist perspective on the status of animals, this unique volume argues persuasively that both the social construction and oppressions of women are inextricably connected to the ways in which we comprehend and abuse other species. Furthermore, it demonstrates that such a focus does not distract from the struggle for women's rights, but rather contributes to it. This wide-ranging multidisciplinary anthology presents original material from scholars in a variety of fields, as well as a rare, early article by Virginia Woolf. Exploring the leading edge of the species/gender boundary, it addresses such issues as the relationship between abortion rights and animal rights, the connection between woman-battering and animal abuse, and the speciesist basis for much sexist language. Also considered are the ways in which animals have been regarded by science, literature, and the environmentalist movement. A striking meditation on women and wolves is presented, as is an examination of sexual harassment and the taxonomy of hunters and hunting. Finally, this compelling collection suggests that the subordination and degradation of women is a prototype for other forms of abuse, and that to deny this connection is to participate in the continued mistreatment of animals and women.

Feminist Epistemology and Philosophy of Science Verlag Barbara Budrich

In this major book Martha Nussbaum, one of the most innovative and influential philosophical voices of our time, proposes a kind of feminism that is genuinely international, argues for an ethical underpinning to all thought about development planning and public policy, and dramatically moves beyond the abstractions of economists and philosophers to embed thought about justice in the concrete reality of the struggles of poor women. Nussbaum argues that international political and economic thought must be sensitive to gender difference as a problem of justice, and that feminist thought must begin to focus on the problems of women in the third world. Taking as her point of departure the predicament of poor women in India, she shows how philosophy should undergird basic constitutional principles that should be respected and implemented by all governments, and used as a comparative measure of quality of life across nations.

How Propaganda Works Pearson

Make ethical ideas accessible to students *Ethics: Theory and Practice* introduces ethical theory and its applications in a way that beginning students can understand. Delivering a balanced overview of the discipline, authors Jacques Thiroux and Keith Krasemann devote eight chapters to key ethical theories — including both Western and non-Western ethical theories and moral perspectives. The subsequent eight chapters are dedicated

to applied ethics, focusing on topics such as euthanasia, abortion, bioethics, and business ethics. Eight closing appendices on Thiroux's theory of Humanitarian Ethics and the application of this theory to moral problems further encourage students to focus on applying ethical theory in real-world scenarios.

Humiliation, Degradation, Dehumanization Univ of California Press Having enjoyed more than twenty years of development, feminist epistemology and philosophy of science are now thriving fields of inquiry, offering current scholars a rich tradition from which to draw. In addition to a recognition of the power of knowledge itself and its effects on women's lives, a central feature of feminist epistemology and philosophy of science has been the attention they draw to the role of power dynamics within knowledge-seeking practices and the implications of these dynamics for our understandings of knowledge, science, and epistemology. **Feminist Epistemology and Philosophy of Science: Power in Knowledge** collects new works that address today's key challenges for a power-sensitive feminist approach to questions of knowledge and scientific practice. The essays build upon established work in feminist epistemology and philosophy of science, offering new developments in the fields, and representing the broad array of the feminist work now being done and the many ways in which feminists incorporate power dynamics into their analyses.

Biomedical Ethics and the Law Penguin

Although Austrian writer Ingeborg Bachmann (1926--1973) is widely regarded as one of the most important twentieth-century authors writing in German, her novels and stories have sometimes been viewed narrowly as portraits of women as victims. In this innovative study, Sara Lennox provides a much broader perspective on Bachmann's work, at the same time undertaking an experiment in feminist methodology. Lennox examines Bachmann's poetry and prose in historical context, arguing that the varied feminist interpretations of her writings are the result of shifts in theoretical emphases over a period of more than three decades. Lennox then places her own essays on Bachmann in similar perspective, showing how each piece reflects the historical moment in which it was written. Making use of recent interdisciplinary approaches -- Foucauldian theories of sexuality, post-colonial theory, materialist feminism -- she explores the extent to which each of her earlier readings was shaped by the methods employed, the questions asked, and the political issues that seemed most germane at the time. Out of this analysis comes a new understanding of the significance of Bachmann's work and new insight into the theory and practice of feminist criticism.

Guide for the Care and Use of Laboratory Animals Jones & Bartlett Learning

Learn about ethical theory and how these theories apply to contemporary moral debates using MacKinnon's acclaimed *ETHICS: THEORY AND CONTEMPORARY ISSUES*, Concise, International Edition. This book expertly balances ethical theory with today's most relevant moral issues, including torture, "partial birth" abortion, cloning, same-sex marriage, and Wikipedia and Google.

Animals and Women Springer Science & Business Media

In this edited volume, leading environmental policy experts from China, USA, and Europe provide a contemporary view of Chinese environmental policy, analyzing current discussions among various actors and agencies. The book covers a wide range of topics including the gap between national policy goals and their local implementation, cultural and social factors shaping political behavior, legal and political systems affecting environmental policy creation and execution, new societal forces participating in environmental policymaking and governance, and local state strategies tasked with navigating a mix of political, legal, and societal forces. Featuring in-depth, empirically-grounded analyses with interdisciplinary approaches, the book is ideal reading for scholars interested in the complex nature of balancing Chinese environmental sustainability and economic growth.

Ethics Environmental Politics and The

Ambitious legal thinkers have become mesmerized by moral philosophy, believing that great figures in the philosophical tradition hold the keys to understanding and improving law and justice and even to resolving the most contentious issues of constitutional law. They are wrong, contends Richard Posner in this book. Posner characterizes the current preoccupation with moral and constitutional theory as the latest form of legal

mystification--an evasion of the real need of American law, which is for a greater understanding of the social, economic, and political facts out of which great legal controversies arise. In pursuit of that understanding, Posner advocates a rebuilding of the law on the pragmatic basis of open-minded and systematic empirical inquiry and the rejection of cant and nostalgia--the true professionalism foreseen by Oliver Wendell Holmes a century ago. A bracing book that pulls no punches and leaves no pieties unpunctured or sacred cows unkicked, *The Problematics of Moral and Legal Theory* offers a sweeping tour of the current scene in legal studies--and a hopeful prospect for its future.

China's Environmental Crisis Springer Publishing Company A respected resource for decades, the *Guide for the Care and Use of Laboratory Animals* has been updated by a committee of experts, taking into consideration input from the scientific and laboratory animal communities and the public at large. The Guide incorporates new scientific information on common laboratory animals, including aquatic species, and includes extensive references. It is organized around major components of animal use: Key concepts of animal care and use. The Guide sets the framework for the humane care and use of laboratory animals. Animal care and use program. The Guide discusses the concept of a broad Program of Animal Care and Use, including roles and responsibilities of the Institutional Official, Attending Veterinarian and the Institutional Animal Care and Use Committee. Animal environment, husbandry, and management. A chapter on this topic is now divided into sections on terrestrial and aquatic animals and provides recommendations for housing and environment, husbandry, behavioral and population management, and more. Veterinary care. The Guide discusses veterinary care and the responsibilities of the Attending Veterinarian. It includes recommendations on animal procurement and transportation, preventive medicine (including animal biosecurity), and clinical care and management. The Guide addresses distress and pain recognition and relief, and issues surrounding euthanasia. Physical plant. The Guide identifies design issues, providing construction guidelines for functional areas; considerations such as drainage, vibration and noise control, and environmental monitoring; and specialized facilities for animal housing and research needs. The Guide for the Care and Use of Laboratory Animals provides a framework for the judgments required in the management of animal facilities. This updated and expanded resource of proven value will be important to scientists and researchers, veterinarians, animal care personnel, facilities managers, institutional administrators, policy makers involved in research issues, and animal welfare advocates.

CP1222 - Introduction to Human Behaviour Harvard University Press

From respected philosopher and writer Jonathan Wolff, this brief introduction to ethics stimulates independent thought, emphasizes real-world examples, and provides clear and engaging introductions to key moral theories and the thinkers behind them. The new Second Edition offers expanded coverage of moral reasoning, as well as two thoughtful and contemporary new chapters on applying moral philosophy and the ethics of race. A companion primary source collection, *Readings in Moral Philosophy*, amplifies issues discussed in the text, connecting them to problems in applied ethics.

The Problematics of Moral and Legal Theory John Wiley & Sons Why do we look to lawyers to lead, and why do so many of them prove to be so untrustworthy and unprepared? In *Lawyers as Leaders*, eminent law professor Deborah Rhode not only answers these questions but crafts an essential manual for attorneys who need to develop better leadership skills.

How to Live a Good Life Springer Science & Business Media This timely collection offers a fresh look on the impact of gender perspectives in the discipline of political science at the beginning of the 21st century. Jane Bayes combats the Eurocentric focus that has characterised both fields and suggests viable alternatives for the future of the disciplines.

Legal and Ethical Issues for Health Professionals National Academies Press

This comprehensive Handbook is the first to provide a practical, interdisciplinary review of ethical issues as they relate to quantitative methodology including how to present evidence for reliability and validity, what comprises an adequate tested population, and what constitutes scientific knowledge for eliminating biases. The book uses an ethical framework that emphasizes the human cost of quantitative decision making to help researchers understand the specific implications of their choices. The order of the Handbook chapters parallels the chronology of the research process: determining the research

design and data collection; data analysis; and communicating findings. Each chapter: Explores the ethics of a particular topic Identifies prevailing methodological issues Reviews strategies and approaches for handling such issues and their ethical implications Provides one or more case examples Outlines plausible approaches to the issue including best-practice solutions. Part 1 presents ethical frameworks that cross-cut design, analysis, and modeling in the behavioral sciences. Part 2 focuses on ideas for disseminating ethical training in statistics courses. Part 3 considers the ethical aspects of selecting measurement instruments and sample size planning and explores issues related to high stakes testing, the defensibility of experimental vs. quasi-experimental research designs, and ethics in program evaluation. Decision points that shape a researchers' approach to data analysis are examined in Part 4 - when and why analysts need to account for how the sample was selected, how to evaluate tradeoffs of hypothesis-testing vs. estimation, and how to handle missing data. Ethical issues that arise when using techniques such as factor analysis or multilevel modeling and when making causal inferences are also explored. The book concludes with ethical aspects of reporting meta-analyses, of cross-disciplinary statistical reform, and of the publication process. This Handbook appeals to researchers and practitioners in psychology, human development, family studies, health, education, sociology, social work, political science, and business/marketing. This book is also a valuable supplement for quantitative methods courses required of all graduate students in these fields.

Sexual Harassment of Working Women SAGE Publications, Incorporated

Legal and Ethical Issues for Health Professionals, Fifth Edition is a concise and practical guide to legal and ethical dilemmas facing healthcare professionals in the real-world today. Thoroughly updated and featuring new case studies, this dynamic text will help students to better understand the issues they will face on the job and the implications in the legal arena. With contemporary topics, real-world examples, and accessible language, this comprehensive text offers students an applied

perspective and the opportunity to develop critical thinking skills. Legal and Ethical Issues for Health Professionals provides an effective transition from the classroom to the reality of a clinical environment.

A Gift of Fire Wadsworth Publishing

Human rights offer a vision of international justice that today's idealistic millions hold dear. Yet the very concept on which the movement is based became familiar only a few decades ago when it profoundly reshaped our hopes for an improved humanity. In this pioneering book, Samuel Moyn elevates that extraordinary transformation to center stage and asks what it reveals about the ideal's troubled present and uncertain future.

An Introduction to Moral Philosophy Princeton University Press

This Open Access edition of the European Society for Blood and Marrow Transplantation (EBMT) handbook addresses the latest developments and innovations in hematopoietic stem cell transplantation and cellular therapy. Consisting of 93 chapters, it has been written by 175 leading experts in the field. Discussing all types of stem cell and bone marrow transplantation, including haplo-identical stem cell and cord blood transplantation, it also covers the indications for transplantation, the management of early and late complications as well as the new and rapidly evolving field of cellular therapies. This book provides an unparalleled description of current practices to enhance readers' knowledge and practice skills. This work was published by Saint Philip Street Press pursuant to a Creative Commons license permitting commercial use. All rights not granted by the work's license are retained by the author or authors.

Handbook of Ethics in Quantitative Methodology Springer

A collection of essays by fifteen philosophers presenting a thoughtful, introductory guide to choosing a philosophy for living an examined and meaningful life. Socrates famously said "the unexamined life is not worth living," but what does it mean to truly live philosophically? This thought-provoking, wide-ranging collection brings together essays by fifteen leading philosophers reflecting on what it means to live according to a philosophy of life. From Eastern philosophies (Daoism, Confucianism, and

Buddhism) and classical Western philosophies (such as Aristotelianism and Stoicism), to the four major religions, as well as contemporary philosophies (such as existentialism and effective altruism), each contributor offers a lively, personal account of how they find meaning in the practice of their chosen philosophical tradition. Together, the pieces in *How to Live a Good Life* provide not only a beginner's guide to choosing a life philosophy but also a timely portrait of what it means to live an examined life in the twenty-first century. A VINTAGE ORIGINAL

Ethics for the Information Age Yale University Press

This is the first book to comprehensively analyse integrity in international justice. Thirty-three chapters discuss in-depth the meaning of integrity, awareness and culture of integrity, the roles of international organizations and states as well as international courts in enhancing integrity, integrity as seen through the lens of cases, and the relationship between the principles of independence and integrity. The book considers integrity as a legally binding standard in international courts, while including perspectives from other disciplines such as philosophy, history, psychology and religion. It argues that respect for integrity among high officials and staff members is a prerequisite for international courts and other international organizations to fulfil their mandates. The authors include the prominent judges Hans Corell, Richard J. Goldstone, Hanne Sophie Greve, Ivana Hrdličková, Erik Møse and David Re, and 37 other leading actors and experts in the field of international justice: Adedeji Adegunle, Jonathan Agar, Marina Aksenova, Antonio Angotti, Mohamed Badar, Morten Bergsmo, Vieri Biondi, Julija Bogoeva, Emiliano J. Buis, Andrew T. Cayley CMG QC, Dieneke T. de Vos, Viviane E. Ditttrich, David Donat Cattin, Gunnar Ekeløve-Slydal, Polona Florijančič, Jan Fougner, Shannon Fyfe, Gregory S. Gordon, Alexander Heinze, Marta Hirsch-Ziembinska, Brigid Inder OBE, Karim A.A. Khan, Cyril Laucci, Adel Maged, Teresa McHenry, Suhail Mohammed, Salim A.
