[The Life Cycle of a Sea Turtle](#) Astra Publishing House

A mother turtle swims to shore. She digs a hole in a dune where she lays one hundred eggs. Following her instinct, she covers the eggs with sand and slowly makes her way back to sea. What happens next, from eggs

to hatchlings, is one of the most extraordinary occurrences in nature. For the eggs provide food for other animals, and the eggs that survive produce hatchlings that, again, provide food for birds and crabs. Even those hatchlings that make it to the ocean face an uncertain future. Lyrical text and dramatic paintings give young readers an understanding of how turtles give birth and how the young fight for survival in this winner of the Maryland Blue Crab Young Readers' Award.
