COHEN ELVIS

American Machinist Rowman & Littlefield

Engineering the Revolution documents the forging of a new relationship between technology and politics in Revolutionary France, and the inauguration of a distinctively modern form of the “technological life.” Here, Ken Alder rewrites the history of the eighteenth century as the total history of one particular artifact—the gun—by offering a novel and historical account of how material artifacts emerge as the outcome of political struggle. By expanding the “political” to include conflict over material objects, this volume rethinks the nature of engineering rationality, the origins of mass production, the rise of meritocracy, and our interpretation of the Enlightenment and the French Revolution.

War Expenditures Stackpole Books

The name Remington is synonymous with the history of the United States, from the Civil War, the two world wars, and every skirmish in between . . . to outlaws beyond the pale, and the law enforcement officers hired to catch them. The name is equally synonymous with hunting, from casual afternoons plinking by a pond, to deer hunting in Pennsylvania, to hunting elk and antelope in the West. The History of Remington Firearms follows the rise of the company, from Eliphalet Remington’s first handmade gun in 1816, to the dominance of the Remington factories during the early industrial era, with lavish custom-made pieces for heroes and statesmen, with the triumph of the common man’s gun, and with the little .22, which became a part of so many childhoods. It is also a history of innovation, of the rush to create, with the development of the first hammerless repeater, the first slide-action rifle, advances in boring, and revolutions in ammunition. And the modern classics, like the 870 pump-action “Wingmaster” shotgun, and the Model 700 bolt-action rifle. Complete with more than 150 full-color photographs, including designer drawings and pictures of the gun in use throughout history, The History of Remington Firearm is a collector’s edition for gun enthusiasts and historians alike.

The Gun Digest Book of Rimfire Rifles Assembly/Disassembly Krause Publications

Prior to 1862, when the Department of Agriculture was established, the report on agriculture was prepared and published by the Commissioner of Patents, and forms volume or part of volume, of his annual reports, the first being that of 1840. Cf. Checklist of public documents ... Washington, 1895, p. 148.
