The definitive report on what caused America's economic meltdown and who was responsibleThe financial and economic crisis has touched the lives of millions of Americans who have lost their jobs and their homes, but many have little understanding of how it happened. Now, in this very accessible report, readers can get

the facts. Formed in May 2009, the Financial Crisis Inquiry Commission (FCIC) is a panel of 10 commissioners with experience in business, regulations, economics, and housing, chosen by Congress to explain what happened and why it happened. This panel has had subpoena power that enabled them to interview people and examine documents that no reporter had access to. The FCIC has reviewed millions of pages of documents, and interviewed more than 600 leaders, experts, and participants in the financial markets and government regulatory agencies, as well as individuals and businesses affected by the crisis. In the

tradition of The 9/11 Commission Report, "The Financial Crisis Inquiry Report" will be a comprehensive book for the lay reader, complete with a glossary, charts, and easy-to-read diagrams, and a timeline that includes important events. It will be read by policy makers, corporate executives, regulators, government agencies, and the American people. *The Financial Crisis Inquiry Report*, Authorized Edition Red Wheel/Weiser

This new edition provides an accessible guide to advances in neuroscience research and what they reveal about intelligence. Compelling evidence shows that genetics plays a major role as intelligence develops from childhood, and that intelligence test scores correspond strongly to specific features of the brain assessed with neuroimaging. In detailed yet understandable language, Richard J. Haier explains cutting-edge techniques based on DNA and imaging of brain connectivity and function. He dispels common misconceptions – such as the belief that IQ tests are biased or meaningless. Readers will learn about the real possibility of

dramatically enhancing intelligence and the positive implications this could have for education and social policy. The text also explores potential controversies surrounding neuro-poverty, neuro-socioeconomic status, and the morality of enhancing intelligence for everyone.

Based upon the most extensive early banking archive known to survive, this book is the first major study of

Stuart banking since R. D. Richards's *The Early History of Banking in England* (1928). It traces the origins and growth of banking from the late sixteenth century to the 1720s through two generations of a scriveners' bank established in 1638 by Robert Abbott, and perpetuated by his nephew, Robert Clayton, and John Morris. With deposits from landowners' rents and stock sales these bankers practised as moneylenders and money-brokers for another sector of the gentry needing capital to offset the effects of the Great Rebellion and an agricultural depression. After 1660 Clayton and Morris integrated mortgage security into banking practice. This study

examines the elaborate stages of land assessment and legal change which enabled bankers to offer large-scale, long-term securities to their clients, a pattern followed later by other banks such as Childs, Hoares, Martins and

Coutts.
