Advanced Unigraphics NX2 Modeling and Assemblies is the first book to organize advanced NX2 techniques by job type. The Advanced NX2 book is designed for intermediate and advanced users of NX2 software who want to learn professional techniques which will help them work smarter and faster. This Unigraphics book covers advanced topics in modeling and assemblies, and special techniques required to render geometry from various industries. The book specifically focuses on complex surfacing techniques, sheet metal parts, advanced assemblies and advanced techniques to design consumer products and injection molded parts. Content for this Advanced NX2 book is based on requests we received from numerous readers of our

popular basic books, Practical Unigraphics NX and NX2 Modeling for Engineers. Like our training classes, this book is project-oriented. The exercises provided in this book are classroom tested, and are guaranteed to give you the knowledge you need to learn advanced NX2 techniques.

Second language phonology is approached in this book from the perspective of data-based studies into the English sound system as used by native and non-native speakers of the

language. The book offers a unique combination of psycholinguistic, sociolinguistic and pedagogical approaches, with individual contributions investigating the effect of selected conditioning factors on the pronunciation of English. With all the richness of approaches, it is a strong phonetic background that unifies individual contributions to the volume. Thus, the book contains a large body of original, primary research which will be of interest to experienced scientist, practitioners and lecturers as well as graduate students planning to embark on empirical methods of investigating the nature of the sound system With Online Practice for Speakerts of Spanish. English Pronunciation Instruction: Research-based insights presents recent research on L2 English pronunciation including pedagogical implications and applications, and seeks to bridge the gulf between pronunciation research and teaching practice. The volume's 15 chapters cover a range of aspects that are central to pronunciation teaching, including the teaching of different segmental and suprasegmental features, teachers' and learners' views and practices, types and sources of learners' errors, feedback and assessment, tools and strategies for pronunciation instruction, reactions towards accented speech, as well as the connection between research and teaching. Chapters offer a fully developed section on pedagogical implications with

insightful suggestions for classroom instruction. This format and the variety of topics will be informative for researchers, language teachers, and students interested in English pronunciation, as it explores the diverse challenges learners of different L1 backgrounds face, and also provides research-informed techniques and recommendations on how to cope with them.

`Extremely comprehensive and well written in terms of style – accessible to the reader, but intelligent and expressing some fairly subtle concepts. Would that more ELT practitioners could do the same!... Certainly a good read for those thinking about and also those engaged in initial training – or even post

initial training stage' - Jenny Pugsley, Head of TESOL, Trinity College London 'It's essential reading whether you are simply curious about what is involved in training in ELT, need advice on choosing the right course, have already enrolled and want to make the most of your course, or are a new teacher just starting out. It's a book I wish I'd had when I was starting out in my ELT career, and that I wish had been available to many of the course participants I have tutored' - Lyn Strutt, ELT author and Chair of the British Council Families Association Each year, thousands of people all over the world take one of the hundreds of available short pre-service courses that lead to the award of a certificate in English Language Teaching (ELT) or Teaching English to Speakers of Other

Languages (TESOL). Caroline Brandt's book is an invaluable guide to anyone thinking of enrolling on one of these courses. With a clear and concise structure that follows your general interest in TESOL right through to the intricacies of the course itself, it can be used from initial research stages to final qualifications, and beyond. Brandt's decades of experience in this field across the globe shine through. Chapters include: -introducing English Language Teaching -becoming qualified -knowing your certificate course -getting started - learning -working together -being qualified. Throughout the book there are snapshots of students' experiences in their own words, and summaries of key points for you to take with you - whether into the next stage of learning or the

next day's teaching. The chapters are stand alone resources as well as the building blocks to becoming a fully-qualified English Language teacher. The book is supported by a companion website, which provides quizzes to test understanding of each chapter, lesson plan proformas, a full glossary and annotated website links.

The Grammar and Lexis of Conversational Informal English in Advanced Textbooks defends the view that the acquisition of conversational English depends highly on the kind of materials available to L2 learners. The need to acquire a proficient competence in English is growing exponentially in an incessantly demanding society, but it is the oral skill, and more specifically the ability to communicate in everyday situations, that learners are calling for. The current learning process, nonetheless, is not particularly effective, as is shown in the data collected by the Eurobarometer and published in June 2012, which shows that only 38% of the Europeans surveyed were able to maintain a conversation in English, although 67% believed it to be the most

useful language to learn for personal development. The present study supports the idea expressed in The Common European Framework of Reference for Languages, which states that a language is learnt “reactively, following the instructions and carrying out the activities prescribed for them by teachers and by textbooks” (2001: 141). Consequently, these materials should reflect the everyday use of informal discourse and allow learners to analyse, understand and interpret the different underlying messages conveyed by means of lexico-syntactic, as well as paralinguistic, elements. The book is divided into seven chapters in which various different linguistic aspects of conversation are dealt with. In the opening chapters, spoken language is

presented and approached as a multidimensional entity, particularly as the sum of lexico-syntactic and socio-linguistic elements. The following chapters provide a description of the main characteristics of conversational English based on corpus-informed grammars and publications. The final chapter analyses twenty ESL textbooks in order to determine how corpus data has influenced the materials designed for the acquisition of conversational discourse.

Vocabulary in Use Intermediate Reference and Practice for Students of North American English Science, engineering, and technology permeate nearly every facet of modern life and hold the key to solving many of humanity's most pressing current and future challenges. The United States' position in the global economy is declining, in part because U.S. workers lack fundamental knowledge in these fields. To address the critical issues of U.S. competitiveness and to better prepare the workforce, A Framework for K-12 Science Education proposes a new approach to K-12 science education that

will capture students' interest and provide them with the necessary foundational knowledge in the field. A Framework for K-12 Science Education outlines a broad set of expectations for students in science and engineering in grades K-12. These expectations will inform the development of new standards for K-12 science education and, subsequently, revisions to curriculum, instruction, assessment, and professional development for educators. This book identifies three dimensions that convey the core ideas and practices around which science and engineering education in these grades should be built. These three dimensions are: crosscutting concepts that unify the study of science through their common application across science and

engineering; scientific and engineering practices; and disciplinary core ideas in the physical sciences, life sciences, and earth and space sciences and for engineering, technology, and the applications of science. The overarching goal is for all high school graduates to have sufficient knowledge of science and engineering to engage in public discussions on science-related issues, be careful consumers of scientific and technical information, and enter the careers of their choice. A Framework for K-12 Science Education is the first step in a process that can inform state-level decisions and achieve a research-grounded basis for improving science instruction and learning across the country. The book will guide standards developers, teachers, curriculum

designers, assessment developers, state and district science administrators, and educators who teach science in informal environments.

This book introduces the theoretical and empirical bases for the definition of language learning level in functional 'Can Do' terms for the English Profile Programme, setting out the ambitions of the Programme and presenting emerging findings. The English Profile Programme is an elaboration of the performance level descriptions of the Common European Framework of Reference for Languages (CEFR) that is concerned specifically with the English language. The CEFR has become influential in building a shared understanding of performance levels for foreign language learners. However, there is a considerable gap between the broad descriptions of levels provided, which covers a range of languages and learning contexts, and the level of detail

required for applications such as syllabus or test design, which this volume addresses. With its combination of theoretical insights and practical advice, this is a useful work for

academics, policy-makers, curriculum designers, textbook writers, postgraduate students and examination board staff.
