This book provides a broad overview of the key concepts in public archaeology, a research field that examines the relationship between archaeology and the public, in both theoretical and

practical terms. While based on the long-standing programme of undergraduate and graduate teaching in public archaeology at UCL's renowned Institute of Archaeology, the book also takes into account the growth of scholarship from around the world and seeks to clarify what exactly 'public archaeology' is by promoting an inclusive, socially and politically engaged vision of the discipline. Written for students and practitioners, the individual chapters provide textbook-level introductions to the themes, theories and controversies that connect archaeology to wider society, from the trade in illicit antiquities to the use of digital media in

public engagement, and point readers to the most relevant case studies and learning resources to aid their further study. This book was produced as part of JISC's Institution as e-Textbook Publisher project. Find out more at <https://www.jisc.ac.uk/rd/projects/institution-as-e-textbook-publisher> Praise for Key Concepts in Archaeology 'Littered throughout with concise and well-chosen case studies, Key Concepts in Public Archaeology could become essential reading for undergraduates and is a welcome reminder of where archaeology sits in UK society today.' In this wide-ranging work on Greek religion and mythology, Jan N. Bremmer brings together his stimulating and innovative articles, which have all been updated and revised where necessary. In three thematic sections, he analyses central aspects of Greek religion, beginning with the gods and heroes and paying special attention to the unity of the divine nature and the emergence of the category 'hero'. The second section begins with a discussion of the nature of polis religion, continues with various facets, such as seers,

secrecy and the soul, and concludes with the influence of the Ancient Near East. The third section studies human sacrifice and offers the most recent analysis of the ideal animal sacrifice, combining literature, epigraphy, iconography, and zooarchaeology. Regarding human sacrifice, it concentrates on the famous cases of Iphigeneia and the werewolves of Mount Lykaion. The fourth and final section investigates key elements of Greek mythology, such as the definition of myth and its relationship to ritual, and ends with a brief history of the study of Greek mythology. The multi-disciplinary approach and rich footnotes

make this work a must for anybody interested in Greek religion and mythology.

Philip P. Betancourt revolutionised the study of Minoan pottery--just one of the many aspects of his career that led to his Gold Medal for Distinguished Archaeological Achievement. This volume presents some of the most recent studies in Minoan pottery using the techniques and methodologies pioneered by Betancourt. An essential collection for any scholar of Minoan pottery or of Aegean Prehistory in general.

The Bronze Age Palace at Knossos Routledge
Das Reallexikon der Germanischen Altertumskunde trägt den Namen seines Begründers, des Anglisten und Naturwissenschaftlers Johannes Hoops. Zwischen 1972 und 2008 erschienen in zweiter, vollkommen veränderter Auflage 35 Bände sowie zwei Registerbände. Konzipiert als Handbuch, steht der Hoops in der Tradition umfangreicher Enzyklopädien: Ziel ist es, den gesamten Kenntnisstand zur Germanischen Altertumskunde umfassend und kritisch zu präsentieren. Sein interdisziplinärer Ansatz schließt Ergebnisse aus den Bereichen Kunstgeschichte,

Rechtsgeschichte,
Volkskunde und
Religionswissenschaft
mit ein.

In its analysis of the
archaeologies and
histories of the
northern fringe of
Europe, this book
provides a focus on
animistic-shamanistic
cosmologies and the
associated
human-environment
relations from the
Neolithic to modern
times. The North has
fascinated Europeans
throughout history, as
an enchanted world of
natural and
supernatural marvels:
a land of light and
dark, of northern lights
and the midnight sun,
of witches and magic
and of riches ranging

from amber to oil.
Northern lands conflate
fantasies and realities.
Rich archaeological,
historical, ethnographic
and folkloric materials
combine in this book
with cutting-edge
theoretical
perspectives drawn
from relational
ontologies and
epistemologies,
producing a fresh
approach to the
prehistory and history
of a region that is
pivotal to
understanding Europe-
wide processes, such
as Neolithization and
modernization. This
book examines the
mythical and actual
northern worlds, with
northern relational
modes of perceiving
and engaging with the
world on the one hand
and the 'place' of the
North in European
culture on the other.

This book is an indispensable read for scholars of archaeology, anthropology, cultural studies and folklore in northern Europe, as well as researchers interested in how the North is intertwined with developments in the broader European and Eurasian world. It provides a deep-time understanding of globally topical issues and conflicting interests, as expressed by debates and controversies around Arctic resources, nature preservation and indigenous rights. *Nature* Reaktion Books "Edited anthology of 73 previously published texts on the theory and practice of the conservation and management of archaeological sites"-- Provided by publisher.

Mediterranean Peoples in Transition Fordham Univ Press

The standard work on the archaeology of ancient Sicily, Holloway's now updated study provides the only comprehensive introduction to the wealth of artefacts and monuments discovered on the island.

Pottery and Society Yale University Press Aegean prehistory has developed over the 20th century into a distinctive and vibrant area of archaeological research. The past few decades, in particular, have seen a dramatic reorientation and expansion of goals and methods as well as a flood of new fieldwork in the Aegean. Keeping abreast of these new developments has become a daunting

task. Aegean Prehistory: A Review contains detailed syntheses of research, originally published in the American Journal of Archaeology and newly updated here. The volume conveys the diversity and richness of current approaches to the discipline of Aegean prehistory whilst also marshalling an enormous amount of information pertaining to field projects, museum studies, analyses of materials and texts, and supporting theories of interpretation. An introduction by Tracey Cullen places the review articles in historical perspective, tracing the evolution of Aegean prehistory from the 19th century to the present. The author also considers the

current status of the discipline--its relationships with classical archaeology and anthropology, and the manner in which it is shaped by various sociopolitical forces. Aegean Prehistory: A Review is a powerful research tool for the exploration of Aegean themes. With its expansive and detailed coverage, the book constitutes essential reading for professionals and students of Aegean prehistory. It will also be of great interest to all who wish to learn more about intellectual trends and current discoveries in this part of the Mediterranean. Perhaps most important, Aegean Prehistory: A Review provides a solid foundation upon which Aegean archaeology

can build as it continues to thrive in the coming years. The Journal of Hellenic Studies UCL Press

In a crucial shift within posthumanistic media studies, Bernhard Siegert dissolves the concept of media into a network of operations that reproduce, displace, process, and reflect the distinctions fundamental for a given culture. *Cultural Techniques* aims to forget our traditional understanding of media so as to redefine the concept through something more fundamental than the empiricist study of a medium's individual or collective uses or of its cultural semantics or aesthetics. Rather, Siegert seeks to relocate media and culture on a level where the distinctions

between object and performance, matter and form, human and nonhuman, sign and channel, the symbolic and the real are still in the process of becoming. The result is to turn ontology into a domain of all that is meant in German by the word *Kultur*. Cultural techniques comprise not only self-referential symbolic practices like reading, writing, counting, or image-making. The analysis of artifacts as cultural techniques emphasizes their ontological status as "in-betweens," shifting from firstorder to second-order techniques, from the technical to the artistic, from object to sign, from the natural to the cultural, from the operational to the representational.

Cultural Techniques ranges from seafaring, drafting, and eating to the production of the sign-signal distinction in old and new media, to the reproduction of anthropological difference, to the study of trompe-l'oeils, grids, registers, and doors. Throughout, Siegart addresses fundamental questions of how ontological distinctions can be replaced by chains of operations that process those alleged ontological distinctions within the ontic. Grounding posthumanist theory both historically and technically, this book opens up a crucial dialogue between new German media theory and American postcybernetic discourses.

Balister
When Shelley Wachsmann began his analysis of the small ship model excavated by assistants of famed Egyptologist W. M. F. Petrie in Gurob, Egypt, in 1920, he expected to produce a brief monograph that would shed light on the model and the ship type that it represented. Instead, Wachsmann discovered that the model held clues to the identities and cultures of the enigmatic Sea Peoples, to the religious practices of ancient Egypt and Greece, and to the oared ships used by the Bronze Age Mycenaean Greeks. Although found in Egypt, the prototype of the Gurob model was clearly an Aegean-style galley of a type used

by both the Mycenaeans and the Sea Peoples. The model is the most detailed representation presently known of this vessel type, which played a major role in changing the course of world history. Contemporaneous textual evidence for Sherden—one of the Sea Peoples—settled in the region suggests that the model may be patterned after a galley of that culture. Bearing a typical Helladic bird-head decoration topping the stempost, with holes along the sheer strakes confirming the use of stanchions, the model was found with four wheels and other evidence for a wagon-like support structure, connecting it with European cultic prototypes. The online

resources that accompany the book illustrate Wachsmann's research and analysis. They include 3D interactive models that allow readers to examine the Gurob model on their computers as if held in the hand, both in its present state and in two hypothetical reconstructions. The online component also contains high-resolution color photos of the model, maps and satellite photos of the site, and other related materials. Offering a wide range of insights and evidence for linkages among ancient Mediterranean peoples and traditions, The Gurob Ship-Cart Model and Its Mediterranean Context presents an invaluable asset for anyone interested in

the complexities of cultural change in the eastern Mediterranean at the end of the Bronze Age and the beginning of the Iron Age. The Gurob ship-cart model is/was part of an exhibition entitled Beyond the Nile: Egypt and the Classical World, at the J. Paul Getty Center (March 27-September 9, 2018). Read about it here:

Reallexikon der germanischen Altertumskunde

Routledge

"In this groundbreaking study, Vernant

declinates a compelling new vision of ancient Greece. Myth and Society takes us far from the calm and familiar images of Polykleitos and the Parthenon, and reveals to us a fundamentally other culture--one of slavery, of blood sacrifice, of perpetual and ritualized warfare, of ceremonial hunting and ecstasies."--

Publisher's description.

Empires of the Silk Road

Princeton University Press

Situated at the disciplinary boundary between prehistory and history, this book presents a new

synthesis of Late Bronze Age and Early Iron Age Greece, from the rise and fall of Mycenaean civilization to the emergence of city-states in the Archaic period. These

centuries saw the growth and decline of varied political systems and the development of networks across local, regional, and Mediterranean scales. As a groundbreaking study of landscape, interaction, and sociopolitical change, *Societies in Transition in Early Greece* systematically bridges the divide between the Mycenaean period and the Archaic Greek world to shed new light on an often-overlooked period of world history. "This book reconfigures our understanding of early Greece on a regional level, beyond Mycenaean 'palaces' and across temporal boundaries. Alex Knodell's sophisticated arguments enable a fresh reading of the emergence of early

Greek polities, revealing the microregions that put to the test overarching 'Mediterranean' models. His detailed study makes a convincing return to a comparative framework, integrating a 'small world' network and its trajectory with the larger picture of ancient complex societies." SARAH MORRIS, Steinmetz Professor of Classical Archaeology and Material Culture, University of California, Los Angeles "A comprehensive, thoughtful treatment of the time period before the crystallization of the ancient Greek city states." WILLIAM A. PARKINSON, Curator and Professor, The Field Museum and University of Illinois at Chicago "An important

and must-read account. The strength of this book lies in its close analysis of the important different regional characteristics and evolutionary trajectories of Greece as it transforms into the Archaic and, later, the Classical world.”

DAVID B. SMALL,

Texas A&M University Press

One of the great seats of learning and repositories of knowledge in the ancient world, Alexandria, and the great school of thought to which it gave its name, made a vital contribution to the development of intellectual and cultural

heritage in the Occidental world. This book brings together twenty papers delivered at a symposium held at the J. Paul Getty Museum on the subject of Alexandria and Alexandrianism. Subjects range from “The Library of Alexandria and Ancient Egyptian Learning” and “Alexander’s Alexandria” to “Alexandria and the Origins of Baroque Architecture.” With nearly two hundred illustrations, this handsome volume presents some of the world’s leading scholars on the continuing influence and fascination of this great city. The distinguished contributors include Peter Green, R. R. R. Smith, and the late

Bernard Bothmer.

Pre-palatial

The first complete history of Central Eurasia from ancient times to the present day, *Empires of the Silk Road* represents a fundamental rethinking of the origins, history, and significance of this major world region. Christopher Beckwith describes the rise and fall of the great Central Eurasian empires, including those of the Scythians, Attila the Hun, the Turks and Tibetans, and Genghis Khan and the Mongols. In addition, he explains why the heartland of Central Eurasia led the world economically, scientifically, and artistically for many centuries despite

invasions by Persians, Greeks, Arabs, Chinese, and others. In retelling the story of the Old World from the perspective of Central Eurasia, Beckwith provides a new understanding of the internal and external dynamics of the Central Eurasian states and shows how their people repeatedly revolutionized Eurasian civilization. Beckwith recounts the Indo-Europeans' migration out of Central Eurasia, their mixture with local peoples, and the resulting development of the Graeco-Roman, Persian, Indian, and Chinese civilizations; he details the basis for the thriving economy of premodern Central Eurasia, the economy's disintegration following the region's partition by the Chinese and

Russians in the eighteenth and nineteenth centuries, and the damaging of Central Eurasian culture by Modernism; and he discusses the significance for world history of the partial reemergence of Central Eurasian nations after the collapse of the Soviet Union. *Empires of the Silk Road* places Central Eurasia within a world historical framework and demonstrates why the region is central to understanding the history of civilization.

Redefining Archaeology

Beyond Vision is the first English-language collection of essays on art by Pavel Florensky (1882–1937), Russian philosopher, priest, linguist, scientist, mathematician – and

art historian. In addition to seven essays by Florensky, the book includes a biographical introduction and an examination of Florensky's contribution as an art historian by Nicoletta Misler. *Beyond Vision* reveals Florensky's fundamental attitudes to the vital questions of construction, composition, chronology, function and destination in the fields of painting, sculpture and design. His reputation as a theologian and philosopher is already established in the English-speaking world, but this first collection in English of his art essays (translated by Wendy Salmond) will be a revelation to those in the field. Pavel Florensky was a true

polymath: trained in mathematics and philosophy at Moscow University, he rejected a scholarship in advanced mathematics in order to study theology at the Moscow Theological Academy. He was also an expert linguist, scientist and art

historian. A victim of the Soviet government's animosity towards religion, he was condemned to a Siberian labor camp in 1933 where he continued his work under increasingly difficult circumstances. He was executed in 1937.
