Katie's Diary is a unique analysis of the diary left behind by a young woman who has committed suicide. As compared to suicide notes, which are typically brief, Katie's diary consists of five separate books, an opportunity to look into the mind of a suicide from a source of data that is extraordinarily rare. Commenting on the diary are professionals in the fields of suicidology, linguistics, women's studies, Jungian analysis and voice therapy, among others. Suicidal themes that prevail in her writing are discussed, as well as potential treatment methods in the hopes that the study will contribute to suicide prevention.

Contributions in this volume demonstrate how, across the ancient Mediterranean and over hundreds of years, women's rituals intersected with the political, economic, cultural, or religious spheres of their communities in a way that has only recently started to gain sustained academic attention. The volume aims to tease out a number of different approaches and contexts, and to expand

existing studies of women in the ancient world as well as scholarship on religious and social history. The contributors face a famously difficult task: ancient authors rarely recorded aspects of women's lives, including their songs, prophecies, and prayers. Many of the objects women made and used in ritual were perishable and have not survived; certain kinds of ritual objects (lowly undecorated pots, for example) tend not even to be recorded in archaeological reports. However, the broad range of contributions in this volume demonstrates the multiplicity of materials that can be used as evidence – including inscriptions, textiles, ceramics, figurative art, and written sources – and the range of methodologies that can be used, from analysis of texts, images, and material evidence to cognitive and comparative approaches.

Focusing on the "long" nineteenth century, from the French Revolution to the beginnings of Modernism, this book examines the significance of memory in this era of turbulent social change. Through investigation of science, literature, history and the visual arts, the authors explore theories of memory and the cultural and literary resonances of memorializing. Drawing on the work of many of the most influential literary figures of the period, such as Tennyson, Scott, and Hardy, *Memory and Memorials* explores key topics such as: gender and memory; Victorian psychological theories of memory; and cultural constructions in literature, science, history and architecture. *Memory and Memorials: From the French Revolution to World War One* employs a range of new and influential interdisciplinary methodologies. It offers both a fresh theoretical understanding of the period, and a wealth of empirical material of use to the historian, literary critic or social psychologist. Matthew Campbell lectures in English literature at the University of Sheffield. He is the author of *Rhythm and Will in Victorian Poetry*. Jacqueline M. Labbe is senior lecturer in English at

Warwick University. She is the author of *The Romantic Paradox: Love, Violence and the Uses of Romance, 1760-1830*. Sally Shuttleworth is professor of modern literature at the University of Sheffield. She is the author of *Charlotte Brontë and Victorian Psychology*.

This book introduces a new way of looking at how poems mean, drawing on the framework first developed in the author's book *Critical Stylistics*, but applied here to aesthetic more than ideological meaning. The aim is to empower readers of poetry to articulate the features of poetic language that they come across and explain to themselves and others why these features convey the meanings that they do. While this volume focuses on contemporary poets writing in English and mostly based in the UK and Ireland, the framework will work just as well for other eras' poetry, as well as for other cultures and languages.

The collections of prayers, blessings and hymns indicate that fixed prayers were already customary within Judaism during the period of the Second Temple within sectarian circles. In the light of the prayer texts from Qumran the author conducts a systematic study of Jewish prayer beginning with its biblical traditions, through its development during the Second Temple period, and down to rabbinic prayer.

Vocal music was at the heart of English Renaissance poetry and drama. Virtuoso actor-singers redefined the theatrical culture of William Shakespeare and his peers. Composers including William Byrd and Henry Lawes shaped the transmission of Renaissance lyric verse. Poets from Philip Sidney to John Milton were fascinated by the disorienting influx of musical performance into their works. Musical performance was a driving force behind the period's theatrical and poetic movements, yet its importance to literary history has long been ignored or effaced. This book reveals the impact of vocalists and composers upon the poetic culture of early modern England by studying the media through which—and by whom—its songs were made. In a literary field that was never confined to writing, media were not limited to material texts. Scott Trudell argues that the media of Renaissance poetry can be conceived as any node of transmission from singer's larynx to actor's body. Through his study of song, Trudell outlines a new approach to Renaissance poetry and drama that is grounded not simply in performance history or book history but in a more synthetic media history.

In *Black and Gold* indicates that opposed styles of poetry reveal subterranean correspondences that occasionally meet and run together. Austerity or tomfoolery are two of the many valid responses to the human condition that create the contiguous traditions that cannot help touching and reacting to each other. The poetry discussed in this book deals with the relation of individuals to strange or to familiar landscapes, and what this means to their own sense of displacement or rootedness; with the use of history as an escape from or as a challenge to an apparently failing present; and with the role of nationalism either as a refuge for angry frustration, or as a weapon against the affronting world, or as an ambivalent loyalty that needs to be scoured, or as all three. Here we find poetry as a means of discovering true or false allegiances and valid or invalid public and private identities; poetry as a medium for exploring the uses of the demotic in confronting the breakdowns and injustices of modern democracy; poetry as play in the midst of private and public woe; poetry as a spiritual quest, as a spiritual scourging, as a wrestling with spiritual absences; and poetry as an intermittent and sporadic commemoration of the triumphs and delights of epiphanic encounters with the physical world.

The Plural of Us is the first book to focus on the poet's use of the first-person plural voice—poetry's "we." Closely exploring the work of W. H. Auden, Bonnie Costello uncovers the trove of thought and feeling carried in this small word. While lyric has long been associated with inwardness and a voice saying "I," "we" has hardly been noticed, even though it has appeared throughout the history of poetry. Reading for this pronoun in its variety and ambiguity, Costello explores the communal function of poetry—the reasons, risks, and rewards of the first-person plural. Costello adopts a taxonomic approach to her subject, considering "we" from its most constricted to its fully unbounded forms. She also takes a historical perspective, following Auden's interest in the full range of "the human pluralities" in a time of particular pressure for and against the collective. Costello offers new readings as she tracks his changing approach to voice in democracy. Examples from many other poets—including Walt Whitman, T. S. Eliot, Elizabeth Bishop, and Wallace Stevens—arise throughout the book, and the final chapter offers a consideration of how contemporary writers find form for

what George Oppen called "the meaning of being numerous." Connecting insights to philosophy of language and to recent work in concepts of community, *The Plural of Us* shows how poetry raises vital questions—literary and social—about how we speak of our togetherness.

In Black and Gold Rodopi
This book defines, analyses, and theorises a late modern 'etymological poetry' that is alive to the past lives of its words, and probes the possible significance of them both explicitly and implicitly. Close readings of poetry and criticism by Auden, Prynne, and Muldoon investigate the implications of their etymological perspectives for the way their language establishes relationships between people, and between people and the world. These twin functions of communication and representation are shown to be central to the critical reception of etymological poetry, which is a category of 'difficult'

poetry. However resonant poetic etymologising may be, critics warn that it shows the poet's natural interest in language degenerating into an unhealthy obsession with the dictionary. It is unavoidably pedantic, in the post-Saussurean era, to entertain the idea that a word's history might have any relevance to its current use. As such, etymological poetry elicits the closest of close readings, thus encouraging readers to reflect not only on its own pedantry, obscurity, and virtuosity, but also on how these qualities function in criticism. As well as presenting a new way of reading three very different late modern poet-critics, this book addresses an understudied aspect of the relationship between poetry and criticism. Its findings are situated in the context of literary debates about difficulty and diction, and in larger cultural conversations about the workings of

language as a historical event.
