Journeys from

Exclusion to Inclusion

Cornell University Press

A selection of papers

from the first

symposium devoted to

competency based

learning held in March 1989. The book provides an historical backdrop for anyone coming new to the study of Competency-Based Education and Training (CBET). Public Works; 47
Edward Elgar Publishing
The result of work of the Kenya Indigenous Forest Conservation Programme, this report provides a summary of the existing information about Kenya's indigenous forests. It covers geographical background; assessment of the biodiversity, environmental services, and wood products functions and values; population pressures; utilization; economic value; policy; legislation; management

guidelines; and criteria for management planning of such forests.

Disaster Resilience and Sustainability

IDRC

A study of the *longue durée* of a marginalized part of northern Kenya, examining the process of territorialization and the role of Islam in politicizing ethnicity. *Climate-Resilient Horticulture: Adaptation and Mitigation Strategies*
Food & Agriculture Org.
For much of the twentieth century improvement in the situation of disadvantaged communities was a focus for urban planning and policy. Yet over the past three decades the ideological triumph of neoliberalism has

caused the allocation of spatial, political, economic, and financial resources to favor economic growth at the expense of wider social benefits. Susan Fainstein's concept of the "just city" encourages planners and policymakers to embrace a different approach to urban development. Her objective is to combine progressive city planners' earlier focus on equity and material well-being with considerations of diversity and participation so as to foster a better quality of urban life within the context of a global capitalist political economy. Fainstein applies theoretical concepts about justice developed by contemporary philosophers to the

concrete problems faced by urban planners and policymakers and argues that, despite structural obstacles, meaningful reform can be achieved at the local level. In the first half of *The Just City*, Fainstein draws on the work of John Rawls, Martha Nussbaum, Iris Marion Young, Nancy Fraser, and others to develop an approach to justice relevant to twenty-first-century cities, one that incorporates three central concepts: diversity, democracy, and equity. In the book's second half, Fainstein tests her ideas through case studies of New York, London, and Amsterdam by evaluating their postwar programs for housing and

development in relation to the three norms. She concludes by identifying a set of specific criteria for urban planners and policymakers to consider when developing programs to assure greater justice in both the process of their formulation and their effects.

Security and Development

Berghahn Books

This book discusses financial inclusion, gender equality, regulatory regimes for microfinance, women empowerment, and digital finance from an Islamic perspective. It encourages the reader to reflect on whether the delivery of financial services from an Islamic perspective might be attainable and lead to achieving

global financial inclusion. Accessing financing is one of the most formidable challenges facing disadvantaged in ISDB member countries. The race to serve these niche markets has led to the emergence of conventional microfinance. There remains the lingering question of whether conventional microfinance in its current form has conclusively led to poverty alleviation among Muslim communities. Hence, there is a need of having Shari'ah-compliant business model that depends on Islamic socio-economic tools such as Zakah, Sadaqah, and Waqf might best address the needs self-financial exclusion or the exclusion of the

extremely poor in Muslim.

THE DOUBLE FORCE AND THE FALLEN KINGDOM Elsevier

Pastoralism is one of the predominant livelihoods of east Africa and the Horn. It contributes significantly to national economies and can conserve fragile natural resources. Yet pastoralists remain socially and economically marginalized and have little or no representation in local and national government.

Governments in the region continue to hold that pastoralism is unsustainable and a barrier to development.

Feminist Frontiers in Climate Justice World Bank Publications
Climate change, a

global phenomenon, has attracted scientists to contribute in anticipatory research to mitigate adverse impacts, which are more important for horticulture, considering that the scenario is in the midst of revolution, reaching the production level of 250 million tonnes in India. Impacts of climate variability have, invariably, profound influence on production and quality. An understanding of the impacts and relevant adaptation strategies are of foremost importance to sustain the productivity and profitability of horticulture crops in the climate change scenario, which necessitates synthesis of current knowledge to develop strategies for adaptation and

mitigation to achieve climate-resilient horticulture. The book *Climate-resilient horticulture: adaptation and mitigation strategies* addresses the effects of climate change on different horticultural crops and focuses on the adaptation strategies based on the scientific knowledge generated by the experts in different agro-climatic regions in India. Issues have been covered in various chapters to make this book a treasure of knowledge in horticulture vis-a-vis climate change. Some of the crops included in the book are apple, grapes, cashew, banana, litchi, mango, coconut, oil palm, potato, tomato, cucurbits and flowers. In addition to

strategies to be adapted in these crops, various other important aspects like carbon sequestration, pests and diseases, and urban landscaping are also covered in the book. Information on climatic risks and adaptation options for resilience in horticultural crops and future strategies and information on pest and disease dynamics on horticultural crops in relation to climate change and available mitigation strategies have also been documented. The book is edited by Dr H P Singh, a visionary leader, and his colleagues, which will be highly valuable to research workers, students, policy planners and farmers to understand and checkmate the adverse

effect of climate change, so as to convert weakness into opportunity.

Taxation and Gender Equity

Wajir County Edward Elgar Publishing

The country has a strong private sector and received encouraging forecasts of new oil, gas and water reserves, which if harnessed appropriately bode well for future growth. While a pending international court case resulting from

prior elections provoked a measure of uncertainty, the country's medium to long-term economic outlook is robust. With over 40% of the population under the age of 15, Kenya stands to benefit from a significant demographic dividend, provided that sufficient jobs can be found when this population bulge enters the workforce. The country has a reasonably sized industrial base, competitive infrastructure and a large agricultural sector, all of which offer opportunities for capital-intensive investment.

Doing Business 2020
Notion Press

The United Nations estimates that four billion people worldwide live outside

the protection of the law. These people can be driven from their land, intimidated by violence, and excluded from society. This book is about community paralegals - sometimes called barefoot lawyers - who demystify law and empower people to advocate for themselves. These paralegals date back to 1950s South Africa and are active today in many countries, but their role has largely been ignored by researchers.

Community Paralegals and the Pursuit of Justice is the first book on the subject.

Focusing on paralegal movements in six countries, Vivek Maru, Varun Gauri, and their coauthors have collected rich, vivid stories of paralegals helping people to take

on injustice, from domestic violence to unlawful mining to denial of wages. From these stories emerges evidence of what works and how. The insights in the book will be of immense value in the global fight for universal justice. This title is also available as Open Access.

Islam & Ethnicity in Northern Kenya & Southern Ethiopia

Cambridge University Press

Populations in Africa are vulnerable to both the direct and indirect adverse effects of climate change that are of human rights significance. The urgency for states in Africa to implement climate interventions while they face developmental challenges, however, raises questions of

'justice' or 'fairness' between the developed and the developing states. Consequently, interrogating how the human rights paradigm may respond to negative implications of climate change and its 'fairness' is important as states continue to engage with the climate change standard setting. This edited volume critically interrogates human rights paradigm as an intervention to secure climate change justice for vulnerable populations; analyses regional protection against human rights consequences of climate change; and assesses emerging interventions based on domestic regulatory frameworks on climate change in selected states in Africa.

Urban Resilience to Droughts and Floods

Lucn

Climate change will have a profound impact on human and natural systems, and will also impede economic growth and sustainable development. In this book, leading experts from around the world discuss the challenges and opportunities in building a climate resilient economy and society. The chapters are organised in three sections. The first part explores vulnerability, adaptation and resilience, whilst Part II examines climate resilience-sectoral perspectives covering different sectors such as agriculture, fisheries, marine ecosystems, cities and urban infrastructure, drought prone areas,

and renewable energy.

In the final part, the authors look at Incentives, institutions and policy, including topics such as carbon pricing, REDD plus, climate finance, the role of institutions and communities, and climate policies.

Combining a global focus with detailed case studies of a cross section of regions, countries and sectors, this book will prove to be an invaluable resource.

Disasters undermine societal well-being, causing loss of lives and damage to social and economic infrastructures.

Disaster resilience is central to achieving the 2030 Sustainable Development Goals, especially in regions where extreme inequality combines with the increasing frequency and intensity of natural disasters. Disaster risk reduction and resilience requires participation of wide array of stakeholders ranging from academicians to policy makers to disaster managers. Disaster Resilient Cities: Adaptation for Sustainable

Development offers evidence-based, problem-solving techniques from social, natural, engineering and other disciplinary perspectives. It connects data, research, conceptual work with practical cases on disaster risk management, capturing the multi-sectoral aspects of disaster resilience, adaptation strategy and sustainability. The book links disaster risk management with sustainable development under a common umbrella, showing that effective disaster resilience strategies and practices lead to achieving broader sustainable development goals. Provides foundational knowledge on integrated disaster risk

reduction and management to show how resilience and its associated concept such as adaptive and transformative strategies can foster sustainable development Brings together disaster risk reduction and resilience scientists, policy-makers and practitioners from different disciplines Case studies on disaster risk management from natural science, social science, engineering and other relevant disciplinary perspectives Kenya's Indigenous Forests Hassell Street Press Kenya is one of the most politically dynamic and influential countries in sub-Saharan Africa. Today, it is known in equal

measure as a country that has experienced great highs and tragic lows. In the 1960s and 1970s, Kenya was seen as a "success story" of development in the periphery, and also led the way in terms of democratic breakthroughs in 2010 when a new constitution devolved power and placed new constraints on the president. However, the country has also made international headlines for the kind of political instability that occurs when electoral violence is expressed along ethnic lines, such as during the "Kenya crisis" of 2007/08 when over 1,000 people lost their lives and almost 700,000 were displaced. The Oxford Handbook of Kenyan Politics explains these

developments and many more, drawing together 50 specially commissioned chapters by leading researchers. The chapters they have contributed address a range of essential topics including the legacy of colonial rule, ethnicity, land politics, devolution, the constitution, elections, democracy, foreign aid, the informal economy, civil society, human rights, the International Criminal Court, the growing influence of China, economic policy, electoral violence, and the impact of mobile phone technology. In addition to covering some of the most important debates about Kenyan politics, the volume provides an insightful overview of Kenyan history from 1930 to

the present day and features a set of chapters that review the impact of devolution on regional politics in every part of the country.

Addressing the Challenges in Communicating Climate Change Across Various Audiences

Routledge

This report identifies critical factors preventing marginalized women's inclusion in customary and democratic decision-making structures. It details specific strategies marginalized women and their supporters have adopted, ranging from direct action strategies in Somaliland to "soft" advocacy strategies in Cambodia, in overcoming barriers to their participation. The

report's 10 case studies gather knowledge and practical experience from around the world and show how women can impact on political processes through their participation in politics.

Sector Plan for Environment, Water and Sanitation

2013-2017 Oxford

Business Group

This FAO manual provides technical advice and guidelines for each of the livestock interventions most common during emergency response to natural and human-induced disasters. These are: destocking, veterinary support, provision of feed, provision of water, shelters and provision of livestock. There is also a chapter on the use of cash transfer

and one on monitoring, evaluation and assessing the impact of emergency livestock projects. The manual complements the Livestock Emergency Guidelines and Standards (LEGS) handbook.

Cornell Studies in Classical Philology; 24

Legare Street Press

When the adventure seeking twins decide to explore a theft in their neighbourhood, little did they know that they would be entangled in a war against the big evil and embark on an intergalactic journey. The Double Force and the Fallen Kingdom is the first book in a series about John and Jeremy, who are twin brothers. They are always looking for an adventure but just can't find one.

However, this spring, a robber starts causing chaos in their peaceful city. Furthermore, things start getting tense when a murder occurs, revealing to the police some unearthly evidences. This was the perfect chance for the twins to prove themselves. As they embark on their expedition, they accidentally enter a parallel world inhabited by a powerful sub-group of humans, formed a long time ago. The twins further discover that sometimes humans like themselves also get lucky and are born with genes similar to this species and can team with them. Unknown to them, they have been spotted and picked by these creatures to side with the good and fight the

greatest threat that had ever occurred in a millennium. The brothers go through a series of adventures and misadventures on their mission to fight the malevolent powers. But first, they must prepare...

Kenya Gazette

Springer

In this work, the author examines the case of the Rondonia Natural Resource Management Project (PLANAFLORO) in the Amazon, funded by the World Bank, and considers the frustrations created when local NGOs and communities were effectively excluded from decisions about a project that claimed to be participatory.

District Development Plan, 1997-2001: Wajir

Oxfam

Since 9/11 ideas of security have focused

in part on the development of ungovernable spaces. Important debates are now being had over the nature, impacts, and outcomes of the numerous policy statements made by northern governments, NGOs, and international institutions that view the merging of security with development as both unproblematic and progressive. This volume addresses this new security-development nexus and investigates internal institutional logics, as well as the operation of policy, its dangers, resistances and complicity with other local and national social processes. Drawing on detailed ethnography, the contributors offer new vantage points to

understand the workings of multiple, intersecting, and conflicting power structures, which whilst local, are tied to non-local systems and operate across time. This volume is a necessary critique and

extension of key themes integral to the security- development nexus debate, highlighting the importance of a situated and substantive understanding of human security.
