**Thomas Carlyle's Works: History of Friedrich II of Prussia, called Frederick the Great, v. 1-6** Springer Nature

The French Jesuit Isaac-Joseph Berruyer's *Histoire du peuple de Dieu* was an ambitious attempt to connect the ideas of the Enlightenment with the theology of the Catholic Church. A paraphrase of the Bible written in vernacular French, the *Histoire* promoted progress, the pursuit of happiness, the fundamental goodness of humanity, and the capacity of nature to shape moral human beings. Berruyer aimed to update the Bible for a new age, but his work unleashed a furor that ended with the expulsion of the Jesuits from France. Berruyer's Bible offers a fresh perspective on the history of the Catholic Enlightenment. By exploring the rise and fall of Berruyer's *Histoire*, Daniel Watkins reveals how Catholic attempts to assimilate Enlightenment ideas caused conflicts within the church and between the church and the French state. Berruyer's Bible flips the traditional narrative of the Enlightenment on its head by showing that the secularization of French society and the political decline of the Catholic Church were due not solely to the external assaults of anti-clerical philosophes but also to the internal discord caused by Catholic theologians themselves. Built upon extensive research in archives across Western Europe and the United States, Berruyer's Bible paints a vivid picture of the tumultuous intellectual world of the Catholic Church and the power of radical ideas that shaped the church throughout the Enlightenment, the French Revolution, and beyond.

Sacred Journeys in the Counter-Reformation examines long-distance pilgrimages to ancient, international shrines in northwestern Europe in the two centuries after Luther. In this region in the sixteenth and seventeenth centuries, saints' cults and pilgrimage were frequently contested, more so than in the Mediterranean world. France, the Low Countries and the British Isles were places of disputation and hostility between Protestant and Catholic; sacred landscapes and journeys came under attack and in some regions, were outlawed by the state. Taking as case studies hugely popular medieval shrines such as Compostela, the Mont Saint-Michel and Lough Derg, the impact of Protestant criticism and Catholic revival on shrines, pilgrims' motives and experiences is examined through life writings, devotional works and institutional records. The central focus is that of agency in religious change: what drove spiritual reform and what were its consequences for the 'ordinary' Catholic? This is explored through concepts of the religious self, holy materiality, and sacred space.

**Nouveau Petit Larousse Illustré** ASM Press

A unique visual reference for the diagnostic microbiology laboratory. Conceived by a team of authors with decades of classroom and laboratory experience. Includes more than 730 brilliant, four-color images of common pathogenic bacteria and descriptions of the methods used to identify them. Valuable illustrative supplement for lectures and laboratory presentations, this easy-to-use atlas was written for laboratorians, clinicians, students, and anyone interested in the field of diagnostic medical bacteriology.

The First Proofs of the Universal Catalogue of Books on Art Presses Univ. Franche-Comté

This book articulates an educational theory as well as a political theory of the Anthropocene. Divided into three sections it addresses educational anthropology, cultures and institutions, and educational

recommendations in the Anthropocene. Topics covered in the volume measure the impact of the idea of the Anthropocene on the type of anthropology that underlies education and on a phenomenology of relationship. It links the notion of the Anthropocene with cultures and institutions so as not to 'smooth out' or erase the latter. Finally, it presents proposals and recommendations for educational practices. The work advocates rethinking education as an essential component in ensuring the sustainability of human life in society - by proposing to go beyond the approach of education for sustainable development or environmental education. The work also brings together empirical contributions in which proposals are elaborated for programs, pedagogical devices and experiments relating to the preparation of the future in the field of education. This volume is of interest to researchers of the Anthropocene.
