Texas Rangers August McCrae and Woodrow Call, now in their middle years, continue to deal with the ever-increasing tensions of adult life -- Gus with his great love, Clara Forsythe, and Call with Maggie Tilton, the young whore who loves him. Two proud but very different men, they enlist with the Ranger troop in pursuit of Buffalo Hump, the great Comanche war chief; Kicking Wolf, the celebrated Comanche horse thief; and a deadly Mexican bandit king with a penchant for torture. Assisting the Rangers in their wild chase is the renowned Kickapoo tracker, Famous Shoes. *Comanche Moon* closes the twenty-year gap between *Dead Man's Walk* and *Lonesome Dove*, following beloved heroes Gus and Call and their

comrades in arms -- Deets, Jake Spoon, and Pea Eye Parker -- in their bitter struggle to protect the advancing West frontier against the defiant Comanches, courageously determined to defend their territory and their way of life.

"Learn the art of argument from the masters. Here is a curated collection, with hundreds of examples, of reasoning and debate from the golden age of debate in England and America. Leave it to Farnsworth to illuminate principles of debate through examples by masters of

the language. Thomas Paine, Abraham Lincoln, Jonathan Swift, Edmund Burke, Winston Churchill, and many others, each provide exemplars of reasoning, persuasion, and aggression. From "Insult and Invective" to "Reductio ad Absurdum," from "Ad Hominem Arguments," to "Deduction and Induction" (and the final chapter "Futility"), readers will see how to craft winning arguments of their own. A readable reference, the book is also meant for fun. "It shows masters of the language," as Farnsworth writes, "crossing analytical swords and exchanging abuse when those things were done with more talent and dignity than is common today. They made argument a spectator sport of lasting value and interest." Farnsworth's Classical English Argument is the fourth book in a series about wise use of words from an earlier age that we can learn from today. Previous titles in the series are Farnsworth's Classical English Rhetoric, Farnsworth's Classical English Metaphor, and Farnsworth's Classical English Style. Writing is not like chemical engineering. The figures of speech should not be learned the same way as the periodic table of elements. This is because figures of speech are not about hypothetical structures in things, but about real potentialities within language and within ourselves. The "figurings" of speech reveal the apparently limitless plasticity of language itself. We are inescapably confronted with the intoxicating possibility that we can make language do for us almost anything we

want. Or at least a Shakespeare can. The figures of speech help to see how he does it, and how we might. Therefore, in the chapters presented in this volume, the quotations from Shakespeare, the Bible, and other sources are not presented to exemplify the definitions. Rather, the definitions are presented to lead to the quotations. And the quotations are there to show us how to do with language what we have not done before. They are there for imitation.

Writing to Persuade: How to Bring People Over to Your Side

Farnsworth's Classical English

In this highly accessible new edition, Hauser systematically provides a humanistic account of what transpires when people communicate for some purpose. His masterful blend of classical and contemporary thinking about the use of language and the value of symbolic inducements for social cooperation illuminates fundamental rhetorical precepts and their implications for shaping human realities. The new chapter on public theory complements the four chapters that introduce the broad themes and issues essential for a rhetorical approach to communication. The new chapter on narrative theory bridges the four chapters devoted to the content of rhetoric and the concluding chapters that emphasize symbolic processes by which humans induce social cooperation and constitute social reality. Throughout the text, Hauser skillfully underscores the power of language to present a particular reality. He explores the fundamental relationship between public discourse and judgment, helping students understand the core of rhetoric's civic function. Through relevant, current examples, he illustrates how knowledge and power shape our social and political

practices and how both are formed through discourse.

Timeless techniques of effective public speaking from ancient Rome's greatest orator All of us are faced countless times with the challenge of persuading others, whether we're trying to win a trivial argument with a friend or convince our coworkers about an important decision. Instead of relying on untrained instinct—and often floundering or failing as a result—we'd win more arguments if we learned the timeless art of verbal persuasion, rhetoric. *How to Win an Argument* gathers the rhetorical wisdom of Cicero, ancient Rome's greatest orator, from across his works and combines it with passages from his legal and political speeches to show his powerful techniques in action. The result is an enlightening and entertaining practical introduction to the secrets of persuasive speaking and writing—including strategies that are just as effective in today's offices, schools, courts, and political debates as they were in the Roman forum. *How to Win an Argument* addresses proof based on

rational argumentation, character, and emotion; the parts of a speech; the plain, middle, and grand styles; how to persuade no matter what audience or circumstances you face; and more. Cicero's words are presented in lively translations, with illuminating introductions; the book also features a brief biography of Cicero, a glossary, suggestions for further reading, and an appendix of the original Latin texts. Astonishingly relevant, this unique anthology of Cicero's rhetorical and oratorical wisdom will be enjoyed by anyone who ever needs to win arguments and influence people—in other words, all of us.

A selection of early work—including two Pulitzer Prize-winning plays—from Eugene O'Neill, winner of the Nobel Prize in Literature A Penguin Classic Included in this volume are seven one-act plays (The Moon of the Caribbees, Bound East for Cardiff, In the Zone, The Long Voyage Home, Ile, Where the Cross Is Made, and The Rope), and five full-length plays (Beyond the Horizon, The Straw, Anna Christie, and the classics The Emperor Jones and The Hairy Ape), all written between 1914 and 1921 and produced for the stage between 1916 and 1922. The majority of these plays are heavily influenced by German expressionism—Freud, Nietzsche, Strindberg, and the radical leftist politics in which O'Neill was involved during his youth. Also included in this unique collection is the little-known and highly autobiographical play The Straw, which draws on O'Neill's confinement in the Gaylord Farm Sanatorium.

The Hill We Climb Farnsworth's Classical English

This new and revised edition of Peter Kreeft's Socratic Logic is updated,

adding new exercises and more complete examples, all with Kreeft's characteristic clarity and wit. Since its introduction in the spring of 2004, Socratic Logic has proven to be a different type of logic text: . (1) This is the only complete system of classical Aristotelian logic in print. The "old logic" is still the natural logic of the four language arts (reading, writing, speaking, and listening). Symbolic, or "mathematical," logic is not for the humanities. (How often have you heard someone argue in symbolic logic?) (2) This book is simple and user-friendly. It is highly interactive, with a plethora of exercises and a light, engaging style. (3) It is practical. It is designed for do-it-yourselfers as well as classrooms. It emphasizes topics in proportion to probable student use: e.g., interpreting ordinary language, not only analyzing but also constructing effective arguments, smoking out hidden assumptions, making "argument maps," and using Socratic method in various circumstances. (4) It is philosophical. Its exercises expose students to many classical quotations, and additional chapters introduce philosophical issues in a Socratic manner and from a common-sense, realistic point of view. It prepares students for reading Great Books rather than Dick and Jane, and models Socrates as the beginner's ideal teacher and philosopher.

Masters of language can turn unassuming words into phrases that are convincing, effective, and memorably beautiful. Lincoln and Churchill had this power: having heard their words once, one can scarcely imagine the world without them. What are the secrets of this alchemy? The answer lies in

rhetoric, among the most ancient of disciplines. This book contains a lively set of lessons on the subject, a tutorial on eloquence conducted by virtuoso faculty. The result is an indispensable book for the writer and the speaker, a highly useful reference tool, and a rewarding source for all lovers and users of the English language.

There are two kinds of knowledge law school teaches: legal rules on the one hand, and tools for thinking about legal problems on the other. Although the tools are far more interesting and useful than the rules, they tend to be neglected in favor of other aspects of the curriculum. In *The Legal Analyst*, Ward Farnsworth brings together in one place all of the most powerful of those tools for thinking about law. From classic ideas in game theory such as the “Prisoner’s Dilemma” and the “Stag Hunt” to psychological principles such as hindsight bias and framing effects, from ideas in jurisprudence such as the slippery slope to more than two dozen other such principles, Farnsworth’s guide leads readers through the fascinating world of legal thought. Each chapter introduces a single tool and shows how it can be used to solve different types of problems. The explanations are written in clear, lively language and illustrated with a wide range of examples. *The Legal Analyst* is an indispensable user’s manual for law students, experienced practitioners seeking a one-stop guide to legal principles, or anyone else with an interest in the law.

From the former New York Times Op-Ed page editor, a definitive and entertaining resource for writers of every stripe on

the neglected art of persuasion. In the tradition of *The Elements of Style* comes Trish Hall’s essential new work on writing well—a sparkling instructional guide to persuading (almost) anyone, on (nearly) anything. As the person in charge of the Op-Ed page for the New York Times, Hall spent years immersed in argument, passion, and trendsetting ideas—but also in tangled sentences, migraine-inducing jargon, and dull-as-dishwater writing. Drawing on her vast experience editing everyone from Nobel Prize winners and global strongmen (Putin) to first-time pundits (Angelina Jolie), Hall presents the ultimate guide to writing persuasively for students, job applicants, and rookie authors looking to get published. She sets out the core principles for connecting with readers—laid out in illuminating chapters such as “Cultivate Empathy,” “Abandon Jargon,” and “Prune Ruthlessly.” Combining boisterous anecdotes with practical advice (relayed in “tracked changes” bubbles), Hall offers an infinitely accessible primer on the art of effectively communicating above the digital noise of the twenty-first century. *Early Plays* University of Chicago Press
Restitution is the body of law concerned with taking away gains that someone has wrongfully obtained. The operator of a Ponzi scheme takes money from his victims by fraud and then invests it in stocks that rise in value. Or a company pays a shareholder excessive dividends or pays them to the wrong person. Or a man poisons his grandfather and then collects under the grandfather’s will. In each of these cases, one party is unjustly enriched at the expense of another. And in all of them the law of restitution provides a way to undo the enrichment and transfer the defendant’s gains to a party with better rights to

them. Tort law focuses on the harm, or costs, that one party wrongfully imposes on another. Restitution is the mirror image; it corrects gains that one party wrongfully receives at another's expense. It is an important topic for every lawyer and for anyone else interested in how the legal system responds to injustice. In *Restitution*, Ward Farnsworth presents a guide to this body of law that is compact, lively, and insightful—the first treatment of its kind that the American law of restitution has received. The book explains restitution doctrines, remedies, and defenses with unprecedented clarity and illustrates them with vivid examples. Farnsworth demonstrates that the law of restitution is guided by a manageable and coherent set of principles that have remarkable versatility and power. Restitution makes a complex and important area of law accessible, understandable, and interesting to any reader.

"The Socratic method is one of the timeless inventions of the ancient world. It is a path to wisdom and a way to think more intelligently about questions large or small. It is a technique for teaching others and for talking to yourself. It is an antidote to stupidity, to irrationality, and to social media. It is easy to understand but challenging to master. It is useful for everyone. This book explains the Socratic method in detail: what it is, where it came from, and how to carry it out. The chapters teach the elements of the method step by step with examples from Plato's dialogues. They illustrate how to create Socratic questions of your own. They show how the teachings of Socrates produced the philosophies of Stoicism and Skepticism. The book also explains how the Socratic method can be put to work in the classroom, and it offers Socratic rules of engagement for talking about politics and other hard things. The Socratic Method is a complete guide to the practical use of a great idea"--
