Eudora Welty was one of the twentieth century's greatest literary figures. For as long as students have been studying her fiction as literature, writers have been looking to her to answer the profound questions of what makes a story good, a novel successful, a writer an artist. On Writing presents the answers in seven concise chapters discussing the subjects most important to the narrative craft, and which every fiction writer should know, such as place, voice, memory, and language. But even more important is what Welty calls "the mystery" of fiction writing—how the writer assembles language and ideas to create a work of art. Originally part of her larger work *The Eye of the Story* but never before published in a stand-alone volume, *On Writing* is a handbook every fiction writer, whether novice or master, should keep within arm's reach. Like *The Elements of Style*, *On Writing* is concise and fundamental, authoritative and timeless—as was Eudora Welty herself.

Author Steve Sharp tells his students that the thesis statement is the sun around which EVERYTHING in their paper orbits. Every sentence must fall within its gravitational pull and obey rational orbital laws. Otherwise chaos ensues. If you really want to succeed in the academic world, you simply can't afford to leave your readers scratching their heads after they've read your paper, wondering, "What's the point of this? Why was this written?" **MASTERING THE THESIS STATEMENT** teaches you just about everything you need to know to write an effective thesis statement and improve the quality of your academic writing. Because writing is such hard work, you may have to revise your thesis many, many times before you discover the gem that shines brightest - a thesis that not only suits the content and purpose of your paper but also truly reflects what you're trying to say.

*Taking Flight With OWLs* examines computer technology use in writing centers. Its purpose is to move beyond anecdotal evidence for implementing computer technology in writing centers, presenting carefully considered studies that theorize the move to computer technology and examine technology use in practice. Writing centers occupy a dynamic position at the crossroads of computers and composition, distance education, and composition theory, pulling ideas, theories, and pedagogies from each. Their continuing evolution necessarily involves increasing use of computer technology. The move to computer technology so far has occurred so rapidly that writing center staff and administration have not yet had much time or opportunity to study how and when to infuse it into their programs. The need for this collection is evident: Writing center practitioners have long discussed their roles in relation to their supporting institutions; now they are challenged to explore—even reinvent—their roles as computer technologies transform centers and institutions. In exploring varied stages of technology-infusion through field-based accounts, this volume offers readers an important and unique resource.
