Skilled technical occupationsâ€”defined as occupations that require a high level of knowledge in a technical domain but do not require a bachelor's degree for entryâ€”are a key component of the U.S. economy. In response to globalization and advances in science and technology, American firms are demanding workers with greater proficiency in literacy and numeracy, as well as strong interpersonal, technical, and problem-solving skills. However, employer surveys and industry and government reports have raised concerns that the nation may not have an adequate supply of skilled technical workers to achieve its competitiveness and economic growth objectives. In response to the broader need for policy information and advice, Building America's Skilled Technical Workforce examines the coverage, effectiveness, flexibility, and coordination of the policies and various programs that prepare Americans for skilled technical jobs. This report provides action-oriented recommendations for improving the American system of technical education, training, and certification.

Education is the key to America's economic growth and prosperity and to our ability to compete in the global economy. It is the path to higher earning power for Americans and is necessary for our democracy to work. It fosters the cross-border, cross-cultural collaboration required to solve the most challenging problems of our time. The National Education Technology Plan 2010 calls for revolutionary transformation. Specifically, we must embrace innovation and technology which is at the core of virtually every aspect of our daily lives and work. This book explores the National Education Technology Plan which presents a model of learning powered by technology, with goals and recommendations in five essential areas: learning, assessment, teaching, infrastructure and productivity.

The 1990s produced some of the greatest artists and hits in dance music history. And the decade was among the genre's most successful in terms of energy, sales and global popularity. In this retrospective, 29 singers, songwriters, producers, DJs and industry professionals who enjoyed stardom on the club circuit and on pop radio candidly discuss their careers. Interviewed artists include Richard and Fred Fairbrass of Right Said Fred ("I'm Too Sexy"), Nicki French ("Total Eclipse of the Heart"), Haddaway ("What Is Love"), Lane McCray of La Bouche ("Be My Lover"), Martha Wash, vocalist of C+C Music Factory ("Gonna Make You Sweat [Everybody Dance Now]"), Robin S ("Show Me Love"), Frank Peterson, formerly of Enigma ("Sadness, Part I"), CeCe Peniston ("Finally"), Dr. Alban ("It's My Life"), Thea Austin, formerly of Snap! ("Rhythm Is a Dancer") and many more. Commentaries are provided by former Billboard dance music editor Larry Flick, renowned producers/songwriters The Berman Brothers (Real McCoy's "Another Night") and acclaimed DJ Susan Morabito.

A stirring, witty, and poignant glimpse into the bewildering American immigrant experience from someone who has lived it. Hakakian's "love letter to the nation that took her in [is also] a timely reminder of what millions of human beings endure when they uproot their lives to become Americans by choice" (The Boston Globe). Into the maelstrom of unprecedented contemporary debates about immigrants in the United States, this perfectly timed book gives us a portrait of what the new immigrant experience in America is really like. Written as a "guide" for the newly arrived, and providing "practical information and advice," Roya Hakakian, an immigrant herself, reveals what those who settle here love about the country, what they miss about their homes, the cruelty of some Americans, and the unceasing generosity of others. She captures the texture of life in a new place in all its complexity, laying bare both its beauty and its darkness as she discusses race, sex, love, death, consumerism, and what it is like to be from a country that is in America's crosshairs. Her tenderly perceptive and surprisingly humorous account invites us to see ourselves as we appear to others, making it possible for us to rediscover our many American gifts through the perspective of the outsider. In shattering myths and embracing painful contradictions that are unique to this place, A Beginner's Guide to America is Hakakian's candid love letter to America.

Jacqueline Woodson's National Book Award and Newbery Honor winner is a powerful memoir that tells the moving story of her childhood in mesmerizing verse. A President Obama "O" Book Club pick Raised in South Carolina and New York, Woodson always felt halfway home in each place. In vivid poems, she shares what it was like to grow up as an African American in the 1960s and 1970s, living with the remnants of Jim Crow and her growing awareness of the Civil Rights movement. Touching and powerful, each poem is both accessible and emotionally charged, each line a glimpse into a child's soul as she searches for her place in the world. Woodson's eloquent poetry also reflects the joy of finding her voice through writing stories, despite the fact that she struggled with reading as a child. Her love of stories inspired her and stayed with her, creating the first sparks of the gifted writer she was to become. Includes 7 additional poems, including "Brown Girl Dreaming." Praise for Jacqueline Woodson: "Ms. Woodson writes with a sure understanding of the thoughts of young people, offering a poetic, eloquent narrative that is not simply a story . . . but a mature exploration of grown-up issues and self-discovery."—The New York Times Book Review

Sherry Arnstein, writing in 1969 about citizen involvement in planning processes in the United States, described a "ladder of citizen participation" that showed participation ranging from low to high. Arnstein depicted the failings of typical participation processes at the time and characterized aspirations toward engagement that have now been elevated to core values in planning practice. But since that time, the political, economic, and social context has evolved greatly, and planners, organizers, and residents have been involved in planning and community development practice in ways previously unforeseen. Learning from Arnstein's Ladder draws on contemporary theory, expertise, empirical analysis, and practical applications in what is now more commonly termed public engagement in planning to examine the enduring impacts of Arnstein's work and the pervasive challenges that planners face in advancing meaningful public engagement. This book presents research from throughout the world, including Australia, Brazil, India, Indonesia, Portugal, Serbia, and the United States, among others, that utilizes, critiques, revises, and expands upon Arnstein's aspirational vision. It is essential reading for educators and students of planning.

There are a number of challenges which schools face in trying to ensure the safety of their pupils, including the risks of accidents, bullying, vandalism and violence; and in some countries the range of incidents is increasing. This publication contains papers presented at an international conference on school safety and security, held in February 2002 and jointly organised by the OECD and the U.S. Department of Education. The papers are organised under five key themes: risk assessment; crisis planning and management; infrastructure issues relating to building design and security measures; collaborative approaches; education, training and support.
